SAFETY DEMANDS A **24/7** COMMITMENT

No matter where you are in your safety journey, count on Grainger for environmental, health and safety solutions to help you **keep your people and facilities safe and healthy.**

BUILDING A SAFETY MINDSET

Our goal is to help you send your people home safe and healthy at the end of every day. It's a huge responsibility; one that's nearly impossible to accomplish alone. Building a safety mindset takes a total commitment from your crew—whether they're on or off the clock.

Look to Grainger for tools and resources to help you instill a 24/7 commitment to safety with your people. Take advantage of our vast product selection, safety expertise and relationships with third-party safety service providers to help you:

- **> REDUCE INJURIES**
- **> ENSURE COMPLIANCE**
- **> MANAGE RISK**
- **> INCREASE PRODUCTIVITY**
- **> LESSEN ENVIRONMENTAL IMPACT**

24/7 EMERGENCY SUPPORT

When you need products in a pinch, **call our After-Hours Emergency Service.** Most of our Grainger branch locations are able to open anytime—even nights and weekends—to help you get what you need.*

In an emergency, call 1-800-CALL-WWG

**$50 fee may apply, see our Terms of Sale for details. Grainger account required. We can establish a new account for business customers at the time of the emergency call. After-hours service may not be available in some locations, call 1-800-GRAINGER for more information.*

Grainger.com®

1-800-GRAINGER (472-4643) - **Available 24/7**

See Grainger.com® or the Grainger mobile app for additional branch information.

ABOUT GRAINGER'S INTERNATIONAL PRESENCE

Grainger understands international operations can be complex. When it comes to getting the maintenance, repair and operating (MRO) products and services you need, your business demands an easy, reliable and consistent experience. Whether you manage a large manufacturing plant that produces products for millions of people or a small local business that residents rely on, Grainger makes doing business across borders easier with international solutions, managed locally, that help alleviate challenges associated with MRO.

WHY INTERNATIONAL OPERATIONS CHOOSE GRAINGER

Grainger offers MRO products, services and solutions that are globally served with a local experience to help you with the pressures associated with keeping your operations running and people safe. Grainger carries 250K–1.5M products across 28–35 categories within the US, Canada, Mexico and UK, and serves businesses through Global Export across 120+ countries including Latin America, the Middle East and Asia Pacific with our dedicated export team that's ready to take care of your export needs.

GRAINGER IS READY TO HELP

Contact your Grainger Representative, email export@grainger.com or call +1-847-588-5000 today!

**All products may not be available within the US, UK, Mexico and Canada or otherwise available for export depending on the country. May be subject to limited product availability on select high-demand, pandemic-related items.*

Motor Selection Guidelines

Motors are used in a wide variety of applications. In some applications more than one motor design would work; in others, if an exact replacement cannot be found, a similar motor with slight differences in mechanical and electrical characteristics will provide reliable operation. The following selection guide is designed to help you choose the correct motor for your application.

STEP 1: GATHER MOTOR INFORMATION

You will need the following information to properly select a motor. If you are replacing a motor, much of the information can be found on the existing motor nameplate. See the sample nameplate on this page:

1-Phase (PH): Either single (1) or three (3). Match exactly.

2-Voltage (Volts): Match exactly.

3-Horsepower (HP): Very small motors are often rated in watts. Choose an equal or next higher HP.

4-Frame: Match exactly.

5-RPM: Match within 5%.

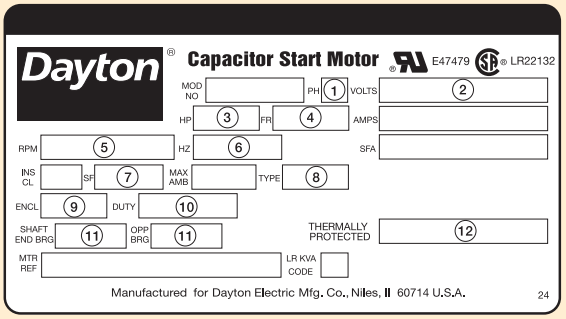
6-Frequency (Hz): Match exactly.

7-Service Factor (SF): Choose a motor of equal or greater number.

8-Design: See table on this page.

9-Enclosure (Encl.): See table on this page.

10-Duty: If current motor is intermittent duty, you may upgrade to continuous.



11-Bearing Type: Sleeve or Ball.

12-Thermal Protection: See Thermal Protection Information on this page.

STEP 2: DETERMINE THE RIGHT CATALOG SECTION

By your category: Many motors are listed by category. You will find these categories under "Motors" in the Product Index in the catalog. Turn to the specific page or section to find your motor. If your category is not listed in the index, choose your motor by its characteristics.

By the characteristics: Motor design, horsepower, RPM, frame, voltage, and enclosure. Grainger carries General Purpose motors designed for reliable use in a wide variety of applications, Definite Purpose motors for specific applications,

HVAC motors for various air moving applications, and Pump motors for applications moving water and gases.

General Purpose Motors are designed for mechanical loads (also effective for air moving), and for hard-to-start applications such as conveyors, belt-driven equipment, machine tools, and reciprocating pumps. These motors feature ball bearings to handle heavier radial and axial loads and heavier construction for industrial applications.

Definite Purpose Motors are designed for specific applications such as washdown, hazardous location, farm-duty, etc. Motor features are driven by the specific application's environment.

HVAC Motors are designed mostly for air moving and other light- to medium-duty applications, such as fans and centrifugal pumps, small tools, and office equipment.

Pump Motors are used for pump applications like pool pumps, carbonator pumps, and close-couple pumps. Motor features are driven by the application and move water and gases.

STEP 3: SELECT THE SPECIFIC MOTOR

Match the information gathered in Step 1.

AC MOTOR TYPES

Phase	Design	Typical RPM	Starting Torque as Percent of Full-Load Torque	Comparative Efficiency	Typical Uses
1	Shaded Pole	1050, 1550, 3000	Very Low 50-100%	Low	Small direct-drive fans & blowers
1	Permanent Split Capacitor (PSC)	825, 1075, 1625	Low 75-150%	Moderate	Direct-drive fans & blowers
1	Split-Phase	1140, 1725, 3450	Low to Moderate 130-170%	Moderate	Belt-drive & direct-drive fans & blowers, small tools, centrifugal pumps, & appliances
1	Capacitor-Start	1140, 1725, 3450	Moderate to High 200-400%	Moderate to High	Pumps, compressors, tools, conveyors, farm equipment, & industrial ventilators
3	3-Phase	1140, 1725, 3450	Moderate to High 200-300%	High	Applications where 3-Phase power is available

ENCLOSURE TYPES

Enclosure Type	How Can I Tell?	Where Do I Use This Enclosure?
Open Dripproof (ODP)/ Open/Open Air-Over (OPAO)	Ventilation holes in shell and/or endshield	Clean, dry, nonhazardous environments
Totally Enclosed Fan-Cooled (TEFC)/Totally Enclosed Nonventilated (TENV)	No ventilation holes in shell or endshield	Dirty, moist, nonhazardous environments
Hazardous Location	Enclosed. Must have a UL Hazardous Location nameplate on motor	Designed for use in hazardous environments as defined by National Electrical Code (NEC) classifications. NEC Class and Group are designated on UL Hazardous Location nameplate mounted on motor. See page 6 for more details.

Thermal Protection Information

Motors that start automatically (e.g. thermostat controlled) after tripping and that are located out of operator sight must be protected against dangerous overheating due to failure-to-start or overloading.

This protection may be a separate overcurrent device (e.g. motor starter) complying with Article 430 of the National Electrical Code (NEC), a thermally protected motor (internal motor protection), or an impedance-protected motor.

Motors with automatic reset thermal protection MUST NOT be used where automatic or otherwise unexpected starting of the motor could be hazardous. Applications where automatic restarting could be hazardous include compressors, conveyors, power tools, farm equipment, and some fans and blowers. Where such a hazard exists, always use a manual reset, thermally protected motor.

UL 507 Standard

Any motor used in a fan product, such as bathroom exhaust fans, wall-insert fans, ceiling-insert fans, attic-exhaust fans, whole-house fans, and duct fans, etc., which are built into or within the building structure and which are likely to operate unattended or in situations in which the operator may not detect a locked rotor (stalled motor) condition, must have either a manual reset thermal protector or a thermal cutoff (1-shot) device.

Range hoods, circulating fans, pedestal fans, and ceiling-suspended fans are not included. Agricultural fans are included if they are built into the building structure and are likely to operate unattended or in situations in which the person operating the fan may not detect a locked rotor (stalled motor) condition; they must have either a manual reset thermal protector or a thermal cutoff (1-shot) device.

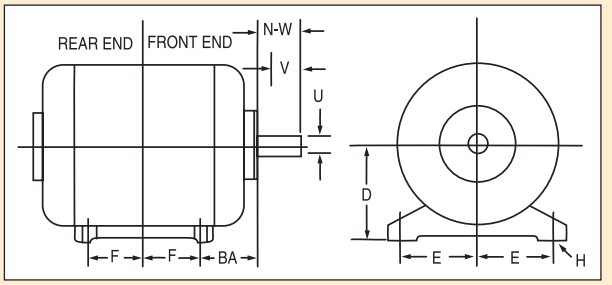
Premium Efficiency vs. Standard Efficiency

If you operate a 25 HP premium efficiency motor at full load for 24 hr. a day (8760 hr. per yr.) and your cost per kilowatt hr. is 9 cents, you can save $532.00 annually.

This comparison is based on a premium efficiency motor with a 94.1% efficiency rating vs. a high efficiency motor with a 91.0% efficiency rating.

Increased efficiency leads to lower operating temp., resulting in longer life.

Cool Operation: The life of an insulation system doubles for each 10°C reduction in operating temp.



Longer Bearing Life: The lower the temp., the longer the bearing grease will last.

Annual Savings = 0.746 x HP x L x C x N ($^{100}/_{E1}$ - $^{100}/_{E2}$)

HP = Motor Horsepower
L = Percent Load Divided by 100
C = Energy Cost, Dollars per kW Hr.
N = Running Time, Hr. per Yr.
E1 = Efficiency (%) of Standard Efficiency Motor
E2 = Efficiency (%) of Premium Efficiency Motor

Motor Dimensional Chart

Standardized motor dimensions—established by the National Electrical Manufacturers Association (NEMA)—are tabulated below and apply to all base-mounted motors listed herein that carry a NEMA frame designation.

NEMA Frame	All Dimensions in Inches D*	2E	2F	BA	H	N-W	U	V§ Min.	Key Wide	Key Thick	Key Long
42	2⅝	3½	1 11/16	2 1/16	9/32 slot	1⅛	⅜	—	—	3/64 flat	—

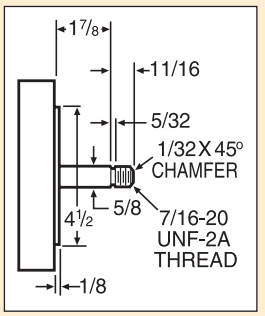
* Dimension "D" will never be greater than the above values on rigid mount motors, but it may be less so that shims up to 1/32" thick (1/16" on 364U and 365U frames) may be required for certain machines.

‡ Designated 56H motors have 2 sets of 2F mounting holes—3" and 5".

^ Standard short shaft for direct-drive applications.

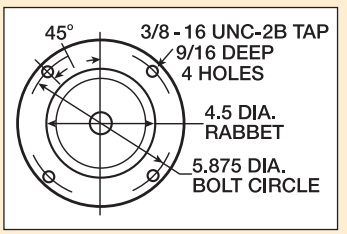
\# Discontinued NEMA frame.

** Base of Dayton 56HZ frame motors has holes and slots to match NEMA 56, 56H and 145T mounting dimensions.



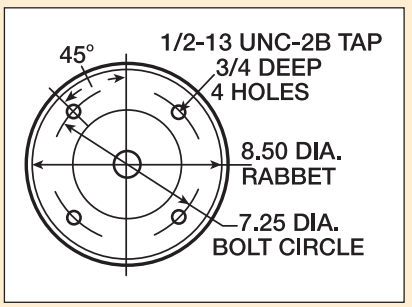
† Certain NEMA 56Z frame motors have ½" dia. x 1½" long shaft with 3/64" flat." These exceptions are noted in this catalog.

§ Dimension "V" is shaft length available for coupling, pinion, or pulley hub—this is a minimum value.



§§ The 2F dimension is 20.

NEMA C- AND J-FACE MOUNTING DIMENSIONS



Mounting dimensions of the 56J-Face are exactly the same as the NEMA 56C. 56J-Face has a threaded shaft of stainless steel while all others have a keyed steel shaft. See illustrations and table below for specifics.

56J SHAFT

56C, 56HC, 56J, 143TC AND 145TC – FACE DIMENSIONS

182TC THRU 256TC – FACE DIMENSIONS

NEMA Face	Shaft Dia. (U)	Shaft Long (N-W)	Rabbet Dia.	Bolt Circle Dia.
42C	⅜	1⅛	3	3¾
48C	½	1½	3	3¾
56C	⅝	1⅞	4½	5⅞
56HC‡	⅝	1⅞	4½	5⅞
56J	⅝	2 1/16	4½	5⅞
143TC & 145TC	⅞	2¼	4½	5⅞
146ATC & 1412ATC	⅞	2¼	4½	5⅞
L182ACY & 186ACY	⅞	2¼	4½	5⅞
182TC & 184TC	1⅛	2¾	8½	7¼
186ATC & 189ATC	1⅛	2¼	8½	7¼
213TC & 215TC	1⅜	3⅜	8½	7¼
219ATC & 2110ATC	1⅜	2¾	8½	7¼
254TC & 256TC	1⅝	4	8½	7¼
284TC & 286TC	1⅝	4⅝	10½	9

NEMA Letter Designations Following Frame Number

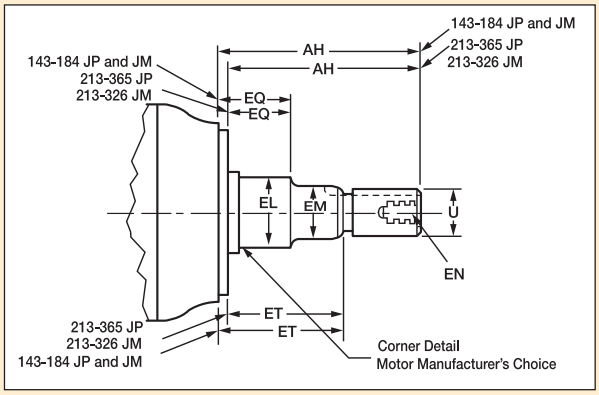
C: Face-mount; see this page.

H: Designated 56H motors have 2 sets of 2F mounting holes—3" and 5".

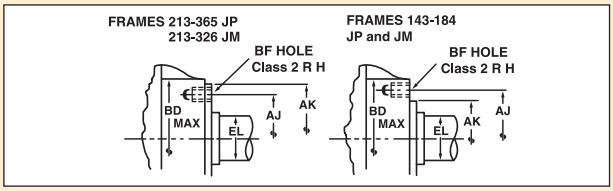
J: Face-mount for jet pumps; see this page for dimensions.

K: Has hub for sump pump mounting; see column at left for dimensions.

M, N: Flange mount for oil burner; see page 59.



T, U: Integral HP motor dimension standards set by NEMA in 1964 and 1953.



V: Vertical mount.

Y: Nonstandard mounting; see manufacturer's drawing for mounting dimensions.

Z: Nonstandard shaft (N-W+U dimensions); see manufacturer's drawing for shaft dimensions.

IEC (International Electrotechnical Commission)

ENCLOSURES

- IEC uses numbers to denote a particular enclosure type
- The numbers follow the letters IP (Ingress Protection) in the motor description
- The first digit signifies, on a rating scale, how well-protected the motor is against entry of solid objects such as dust, wire, tools, or fingers
- The second digit signifies, on a rating scale, the motor's ability to protect against water entry

Common Enclosure Ratings

IP 22 - Open Dripproof Motors

IP 44 or 54 - Totally Enclosed (NEMA 12)

IP 45 - Weatherproof Motors

IP 55 - Washdown-Duty Motors

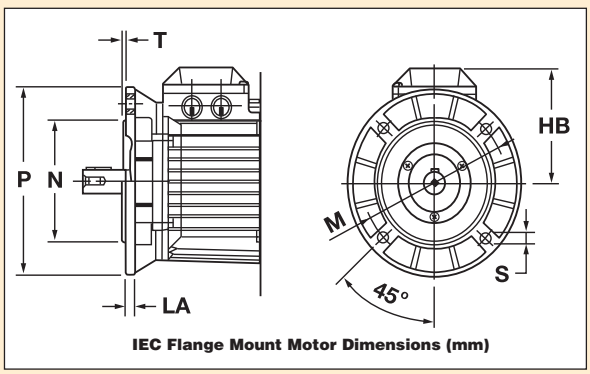
Common Motor Applications

IC 01 - NEMA Standard Open Motors

IC 40 (IC 410) - Totally Enclosed, Nonvented

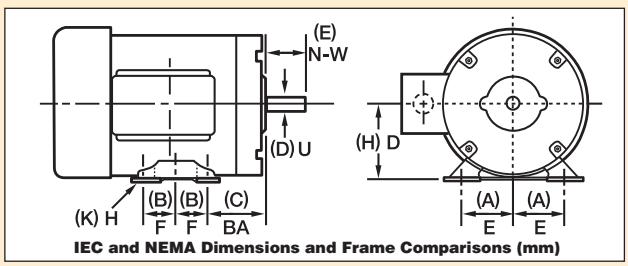
IC 41 (IC 411) - Totally Enclosed, Fan-cooled

IC 48 (IC 418) - Totally Enclosed, Air Over



Efficiency Ratings

IEC uses the following ratings to designate motor efficiencies:



IE2 = Meets Epact levels

IE3 = Meets NEMA Premium

IE4 = Exceeds NEMA Premium

IEC Flange Mount Motor Dimensions (mm)

IEC and NEMA Dimensions and Frame Comparisons (mm)

IEC FLANGE MOUNT MOTOR DIMENSIONS (mm)

* Shaft dimensions of these motors may vary among manufacturers. † No NEMA equal.

2015 Energy Conservation Standards For Small Electric Motors

2015 SMALL MOTOR LEGISLATION

Energy efficiency is becoming more important for electric motors used in industrial, commercial, and residential applications. The U.S. Department of Energy (DOE) has established new standards for certain types of small electric motors that will become effective on March 9th, 2015 (March 9th, 2017 for motors that require listing or certification). The motors governed under the small motor ruling include NEMA General Purpose two digit frames 42, 48, and 56, open construction, continuous duty, 1/4 horsepower up through 3 horsepower in 3-phase, capacitor start induction run and capacitor start capacitor run designs. The small motor rule also includes metric designs built in IEC frames 63, 71, or 80, and kilowatt ranges from .18 kW to 2.2 kW. See tables for standard efficiency levels.

Table I.1—Standard Levels for 3-Phase Small Electric Motors

HP/kW	6-Pole (1200 RPM)	4-Pole (1800 RPM)	2-Pole (3600 RPM)
0.25/0.18	67.5	69.5	65.6
0.33/0.25	71.4	73.4	69.5
0.5/0.37	75.3	78.2	73.4
0.75/0.55	81.7	81.1	76.8
1/0.75	82.5	83.5	77.0
1.5/1.1	83.8	86.5	84.0
2/1.5	—	86.5	85.5
3/2.2	—	86.9	85.5

Table I.2—Standard Levels for Capacitor-Start Induction-Run and Capacitor-Start Capacitor-Run Small Electric Motors

HP/kW	6-Pole (1200 RPM)	4-Pole (1800 RPM)	2-Pole (3600 RPM)
0.25/0.18	62.2	68.5	66.6
0.33/0.25	66.6	72.4	70.5
0.5/0.37	76.2	76.2	72.4

2/1.5	—	84.5	82.9
3/2.2	—	—	84.1

3-Phase Motor 2016 Final IHP (Integral HP) Rule

- Replaces Energy Independence and Security Act of 2007
- Takes effect June 1, 2016
- Almost all motors will be covered at Premium Efficiency levels NEMA MG1, Table 12-12 or Part 20, Table B (IE3)
- EISA 2007 Subtype 1 and II, 1-200 HP must now meet Table 12-12-NEMA Premium Efficient
- 56 Frame 3-phase Enclosed motors must now meet Table 12-12-NEMA Premium Efficient
- Custom 3-Phase motors must now meet Table 12-12-NEMA Premium Efficient

3-PHASE MOTORS COVERED UNDER IHP FINAL RULE

- Is a single speed induction motor
- Is rated for continuous duty (MG 1) operation or for duty type S1 (IEC)
- Contains a squirrel-cage (MG 1) or cage (IEC) rotor
- Operated on polyphase alternating current (AC) 60Hz sinusoidal line power
- Has 2-, 4-, 6-, or 8-pole configuration
- Is rated 600V or less
- Have a 3 or 4 digit NEMA frame size (or IEC metric equivalent), including: designs between 2 consecutive NEMA frame sizes (or IEC metric equivalent), or enclosed 56 NEMA frame size (or IEC metric equivalent)
- 2-digit frame size TENV and TEFC motors that are 1.0 HP and larger must also be in compliance.
- Between 1 and 500 HP (or kilowatt equivalent)
- Meets all performance requirements of NEMA design A, B, or C or IEC design N or H electric motor

NEMA Premium Nominal Full-Load Efficiency

Motor HP	Open Motors RPM			Enclosed Motors RPM

Motor Compliance Certification (CC) Numbers

The Department of Energy (DOE) has mandated energy efficiency levels for certain classes of 1- and 3-phase electric motors. For certain categories within these groups of energy efficient motors, a Compliance Certification (CC) number that is unique to a specific motor manufacturer, assigned by the DOE, must appear on the motor's nameplate. The CC number is listed in the Tech Spec section on Grainger.com® for affected motors.

Motor Compliance Certification (CC) Numbers

Dayton Brand	National Brand	
CC005A	CC001A	CC029A
CC029A	CC003A	—
CC030A	CC004A	—
CC060A	CC005A	—

Hazardous Location Motor Temperature Codes

In addition to identifying the Class, Group, and Division of the hazardous location motor, you must also obtain the temperature code or maximum surface temperature for the motor. This code or temperature indicates the maximum surface temperature for all conditions including burnout, overload, single phasing, and locked rotor. The maximum surface temperature or T-Code must be identified on the nameplate.

TEMPERATURE IDENTIFICATION NUMBERS

"T" Number (T-Code On Nameplate)	Max. Temp. (For All Conditions)		"T" Number (T-Code On Nameplate)	Max. Temp. (For All Conditions)	
T1	450°C	842°F	T3A	180°C	356°F
T2	300°C	572°F	T3B	165°C	329°F
T2A	280°C	536°F	T3C	160°C	320°F
T2B	260°C	500°F	T4	135°C	275°F
T2C	230°C	446°F	T4A	120°C	248°F
T2D	215°C	419°F	T5	100°C	212°F
T3	200°C	392°F	T6	85°C	185°F

National Electrical Code Explosive Atmosphere Classifications

Certain locations are hazardous because the atmosphere may contain gas, vapor, or dust in explosive quantities. The National Electrical Code (NEC) divides these locations into Classes and Groups according to the type of explosive agent which may be present. Listed are some of the agents in each classification. For a complete list, see NFPA (National Fire Protection Association) publication 497M.

Underwriters Laboratories tests motors and other devices for safety in explosive atmospheres, and publishes a list of those products that meet its standards for each Class and Group.

Use of UL Listed devices does not necessarily make an installation conform to the NEC or local codes. Consult Chapter 5 of the NEC, local building codes, OSHA requirements, and insurance inspectors for detailed data as to proper procedures. This catalog does not contain any motors designed for Class I, Groups A or B atmospheres.

CLASS I

Group A: Acetylene

Group B: Butadiene, ethylene oxide, hydrogen, propylene oxide, manufactured gases containing more than 30% hydrogen by volume

Group C: Acetaldehyde, cyclopropane, diethyl ether, ethylene

Group D: Acetone, acrylonitrile, ammonia, benzene, butane, ethanol, ethylene dichloride, gasoline, hexane, isoprene, methane (natural gas), methanol, naphtha, propane, propylene, styrene, toluene, vinyl chloride, xylene

CLASS II

Group E: Aluminum, magnesium, and other metal dusts with similar characteristics

Group F: Carbon black, coke, or coal dust

Group G: Flour, starch, or grain dust

CLASS III

Easily ignitable fibers, such as rayon, cotton, sisal, hemp, cocoa fiber, oakum, excelsior, and other materials of similar nature

Motor Terminology

AC—Alternating Currents

Amb. (Ambient)—The temp. of the space around the motor.

Auto—Automatic

Bearings—Basic types:

- **Sleeve—**Preferred where low noise level is important, as on fan and blower motors. Unless otherwise stated, sleeve bearing motors listed herein can be mounted in any position, including shaft-up or shaft-down (all-position mounting).
- **Ball—**Used where higher load capacity is required or periodic lubrication is impractical. The 2 methods used to keep out dirt are: shields and seals.

CSA—Canadian Standards Association

DC—Direct Current

Enclosure—The motor's housing. Types:

- **Open Dripproof (ODP)—**Ventilation openings in endshields and shell placed so drops of liquid falling within 15° from vertical will not affect performance. Usually used indoors, in fairly clean locations.
- **Open Air-Over (OPAO)—**Motors intended for fan and blower service. Must be located in the driven fan blade's air stream to provide motor cooling.
- **Totally Enclosed Air-Over (TEAO)—** Air flow from driven or external device provides cooling air flow over the motor, but not airtight or waterproof.
- **Totally Enclosed Fan-Cooled (TEFC)—** Includes an external fan in a protective shroud, to blow cooling air over the motor, but not airtight or waterproof.
- **Totally Enclosed Nonventilated (TENV)—**Not equipped with an external cooling fan, but not airtight or waterproof. Depends on convection air for cooling.

Energy Efficient—Any motor that has improved efficiency performance above a standard design as determined by the manufacturer, i.e., Epact levels in compliance with NEMA Table 12-11, but does not qualify for a NEMA Premium designation and or a small motor energy legislation model because the motor cannot meet the Federal and/or NEMA nominal efficiency guidelines, will be categorized as "Energy Efficient."

FLA (Full Load Amps)—Line current (amperage shown on motor nameplate) drawn by a motor when operating at rated HP and voltage.

Hz (Hertz)—Frequency, in cycles per sec., of AC power; usually 60 Hz in USA, 50 Hz overseas.

HP (Horsepower)—The amount of work a motor can do. 1 HP equals 746 watts.

Imp.—Impedance

Ins. (Insulation)—In motors, usually classified by max. allowable operating temp.: Class A-105°C (221°F), Class B-130°C (266°F), Class F-155°C (311°F), Class H-180°C (356°F).

Man.—Manual

Max.—Maximum

MFD—Microfarad

µF—Microfarad

Min.—Minimum

Mtg. (Mounting)—Basic types

- **Bolted—**Frame is attached to motor with removable bolts.
- **C-Face or Flange—**Shaft end has a flat mounting surface, machined to standard dimensions, with holes to allow easy, secure mounting to driven equipment. Commonly used on jet pumps, oil burners, and gear reducers.
- **Cradle/Resilient**—Motor shell is isolated from base by vibration-absorbing material, such as rubber rings on the endshields, to reduce transmission of vibration to the driven equipment.
- **Rigid—**Motor solidly fastened to equipment through metal base that is welded to, or cast into, motor shell.
- **Stud—**Motor has bolts extending from front or rear, by which it is mounted. Often used on small, direct drive fans and blowers.
- **Yoke—**Tabs or ears are welded to motor shell to allow bolting of motor to a fan column/pedestal or bracket.

Nameplate RPM—The nominal speed at which an induction motor operates under rated load (HP) conditions.

NEMA—National Electrical Manufacturer's Association

NEMA Premium Efficient—Any 3-phase motor that meets NEMA MG1 Table 12-12 Nominal Premium Efficiency Levels for a particular HP, rpm, and enclosure type rating and is required to display a CC Number on the nameplate, as registered with the Department of Energy, or single-phase motor that meet EISA standards, i.e. small motor rule, that are not required to display a CC Number, but do have the NEMA logo on the nameplate will be categorized as "NEMA Premium Efficient".

Nom.—Nominal

OC—On Center

PE—Pump end

Premium Efficient—For 2-digit open enclosure, single and 3-phase motors that meet EISA standards, i.e. small motor rule, that are not required to display a CC Number on the nameplate, will be categorized as "Premium Efficient".

Prot.—Protection

PSC—Permanent Split Capacitor

Resil.—Resilient

Rev.—Reversible

Rotation—Basic types:

- **CCW—**Counterclockwise
- **CW—**Clockwise
- **CW/CCW—**Reversible
- **CWSE—**Clockwise Facing Shaft End
- **CWLE—**Clockwise Facing Lead End
- **CCWSE—**Counterclockwise Facing Shaft End
- **CCWLE—**Counterclockwise Facing Lead End

RPM—Revolutions per Minute

SF (Service Factor)—A measure of the reserve margin built into a motor. Motors rated over 1.0 SF have more than normal margin, and are used where unusual conditions such as occasional high or low voltage, momentary overloads, etc. are likely to occur.

Severe Duty—A totally enclosed motor with extra protection (shaft slinger, gasketed terminal box) to resist entry of contaminants. Used in extra dirty, damp or other nonhazardous contaminated environments.

Syn.—Synchronous

Standard Efficient—Any motor not required to meet any specific called out nominal efficiency specifications including federal guidelines will be categorized as "Standard Efficient".

Temperature Rise—The amount by which a motor, operating under rated conditions, is hotter than its surroundings.

Thermal Protection—A temp. sensing device built into the motor that shuts off the motor if the temp. becomes excessive due to failure-to-start or overloading. Basic types:

- **Auto (Automatic-Reset)—**After motor cools, thermal protector automatically connects motor to power.
- **WARNING: Should not be used where unexpected restarting would be hazardous.**
- **Imp (Impedance Protected)—**Motor is designed so that it will not burn out in less than 15 days under locked rotor (stalled) conditions, in accordance with UL standard No. 519.
- **Man. (Manual-Reset)—**An external button must be pushed to reconnect power to motor. Preferred where unexpected restarting would be hazardous, as on saws, conveyors, compressors, etc.
- **T-Stat (Thermostat)—**A temperature-sensing device installed inside the motor with separate leads brought out for connection into motor starter coil (control) circuit. Under failure-to-start or overload conditions, thermostat contacts will open. Thermostat contacts will reclose automatically when motor cools.

Torque—Twist, or turning ability, as applied to a shaft. Measured in foot-pounds (ft.-lb.), inch-pounds (in.-lb.), ounce-feet (oz.-ft.) or ounce-inches (oz.-in.).

- **Breakdown—**The maximum torque a motor will produce while running, without an abrupt drop in speed and power.
- **Locked Rotor or Starting—**The maximum torque produced at initial start.

Insulation Classes and Temperature Rise

Heat is a byproduct of the operation of a motor. A motor's internal operating temp. depends on its design. Insulation classes are designated to meet the requirements of the motor design. The insulation class is determined by the ability of each insulation system to handle a specified amount of heat:

Class A: 105°C (221°F)
Class B: 130°C (266°F)
Class F: 155°C (311°F)
Class H: 180°C (356°F)

A newer design of general purpose 3-phase motors has been introduced to promote longer service life. These motors feature a higher insulation class (primarily Class F) with a lower temp. rise (primarily Class B rise). This allows for about 25°C reserve thermal capacity in the motor. The reserve thermal capacity is what helps maintain the integrity of the insulation and lengthen motor life.

Dayton

Split-Phase Open Dripproof Motors

- Rotation: CW/CCW
- Bearings: ball
- Max. ambient temp.: 40°C

Open dripproof motors are for use in clean, dry, and nonhazardous applications including fans, blowers, pumps, printing equipment, and other business machines. NEMA 42 frame is supplied with a relay instead of a centrifugal switch; relay mounting clip is included. UL Recognized and CSA Certified.

Dayton

Split-Phase Totally Enclosed Fan-Cooled Motors

- Rotation: CW/CCW
- Thermal protection: none
- Service factor: 1.00
- Bearings: ball
- Max. ambient temp.: 40°C

Totally enclosed motors are for use in dusty, dirty, nonhazardous applications including fans, blowers, pumps, and other business machines. Feature large conduit box for easy wiring. UL Recognized and CSA Certified.

marathon Motors

Capacitor-Start/Run Open Dripproof and Totally Enclosed Fan-Cooled Motors

- Rotation: CW/CCW
- Insulation: Class B
- Max. ambient temp.: 40°C

Open dripproof motors are for use in clean, dry, and nonhazardous applications including fan and blower applications.

Totally enclosed motors are suitable for the above and also dusty, dirty, and nonhazardous environments. UL Recognized and CSA Certified.

Minimum Wire Sizes (AWG) for 1-Phase Motor Circuits

To connect motor for proper voltage and rotation, refer to the connection diagram on the nameplate or inside the terminal/conduit box.

Note: NEC Article 310-5 states that 14 AWG is the minimum conductor size for general wiring at 115 to 440VAC.

**** Capacitor-start. † Cradle with studs in a 4³⁄₁₆" square pattern. ‡ Complies with 2015 efficiency legislation for small-frame motors; see page 5 for more information.***

Dayton

2015 SMALL MOTOR LEGISLATION

Capacitor-Start/Run Open Dripproof and Totally Enclosed Fan-Cooled Cradle-Base Mount Motors

- Rotation: CW/CCW
- Frame material: steel
- Bearings: ball
- Max. ambient temp.: 40°C

Open dripproof motors are for use in clean, dry, and nonhazardous applications including fans, blowers, pumps, printing equipment, and other business machines.

Totally enclosed motors can be used where open dripproof motors are used, and are also suitable for dusty, dirty, and nonhazardous environments. UL Recognized and CSA Certified.

Capacitor-Start Open Dripproof and Totally Enclosed Face-Mount Motors

- Rotation: CW/CCW
- Bearings: ball
- Max. ambient temp.: 40°C

Open dripproof motors are for use in clean, dry, and nonhazardous applications including speed reducers, pumps, blowers, conveyors, and other equipment that mounts directly to a NEMA C-face motor. Totally enclosed motors are also suitable for dusty, dirty, and nonhazardous environments. UL Recognized and CSA Certified or UL Recognized for US and Canada.

Capacitor-Start/Run Totally Enclosed Face-Mount Motors

- Rotation: CW/CCW
- 60/50 Hz
- Insulation: Class B
- Bearings: ball
- Max. ambient temp.: 40°C
- Include side-mount conduit box

Use in applications including speed reducers, pumps, blowers, conveyors, and other equipment that mounts directly to a NEMA C-face motor. Motors are suitable for dusty, dirty, and nonhazardous environments. UL Recognized and CSA Certified.

Dayton NEMA Premium

3-Phase Open Dripproof Rigid Base Motors

- Rotation: CW/CCW
- Thermal protection: none
- Voltage: 230/460
- Insulation: Class F motors have Class B temperature rise for longer life
- Inverter rated
- Bearings: ball
- Max. ambient temp.: 40°C
- Usable at 208V

143-5T/56HZ frames have ⅞" x 2¼" shaft and base bolt-hole configuration to match 56, 56H, 143T, and 145T. Steel frame. All models are suitable for clean, dry, nonhazardous applications with pumps, ventilation equipment, machine tools, and other industrial equipment. UL Recognized and CSA Certified or UL Recognized for US and Canada.

** 60/50 Hz. † Usable at 200V at 1.0 SF. ‡ Complies with 2015 efficiency legislation for small-frame motors; see page 5 for more information.*

No. 14R028

No. 41D790

AEGIS® SGR BEARING PROTECTION RING

Looking for Shaft Grounding Rings?

Help extend motor life by safely diverting harmful VFD-induced shaft voltages away from motor's bearings to ground. Protect both motor bearings and the bearings in attached equipment.

See page 17 or go to Grainger.com®

Dayton® NEMA Premium™

3-Phase Totally Enclosed Nonventilated and Totally Enclosed Fan-Cooled Rigid Base Motors

- Rotation: CW/CCW
- Thermal protection: none
- Voltage: 230/460
- Insulation: Class F motors have Class B temperature rise for longer life
- Inverter rated
- Bearings: ball
- Max. ambient temp.: 40°C
- Usable at 208V
- Warranty: 48, 56, and 143-5T/56HZ frame 1 yr.; 140T frame and above 3 yr.

143-5T/56HZ frame motors have ⅞" x 2¼" shaft and mounting base holes/slots to match 56, 56H, 143T, and 145T frame motors. Not for cooling tower applications. Suitable for dusty, dirty, nonhazardous applications with pumps, ventilation equipment, machine tools, and other industrial equipment. All are UL Recognized and CSA Certified.

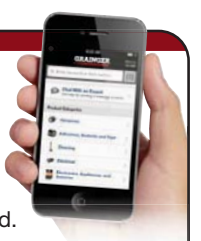
marathon Motors NEMA Premium

3-Phase Totally Enclosed Fan-Cooled Rigid Base Motors with Aegis® Rings

- Rotation: CW/CCW
- Thermal protection: none
- Voltage: 230/460
- Service factor: 1.15
- Insulation: Class F
- Inverter rated
- Bearings: ball
- Max. ambient temp.: 40°C
- 3-yr. warranty



Feature bearing protection rings that provide a grounding path to divert currents away from bearings to ground. Design prevents bearing fluting damage for motors controlled by variable frequency drives. Cast-iron frame. Suitable for use on blowers, compressors, conveyors, pumps, and other machinery in dirty and dusty environments. UL Recognized and CSA Certified.

WEG NEMA Premium

3-Phase Open Dripproof Rigid Base Motors

- Rotation: CW/CCW
- Thermal protection: none
- Voltage: 230/460 (usable at 208V)
- Insulation: Class F motors have Class B temp. rise for longer life
- Inverter rated
- Bearings: ball, regreasable on 254T frame and above
- Max. ambient temp.: 40°C
- 150 HP and up are part-winding start capable
- Warranty: 56 frame 1½ yr., 140T and above 3 yr.

Corrosion-resistant finish. Gasketed conduit boxes are threaded for easier installation. Stainless steel, laser-etched nameplate maintains information over long life. Suitable for clean, dry, nonhazardous applications with pumps, ventilation equipment, machine tools, and other industrial equipment. UL Recognized and CSA Certified. Cast-iron frames are also CE Certified.

Note: Motors in a 143T frame and above are nameplated 60/50 Hz, and maintain nameplate HP rating at 50 Hz.

Shaft Grounding Rings

AEGIS® SGR BEARING PROTECTION RING

Help extend motor life by safely diverting harmful VFD-induced shaft voltages away from motor's bearings to ground. Protect both motor bearings and the bearings in attached equipment. Aluminum construction. Include mounting brackets.

Fits Shaft Dia.	For Use With	1-PIECE Item No.	SPLIT RING Item No.

3-Phase Totally Enclosed Fan-Cooled Rigid Base Motors

- Rotation: CW/CCW
- Thermal protection: none
- 230/460V; 125 HP and above are 460V
- Service factor: 1.15 for Rolled Steel and Cast-Iron 125 HP and up; 1.25 for Cast-Iron to 100 HP and Premium
- Insulation: Class F motors have Class B temperature rise for longer life
- Inverter rated
- Bearings: ball, regreasable on 254T frame and above
- Max. ambient temp.: 40°C
- Usable at 208V
- 125 HP and above are part-winding start
- Warranty: 56 frame 1½ yr., 140T and above 3 yr.

Corrosion-resistant finish. V-ring slingers on both endshields block debris from entering bearing cavity. Automatic pressure-compensated drain plugs. Gasketed conduit boxes are threaded for easier installation. Stainless steel, laser-etched nameplate maintains information over long life. Not for cooling tower applications. Suitable for dusty, dirty, nonhazardous applications with pumps, ventilation equipment, machine tools, and other industrial equipment. Motors meet IP55 enclosure ratings and can be operated in moist to wet environments. Cast-iron models offer 50 Hz operation on 190/380V at rated HP and 5/6 of 60 Hz rpm. Severe-duty rated. Rolled Steel Frames are UL Recognized and CSA Certified; Cast-Iron Frames are UL Recognized, CSA and CE Certified.

Dayton NEMA Premium

3-Phase Face-Base and Face-Mount Motors

- Rotation: CW/CCW
- Thermal protection: none
- Voltage: 230/460V (usable at 208V)
- Insulation: Class F, except Nos. 3N841 and 3N842 are B
- Inverter rated
- Bearings: ball
- Max. ambient temp.: 40°C
- Warranty: 1 yr.

UL Recognized and CSA Certified.

Open Dripproof, Face/Base-Mount

Totally Enclosed Fan-Cooled, Face-Mount

marathon™ Motors

3-Phase Face- and Face/Base-Mount Motors

- Rotation: CW/CCW
- Thermal protection: none
- Frame material: steel
- Bearings: ball
- Max. ambient temp.: 40°C
- Usable at 208V

Use in pumps, speed reducers, machine tools, and other shaft-end-mounted industrial equipment applications. Open dripproof enclosures are for use in clean, dry, nonhazardous applications. Totally enclosed fan-cooled enclosures are for use in dusty or dirty applications. UL Recognized and CSA Certified.

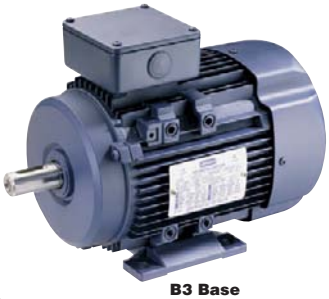
No. 6FDP4

WEG NEMA Premium

3-Phase Face/Base-Mount Motors

- Rotation: CW/CCW
- Thermal protection: none
- Voltage: 230/460 (usable at 208V)
- Insulation: Class F motors have Class B temperature rise for longer life
- Inverter rated
- Bearings: ball, regreasable 254TC frame and above
- Max. ambient temp.: 40°C

Corrosion-resistant finish. V-ring slingers on both endshields block debris from entering housing cavity. Automatic pressure-compensated drain plugs. Gasketed conduit boxes are threaded for easier installation. Stainless steel, laser-etched nameplate maintains information over long life. TEFC models are severe-duty rated. All models meet NEMA Premium® Standards and are UL Recognized and CSA Certified.



Note: Motors are nameplated 60/50 Hz and maintain nameplate HP rating at 50 Hz.

LEESON

3-Phase IEC Metric Rigid Base- and Face-Mount Motors

- Enclosure: IP55
- Rotation: CW/CCW
- Thermal protection: none
- Voltage: 230/460 at 60Hz, 200/400 at 50Hz
- Service factor: 1.15
- Insulation: Class F
- Bearings: ball
- Max. ambient temp.: 40°C

Steel fan cover and low-noise fan maximize airflow efficiency. Inverter-Rated Insulation System (IRIS™) provides protection against voltage spikes induced by variable frequency drives. V-seals on both drive end and nondrive end. Multimount repositionable feet (aluminum frame units only) allow 3 conduit box positions. Terminal boards included. Suitable as replacement motors for machine tools, textile machinery, and other equipment with metric dimensions. UL Recognized, CSA Certified, and CE Compliant.

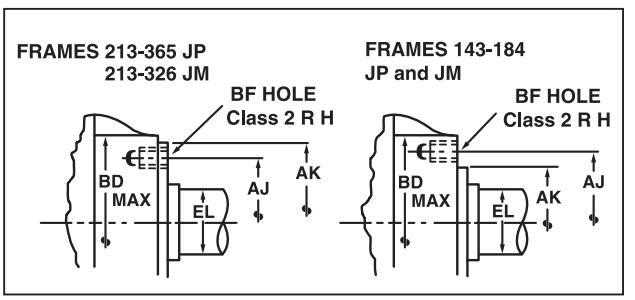
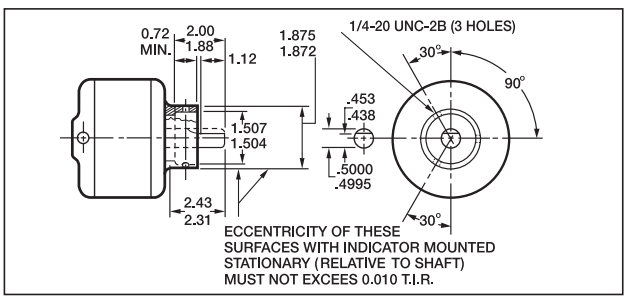
** NEMA Premium® energy-efficient motors.*

Open Dripproof, JM Threaded

WEG NEMA Premium



3-Phase NEMA Premium® Energy-Efficient Close-Coupled Pump Motors



- Rotation: CW/CCW
- Thermal protection: none
- Voltage: 208-230/460V
- Service factor: 1.25 Open enclosure, 1.15 for Totally Enclosed models
- Insulation: Class F, with B temperature rise for longer life
- Inverter rated
- Mounting: face/base
- Max. ambient temp.: 40°C

Close-coupled motors meet or exceed NEMA Premium requirement for energy efficiency. For additional ratings, see Grainger.com®. For use in water pumping, process, transfer, and circulating pumps. TEFC motors are designed for severe-duty applications. All motors are UL Recognized and CSA Certified.

marathon™ Motors Century®

1- and 3-Phase Close-Coupled Pump Motors

- Rotation: CW/CCW, except where noted
- Thermal protection: none
- Service factor: 1.15 except for No. 26ZY45 is 1.00
- Insulation: Class F, except where noted
- Max. ambient temp.: 40°C

Motors are continuous-duty and for use in commercial and industrial pumping applications. TEFC motors are suitable for use in dirty, dusty, and nonhazardous applications. All models are UL Recognized and CSA Certified.

MOTOR & PUMP UPGRADE Projects

The Grainger Energy Services Team is your resource to help with auditing, specifying, supplying, installing and commissioning/verifying energy-efficient motor and pump retrofit projects.

> Visit **grainger.com/energyservices**

IMPORTANT MOTOR INFORMATION | Refer to pages 3-7 for selection guidelines, standardized dimensions, thermal protection information, UL 507 Standard location information, NEMA & IEC guidelines, energy legislation information, and terminology.

ODP, Face-Mount, Keyed Shaft

ODP, Face/Base-Mount, Threaded Shaft

TEFC, Face-Mount, Threaded Shaft

marathon Motors | Dayton

1-Phase Jet Pump Motors

- Thermal protection: auto
- 60 Hz, except No. 2K650 is 60/50 Hz
- Insulation: Class B
- Mounting: horizontal or vertical, shaft down
- Bearings: ball
- Motor: capacitor-start, unless footnoted

Shaft slinger (all models) and gasketed conduit box (TEFC models only) protect against moisture and contaminants.

56C frame shaft: 5/8" dia. x 1 7/8"L, 3/16"-wide keyway.

56J frame shaft: stainless steel, 7/16-20 UNF-2A, RH threaded 1 1/16" from end, 2 7/16" length. Use in jet pump water systems, centrifugal and hydraulic pumps, and other applications requiring NEMA 56C- or 56J-face mounting. UL Recognized and CSA Certified.

Note: Must equal or exceed service factor and HP for proper replacement.

MARATHON

2-compartment design with locked ball bearings on shaft end. Voltage-change plug and enlarged conduit box for easy terminal lead connection. 56C frame has 416 stainless steel shaft.

DAYTON®

Single-compartment design. 56C frame has carbon steel keyed shaft. ½-HP and higher motors include drip cover kit for vertical mounting.

marathon Motors | Dayton

3-Phase Jet Pump Motors

- 56J frame
- Thermal protection: none
- Bearings: ball
- Max. ambient temp.: 40°C

Shaft: stainless steel, 7/16-20 UNF-2A RH threaded 1 1/16" from end, 2 7/16"L. Open dripproof models have a shaft slinger and gasketed conduit box to protect against moisture and contamination.

Dayton® motors will operate at 50 Hz on 190/380V at 5/6 of 60 Hz HP and rpm. For use in industrial, commercial, centrifugal, and hydraulic pumps. UL Recognized and CSA Certified.

Note: Must equal or exceed service factor and HP for proper replacement.

1-Phase and 3-Phase Square-Flange Pool Pump Motors

Century®

- Enclosure: open dripproof
- Thermal protection: auto, except 3-phase motors have none
- Mounting: flange, horizontal only
- Bearings: ball

Motors are equivalent replacements for most popular pool and spa manufacturers' pumps. Permanent split capacitor and 3-phase motors are single-compartment design. Capacitor-start motors are 2-compartment design. Shaft: 303 stainless steel, ½-20 UNF-2A RH external threads. Additional square-flange pump motors are available on Grainger.com®. UL Recognized and CSA Certified.

Note: Must equal or exceed service factor and HP for proper replacement.

56J Frame, Permanent Split Capacitor

Century®

1-Phase Face-Mount Pool Pump Motors

- Enclosure: open dripproof
- Rotation: CCWSE
- Thermal protection: auto
- Insulation: Class B
- Bearings: ball

Motors are equivalent replacements for most popular pool and spa pump manufacturers' pumps. Sealed switch design prevents water infiltration. Moisture/heat-resistant bearing lubricant.

56C frame shaft: keyed steel, ⅝" dia. x 1⅞"L with ³⁄₁₆"W keyway.

56J frame shaft: 303 stainless steel, ⁷⁄₁₆-20 UNF-2A RH threaded ¹¹⁄₁₆" from end.

All motors are UL Recognized and CSA Certified.

Note: Must equal or exceed service factor and HP for proper replacement.

IMPORTANT MOTOR INFORMATION | Refer to pages 3-7 for selection guidelines, standardized dimensions, thermal protection information, UL 507 Standard location information, NEMA & IEC guidelines, energy legislation information, and terminology.

Cradle Base

Rigid Base

Split-Phase Carbonator Pump Motors

- Enclosure: open dripproof
- Rotation: CW/CCW
- Thermal protection: auto
- Insulation: Class B
- Max. ambient temp.: 40°C

Motors have a threaded conduit hole. Short, slotted shaft permits close-coupling the carbonator pump to the motor. Extended hub for direct-mounting pump to motor. Use for liquid transfer pumps, vending machine pumps, and other hub-mounted pump applications. See page 2698 for an assortment of suitable pumps. UL Recognized and CSA Certified.

No. 21AJ16

No. 4UX55

No. 454X49

1-Phase Capacitor-Start Pressure Washer Pump Motors

- Enclosure: open dripproof
- Rotation: CW/CCW, except No. 4UX55 is CWSE
- Thermal protection: manual
- Insulation: Class B
- Bearings: double-shielded ball
- Max. ambient temp.: 40°C

Corrosion-resistant; for use in hot and cold water high-pressure washer applications. UL Recognized and CSA Certified.

Dayton

12, 24, 90, and 180VDC Permanent Magnet Motors

- Rotation: CW/CCW
- Service factor: 1.0
- Bearings: ball
- Max. ambient temp.: 40°C

Designed for use with speed controls or NEMA Type K DC power supplies on constant or diminishing torque applications. Performance matched with Dayton® and Dart Speed Controls listed on pages 158 and 159. 90V and 180V models feature a tapped hole on the fan end shaft to mount a No. 6Z392 or No. 5JJ65 pulse generator (see page 159). 56C frame models have a removable base. Find replacement brushes on Grainger.com®. 12V and 24V units are UL Recognized (E57948) and CSA Certified (LR33543); 90V and 180V units are UL Recognized (E47479).

Dayton

90 and 180VDC Permanent Magnet Motors with Control

- Enclosure: totally enclosed fan-cooled, NEMA 1 control
- Rotation: CW/CCW
- Insulation: Class F
- Mounting: C-face with removable rigid base
- Bearings: ball
- Max. ambient temp.: 40°C
- Input: 115 or 230VAC, 60/50 Hz (No. 4Z226 requires 250V, 20A receptacle)
- 50:1 control speed range

Control regulates speeds within 1% of nameplate rpm and provides full-wave rectification with adjustable min./max. speed, current/torque limit, IR compensation, fixed acceleration, transient and surge protection, and front-panel fuse protection. No. 41D720 has adjustable min./max. speed and IR compensation. Speed regulation: ±1%. Motors are UL Recognized and CSA Certified; Speed Control is UL and C-UL Listed.

Dayton

12/24, 90, and 180VDC Permanent Magnet Motors

No. 3XE19

- Enclosure: totally enclosed nonventilated
- Rotation: CW/CCW
- Bearings: ball
- Max. ambient temp.: 40°C

Use with Type K DC rectified power sources matched to voltage (providing form factor does not exceed 1.3); see pages 158 and 159. For adjustable speed controls for 12/24V models, see page 159; for 90V and 180V models, see page 158. UL Recognized.

No. 6AGW5

WEG NEMA Premium

3-Phase IEEE 841 NEMA Premium® Efficient Motors

- Enclosure: totally enclosed fan-cooled
- Rotation: CW/CCW
- Thermal protection: none
- 460V
- Service factor: 1.25
- Insulation: Class F with B temp. rise for longer life
- Inverter rated
- Frame material: cast-iron
- Bearings: regreaseable ball
- Max. ambient temp.: 40°C
- Warranty: 5 yr.

Designed for dusty, dirty, nonhazardous applications, and especially suited for pulp, paper, and steel mills, petrochemical, and applications requiring severe-duty long-life motors. Internal and external corrosion-resistant finish with stainless steel nameplate. Feature Inpro-seal on drive end, and 50,000-hr. extended bearing life. Nonsparking fan. Meet or exceed IEEE 841-2009 specification and all NEMA Premium/CEE requirements for energy efficiency. UL Recognized, CSA and CE Certified.

1-Phase Hazardous Location Motors

- Enclosure: totally enclosed fan-cooled
- Rotation: CW/CCW
- Thermal protection: auto, except thermostat for Nos. 2NLE6 and 2NLE9
- Bearings: ball
- Max. ambient temp.: 40°C

Motors have sturdy rolled-steel frames and meet the National Electrical Code for hazardous locations. Unmounted conduit box is included with all 56-frame motors. Use to power fans, blowers, pumps, or air compressors in areas that meet the National Electrical Code for hazardous locations. UL Listed and CSA Certified.

Note: For assistance with hazardous location classification, see page 6.

**** Totally enclosed nonventilated. ‡ Shaft is ⅝" x 2¼".***

marathon™ Motors

3-Phase Hazardous-Location Motors

- Rotation: CW/CCW
- Bearings: ball
- Temp. code: T3B
- Max. ambient temp.: 40°C
- Duty: continuous

Unmounted conduit box is included with all 56 frame motors. Totally Enclosed Nonventilated motors include an unmounted conduit box. Can be used to power fans, blowers, pumps, or air compressors in areas that meet the National Electrical Code for hazardous locations. UL Listed and CSA Certified.

Note: For assistance with hazardous location classification, see page 6.

For assistance with motor selection, see pages 3 to 7.

3-Phase NEMA Premium® Efficient Cooling Tower Motors

- Enclosure: totally enclosed fan-cooled
- Rotation: CW/CCW
- Thermal protection: none
- Service factor: 1.25
- Insulation: Class F, with B temperature rise for longer life
- Inverter rated
- Mounting: rigid base
- Frame material: cast-iron
- Bearings: ball
- Max. ambient temp.: 40°C
- Usable at 208V
- Warranty: 3 yr.

Note: Motors are suitable for use at 50 Hz at rated HP and 1.25 service factor.

F1 Conduit Box Position

F2 Conduit Box Position

Durable synthetic enamel alkyd resin paint resists corrosion. V-ring slingers and umbrella seal on both endshields protect bearings from moisture and contaminants. Multiple endbell drains provide for shaft-up, -down, or -horizontal mounting. Include threaded conduit box with automatic drain and rubber lead separators at the motor frame. Stainless steel laser-etched nameplate maintains information over long life. Suitable for operation in 100% humidity and corrosive environments. For use in cooling tower applications where the motor is mounted in the airstream. Meet IP55 enclosure rating. UL Recognized and CSA Certified.

1- and 3-Phase Stainless Steel Washdown Motors

- Rotation: CW/CCW
- Thermal protection: none, except Nos. 12V772 to 12V775 are auto
- Insulation: Class F
- Bearings: ball
- Max. ambient temp.: 40°C

1-phase models are built to comply with NEMA MG1-1.26.6. All exterior components are 300 Series stainless steel to provide maximum corrosion resistance in severe-duty and washdown environments. Motors are well-sealed against moisture and condensation to protect internal components, and exteriors are completely paint- and coating-free. Heavy polyester insulating varnish applied to the windings for extra moisture and corrosion resistance. Moisture-resistant sealant between frame and endbells. Double-sealed oversized bearings with rust-inhibitive grease. Shaft-end bearing is locked internally to limit axial endplay. 4 drains in each endshield allow drainage of condensation in any mounting position. For use in the food processing, chemical processing, and beverage industries. UL Recognized, CSA Certified. 3-phase models are also CE Certified.

marathon™ Motors

- Enclosure: totally enclosed fan-cooled
- Rotation: CW/CCW
- Thermal protection: auto
- Insulation: Class B
- Mounting: face
- Bearings: double-sealed ball
- Max. ambient temp.: 40°C

Use when frequent high-pressure washdown is required. Motors feature 303 stainless steel shafts with contact lip seal and V-ring slinger. UL Recognized and CSA Certified. Nos. 53DE48 to 53DE50 are also CE Certified.

Dayton marathon Motors

1-Phase Washdown Motors

- Rotation: CW/CCW
- Thermal protection: auto on PSC motors; none on capacitor-start
- Insulation: Class F
- Bearings: ball
- Max. ambient temp.: 40°C
- Duty: continuous

Built to comply with NEMA standard MG1-1.26.6 for washdown motors. 303 stainless steel shaft. V-ring rotating seal. Double-sealed, oversize bearings and spring-loaded contact seals in each endshield are lubricated with moisture-resistant grease. Conduit boxes have drains to shed excess moisture. White epoxy finish for superior resistance to caustic cleaning solutions. For high humidity/wet environments and areas where motor is occasionally exposed to high-pressure washdowns. UL Recognized, CSA Certified, and USDA Approved paint finish.

3-Phase Painted Washdown Motors

- Rotation: CW/CCW
- Thermal protection: none
- Insulation: Class F
- Inverter rated
- Bearings: ball
- Max. ambient temp.: 40°C

NEMA premium efficient motors built as washdown motors. Copper windings are cured in protective polyester compound. 303 stainless steel shaft. V-ring rotating seal. Double-sealed, oversize bearings and spring-loaded contact seals in each endshield are lubricated with moisture-resistant grease. Conduit boxes have drains to shed excess moisture. Bearing cavities are packed to help keep moisture out. White epoxy finish provides superior resistance to caustic cleaning solutions. For high humidity/wet environments and areas where motor is occasionally exposed to high-pressure washdowns. UL Recognized, CSA Certified, and USDA Approved paint finish.

90 and 180VDC Painted Washdown Motors

- Enclosure: totally enclosed fan-cooled
- Service factor: 1.0
- Insulation: Class H
- Bearings: ball
- Max ambient temp.: 40°C
- Duty: continuous

Designed for use with speed controls or NEMA Type K DC power supplies on constant or diminishing torque applications. Motors feature externally replaceable brushes and removable bases. Suitable for use in drives for conveyors, food packaging and processing machinery where high humidity and wet environments exist, or where washdown procedures are used. UL Recognized.

Capacitor-Start Farm-Duty Motors

- Enclosure: totally enclosed fan-cooled
- Rotation: CW/CCW
- Thermal protection: manual
- Bearings: ball
- Max. ambient temp.: 40°C
- Duty: continuous
- Color: green

Features include gasketed conduit box and a capacitor cover; a rubber boot over the manual protector reset button seals the motor against weather and contaminants. Oversized conduit boxes make connections easier. Shaft slinger included. For use with conveyors, silo unloaders, barn cleaners, compressors, and manure pumps. Extra-High-Torque motors have up to 400% starting torque for extremely hard-starting applications and can start under full-load conditions. All motors are UL Recognized and CSA Certified.

Dayton

3-Phase Farm-Duty Motors

- Enclosure: totally enclosed fan-cooled
- Rotation: CW/CCW
- Mounting: rigid base
- Bearings: ball
- Max. ambient temp.: 40°C
- Duty: continuous

Gasketed conduit box and shaft slinger provide added protection against moisture, dust, and dirt. Use for driving augers, air compressors, conveyors, pumps, and other farm equipment where 3-phase power is available. UL Recognized and CSA Certified.

1-Phase Auger Motors

marathon Motors

Dayton

- Rotation: CW/CCW
- Thermal protection: manual
- Insulation: Class B, except Nos. 33K161 to 33K165 are Class F
- Bearings: ball
- Max. ambient temp.: 40°C

Guard on rotary switch protects against high-speed back-drive condition. Mounting flange assembles directly to gearbox on auger-drive systems. Capacitor-start models have shaft extensions beyond fan guard for hand cranking. Suitable as a replacement for Chore-Time, Cumberland, GSI, and other new and replacement OEM equipment. Nos. 33K161 to 33K165 include conduit box. UL Recognized and CSA Certified.

1-Phase Poultry/Livestock Direct-Drive Fan Motors

- Enclosure: totally enclosed air-over
- Max ambient temp.: 40°C

Motors feature shaft slinger. For fan duty only. Direct replacements for Acme, Aerotech, Dayton®, GSI, LB White, and other direct-drive poultry fans. PSC and Capacitor Start/Run motors also have gasketed capacitor covers. All models are UL Recognized and CSA Certified.

1-Phase Poultry/Livestock Belt-Drive Fan Motors

- Enclosure: totally enclosed air-over
- Rotation: CW/CCW
- Thermal protection: auto
- Insulation: Class B
- Max. ambient temp.: 40°C

Motors have higher service factors and breakdown torque for the most-demanding applications. Feature shaft slinger, gasketed capacitor, and conduit box cover for added protection against dirt and moisture. Motors also have double-sealed bearings, condensation drain holes, and cooler-running windings to promote longer service life. For use in Dayton®, Aerotech, American Coolair, Chore Time, Acme, Hired Hand, and other air-over belt drive livestock ventilation fans. UL Recognized and CSA Certified.

Capacitor-Start Aeration Fan Motors

- Enclosure: totally enclosed air-over
- Rotation: CW/CCW
- Service factor: 1.0
- Insulation: Class B
- Mounting: rigid base
- Max. ambient temp.: 50°C

Use as a replacement motor for tube-axial fan grain aeration systems made by Aero-Vent, Dynavent, Farm Fan, and other manufacturers. Permanent split capacitor motors have keyed shaft that is drilled on center 1"D, and tapped ¼-20 UNC to allow fan mounting. UL Recognized and CSA Certified.

1-Phase Air Compressor Motors

- Enclosure: open dripproof
- Mounting: rigid base
- Bearings: ball
- Max. ambient temp.: 40°C

Direct replacements for selected air compressors including Dayton®, Speedaire®, Ingersoll-Rand, Campbell Hausfeld, Sanborn, Champion, Coleman, Quincy, and others. Designed to meet the high-torque requirements of air compressor loads. Mechanical features provide long life in high-tension, belt-type loads, which typically shorten motor life. High breakdown torque ensures dependable service. Suitable for intermittent-duty, portable, and stationary air compressors. UL Recognized and CSA Certified.

Note: Use on other applications voids warranty.

Designed for light-duty, intermittent use.

No. 2M066

No. 2M145

Universal AC/DC Motors

- Enclosure: open dripproof
- Rotation: CCWSE (nonreversible), except No. 2M034 is CWSE
- 115V at 60 Hz
- Insulation: Class A, except No. 2M139 is Class F
- Max. ambient temp.: 40°C

Full-load speeds can be adjusted 20% to 100% with proper speed control (sold separately). Average brush life is about 300 hr. Motors are series-wound. Gray hammer finish. UL Recognized.

3.3"-Dia. Shaded-Pole Vibrator Motor

- Enclosure: open
- Mounting: strap-type
- Max. ambient temp.: 40°C

Equipped with 9-ft. 3-cond. cordset and inline On/Off switch. Bracket mounting holes are ⅞" x 3" O.C.; includes bolt and nut to secure to motor. UL Recognized and CSA Certified.

**** Air-sealed bearing protection. † Auto thermal protection; all others have none.***

PERIPHERAL DISCHARGE

Air flows into the bottom of the motor and is discharged through vents in the motor.

TANGENTIAL DISCHARGE

Air flows into the bottom of the motor and is discharged through an air tube on the side of the motor.

THRU-FLOW DISCHARGE

Air flows into the bottom of the motor and is discharged through the top of the motor to provide cooling.

AMETEK LAMB ELECTRIC | Dayton

Vacuum Motors

- Enclosure: open
- Thermal protection: None, except where noted
- Mounting: all-position
- Bearings: ball, permanently lubricated
- Max. ambient temp.: 40°C
- Duty: intermittent
- Avg. brush life (Ametek only): 4.3" and 5.7" dia., 500 hr.; 7.2" dia., 700 hr.; 7.5" dia., 1000 hr.

For use in moving clean and dry air. Motor should not come into contact with foam, liquids, or moisture-laden air. Use with applications that protect the motor's electrical components, fan system, and housing. Units with air-sealed bearings provide added protection against dirt and moisture. Units with thermoset mounting brackets are for light-duty applications. For use in commercial canister or utility vacuums, sprayer/foggers, material handling and transfer systems, and car wash and central vacuum systems. Ametek® motors are UL Recognized and CSA Certified, except No. 4M941 is UL Recognized only. Dayton® motors are UL and C-UL Recognized.

Note: Additional sizes available on Grainger.com®.

5.7"-Dia. Tangential Bypass Brushless Blowers

Northland Motor Technologies

- Enclosure: open
- Thermal protection: auto
- Mounting: tab, all-position
- Bearings: ball
- Max. ambient temp.: 50°C

No. 1MCG5

Adjustable, built-in speed control makes a secondary pressure control device unnecessary. An external hose is easily attached to the exhaust tube. Included wiring harness allows hard-wiring to external power. Manually controlled units have easily-adjusted built-in trim-pot. Electronically controlled models require a remote 0 to 10VDC reference signal (not included). For use in business machines, computer peripherals, material handling, air samplers/evacuators, packaging systems, photographic medical equipment, and air beds.

Shaded Pole C-Frame Motors

Dayton

- No. of speeds: all motors are 1-speed except for No. 4M075 is 2-speed
- Enclosure: open air-over
- Service factor: 1.0
- Insulation: Class B
- Mounting: all-angle
- Max. ambient temp.: 40°C

For use in small fans and blowers found in bathroom ventilators, range hoods, electric heaters, hair dryers, slide projectors, air cleaners, humidifiers, and refrigeration equipment. UL Recognized and CSA Certified.

Note: This product is NOT SUITABLE for any unattended equipment (including built-in bathroom exhaust fans), unless the listed Thermal Protection is 1 Shot.

Stud/Hole Mount
- Mounting: two #8-32 studs at shaft end, and mounting holes on each side of the stator, 1⅞" OC

Stud Mount
- Mounting: two #8-32 studs on 1⅞" OC
- OEM replacement with 2-prong plug

Hole Mount
- Mounting: two #6-32 threaded holes on 1⅞" centers
- OEM replacement with OEM plug
- Dual shaft

Shaded Pole Unit Bearing Motors

Dayton

- Enclosure: totally enclosed air-over
- 60/50 Hz
- Service factor: 1.0
- Insulation: Class A
- Mounting: horizontal or vertical shaft up

Use with commercial and industrial HVAC and refrigeration equipment, and other applications with 6" to 12" fan blades. Motors have oil circulation system to help extend the life of motor and bearings, and allow for vertical application.

Kryo™ SSC ECM Unit Bearing Motors

morrillmotors

- Enclosure: totally enclosed air-over
- Rotation: CWLE
- Thermal protection: electronic
- 60 Hz
- Service factor: 1.0
- Insulation: Class B
- Mounting: rear/foot
- 1/4"-20 threaded shaft
- Plug type: round 2-pin

For use in commercial refrigeration evaporator fan applications and in most applications requiring high efficiency and output ratings between 4 and 25W. Aluminum housing. UL Recognized and IP65 compliant.

Shaded Pole Unit Bearing Motors

SUPPLIER DIVERSITY EM&S

- Service factor: 1.0
- Mounting: rear/double foot
- Max. ambient temp.: 40°C
- Duty: continuous
- Shaft orientation: horizontal or up
- Plug type: round 2-pin
- Original OEM replacement motor

Feature precision-machined housing with positive-flow lubrication and a preoiled felt wick for extended use with no reoiling. #8 mounting holes, 2 13/16" OC. ¼-20 threaded shafts, except Nos. 4M159 and 4M160 have ⅜" dia. with flat. No. 2MY41 has 5/16" dia., and motor leads and shaft exit the same side of housing. For use in commercial and industrial HVAC and refrigeration equipment, and other applications with 6" to 12" fan blades. All motors are UL Recognized and CSA Certified, except Nos. 5YJN8 and 5YJN9 are UL and C-UL Recognized only.

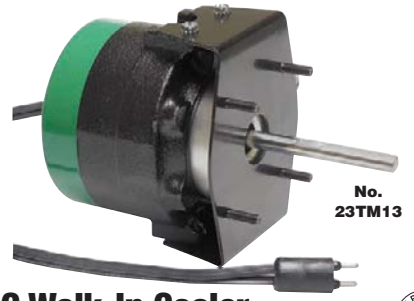
Arktic 59® Series 3.3" ECM Direct-Drive Blower Motors



morrillmotors®

- Enclosure: totally enclosed air-over
- Thermal protection: electronic
- Insulation: Class B
- Mounting: stud
- Bearings: ball
- Max. ambient temp.: 40°C
- Shaft orientation: all-angle
- Plug type: round 2-pin

Feature higher efficiency than standard induction motors for greater energy savings. Can maintain the rated rpm (±6%) independent of static pressure for better air distribution through the refrigeration area. Can be used for replacing shaded pole, PSC, and ECM motors. Suitable for evaporator fan motors used in beverage merchandisers, display cases, freezers, ice machines, vending machines, and walk-in coolers. UL Recognized.

3.3" EC Walk-In Cooler Evaporator Motors

- Enclosure: totally enclosed air-over
- Thermal protection: auto
- Insulation: Class B
- Mounting: stud
- Bearings: unit
- Max. ambient temp.: 40°C
- Shaft orientation: horizontal or vertical shaft down
- Plug type: round 2-pin

Nos. 23TM13 and 23TM14 are counter clockwise lead end and No. 23TM16 is clockwise lead end, featuring higher efficiency than standard induction motors for greater energy savings. Can maintain the rated rpm (±6%) independent of static pressure for better air distribution through the refrigeration area. Motors can be used for replacing shaded pole, PSC, and ECM motors. Suitable for condenser and evaporator fan motors used in display cases, ice machines, beverage merchandisers, vending machines, walk-in coolers, and freezers. UL and C-UL Recognized.

3.3"-Dia. PSC Motors

- Thermal protection: auto
- Service factor: 1.0
- Insulation: Class B
- Mounting: stud
- Bearings: ball
- Max. ambient temp.: 40°C
- Duty: continuous

Deliver higher performance, efficiency, and starting torque than standard 3.3" shaded pole motors. Quick-reversing plug. Studs on both endshields and longer shaft for replacing many OEM motors from Chandler, Climate Control, Heatcraft, Larkin, and others. UL Recognized and CSA Certified.

3-in-1™ HP 3.3"-Dia. PSC Motor

FASCO AC MOTORS & BLOWERS

- Enclosure: open air-over
- Thermal protection: auto
- 60/50 Hz
- Service factor: 1.0
- Insulation: Class B
- Mounting: stud
- Bearings: ball
- Max. ambient temp.: 40°C
- Duty: continuous

Open air-over motor replaces 1/12, 1/15, and 1/20 HP PSC and low-efficient shaded pole motors. Quick-reversing plug. Studs on both endshields and longer shaft for replacing many OEM motors from Chandler, Climate Control, Heatcraft, Larkin, and others. UL Recognized and CSA Certified.

Dayton

3.3"-Dia. Shaded Pole Motors

- All motors are 1-speed except No. 3M549 is 2-speed
- Thermal protection: auto
- Service factor: 1.0
- Insulation: Class B
- Max. ambient temp.: 40°C
- Duty: continuous

For OEM and replacement use in air-over fan and blower applications such as bathroom fans and range hoods. Internal fan on the totally-enclosed fan-cooled motors makes these motors suitable for mechanical-duty applications such as pumps, diaphragm compressors, laboratory equipment, and business machines. All-steel construction. UL Recognized and CSA Certified.

FASCO AC MOTORS & BLOWERS

3.3"-Dia. 1-Phase Motors

- Thermal protection: all auto except for No. 38N527
- Service factor: 1.0
- Max. ambient temp.: 40°C
- Duty: continuous

Suitable for air-moving or mechanical applications, including fans, air conditioners, heaters, pumps, and compressors. PSC motors include capacitor. Stud base pattern is 2⅞" x 2⅞", except No. 38N540 is 3⅞" x 3⅞". UL Recognized and CSA Certified, except Nos. 32NA47, 38N515, 38N516, 38N528, 38N535, 38N538, 38N552, are UL Recognized only.

4.4"-Dia. Shaded Pole Fan Motors

- Thermal protection: auto
- Service factor: 1.0
- Insulation: Class B
- Bearings: sleeve, except No. 4M222 has ball
- No. 4M222 body dia. is 5"
- Max. ambient temp.: 40°C
- Duty: continuous

Motor shell is sturdy steel construction with an open lamination design. Can be used as new or replacement motors in a wide range of small fan and blower applications. UL Recognized and CSA Certified.

4.4"-Dia. Energy Efficient PSC Fan Motors

- Rotation: CW/CCW
- Thermal protection: auto
- Service factor: 1.0
- Insulation: Class B
- Mounting: stud
- Bearings: ball
- Max. ambient temp.: 40°C
- Duty: continuous
- Capacitor included

Compact, single-speed PSC motors run at a higher power factor, with a lower starting current draw and lower running current draw than larger shaded pole motors. Also provide higher starting torque and smoother, quieter operation. UL Recognized and CSA Certified.

Attic Ventilator Replacement Motors

- Enclosure: open air-over
- Thermal protection: 1 shot
- Mounting: stud
- Body dia.: 5"
- Shaded pole-type

Single-speed motors feature stud mounting for many common installations. Suitable as a replacement for many residential attic fan ventilators including Broan®. UL Recognized, CSA Certified.

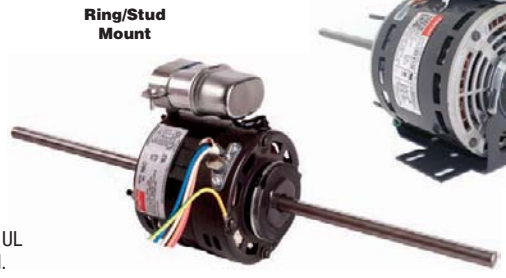
Dayton Century®

Shaded Pole Room Air Conditioner Motors

- Enclosure: open air-over
- Thermal protection: auto
- Service factor: 1.0
- Bearings: sleeve
- Max. ambient temp.: 40°C
- Duty: continuous



For room air conditioners, evaporative coolers, remote fan coil units, and other shaft-mounted fan and blower applications. UL Recognized and CSA Certified.

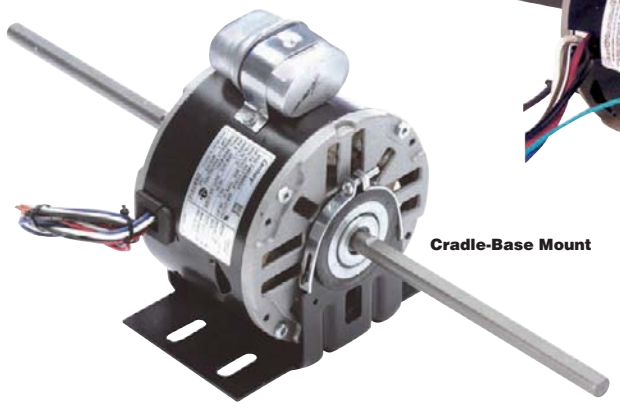
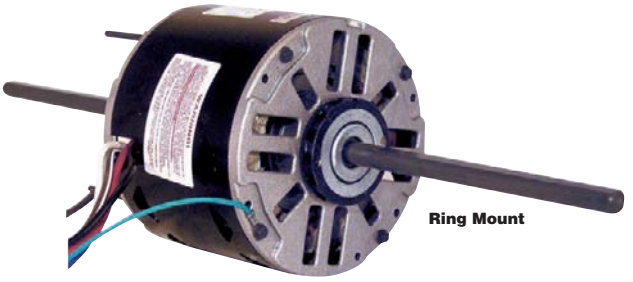
Permanent Split Capacitor Room Air Conditioner Motors





- Enclosure: open air-over
- Rotation: CW/CCW
- Thermal protection: auto
- Service factor: 1.0
- Bearings: sleeve
- Duty: continuous
- Capacitor included

For heating/air conditioning, fan coil units, furnace blowers, unit heaters, and other shaft-mounted fan and blower applications. Feature quick-change reversing plug. UL Recognized and CSA Certified.

IMPORTANT MOTOR INFORMATION | Refer to pages 3-7 for selection guidelines, standardized dimensions, thermal protection information, UL 507 Standard location information, NEMA & IEC guidelines, energy legislation information, and terminology.

Cradle-Base Mount

Ring Mount

Permanent Split Capacitor Room Air Conditioner Motors

- Enclosure: open air-over, except Nos. 4UB91, 4MB92, and 4MA83 are open dripproof
- Thermal protection: auto
- Service factor: 1.0
- Bearings: sleeve, except No. 4MA83 is ball and No. 4MB88 is ball/sleeve
- Duty: continuous

For room air conditioners, evaporative coolers, remote fan coil units, and other shaft-mounted fan and blower applications. UL Recognized and CSA Certified.

Shaded Pole Direct-Drive Blower/Fan Motors

- 42Y frame (5" body dia.)
- Enclosure: open air-over, except No. 4UU91 is totally enclosed air-over
- Thermal protection: auto
- Service factor: 1.0
- Bearings: sleeve
- Max. ambient temp.: 40°C
- Duty: continuous air-over

These motors are suitable for unit heaters, condensers, furnace blowers, air circulators, fans, and a wide range of other shaft-mounted fan and blower equipment. No. 4UU91 has a 5.0 cu.-in. junction box. Nos. 4KA23, 4KA20, and 4KA22 are used in Coleman furnaces. No. 4KA49 has a 2½" ring dia. and is for Lear-Siegler furnaces. All models are UL Recognized and CSA Certified.

ECM Fan Coil Motor

- Speeds: 3
- 42 frame (5" body dia.)
- Enclosure: open air-over
- Thermal protection: auto
- Mounting: cradle base
- Bearings: ball
- Max. ambient temp.: 40°C
- Duty: continuous

For use in air conditioners, fan coil units, and blower applications. UL Recognized.

MasterFit® Pro Direct-Drive Blower Motors

- Speeds: 4
- NEMA frame: 48Y (5¾" body dia.)
- Enclosure: open
- Rotation: CW/CCW
- Thermal protection: auto
- Service factor: 1.0
- Insulation: Class B
- Mounting: ring/stud/band/hole
- Duty: continuous
- Shaft orientation: horizontal
- Capacitor included

Replace Emerson, Fasco, Genteq, Marathon and Protech fan and blower motors in residential and light commercial HVAC systems. Motors have predrilled holes for Rheem mounting. Include capacitor and reversing plug. UL Recognized and CSA Certified.

Multi-HP Permanent Split Capacitor Direct-Drive/Fan Multi-Speed Motors

- Speeds: 4
- NEMA frame: 48YZ (5⅝" body dia.)
- Enclosure: open air-over
- Rotation: CW/CCW
- Thermal protection: auto
- Service factor: 1.0
- Insulation: Class B
- Mounting: ring/stud/band
- Duty: continuous
- Shaft orientation: all-angle
- Refer to the Motor Nameplate for correct capacitor value

Energy-efficient motors operate at multiple horsepowers, reducing inventory needs and expense. Feature quick-change reversing plug. UL Recognized and CSA Certified.

ECM Evergreen® EM Direct Drive Blower Motors

- Speeds: 5
- NEMA frame: 48 (5¾" body dia.)
- Enclosure: open
- Rotation: CW/CCW
- Thermal protection: electronic
- Service factor: 1.0
- Insulation: Class B
- Mounting: band
- Duty: continuous
- Shaft orientation: horizontal
- Replacement for X–13 ECM motors

Replace direct-drive blower motors in residential and light commercial indoor furnaces, air handlers, and package systems that were designed with a standard ECM motor. Maintain ECM-level efficiency up to 80%. Features Soft Start and Off Ramp for quiet operation. UL and CSA recognized.

ECM Evergreen® CM Brushless DC Motors

- Speeds: 5
- NEMA frame: 48 (5⅔" body dia.)
- Enclosure: open air-over
- Rotation: CCW
- Thermal protection: electronic
- Service factor: 1.0
- Insulation: Class B
- Mounting: band
- Duty: continuous
- Shaft orientation: horizontal
- Replacement for X–13 ECM motors

More energy efficient than most PSC motors, and can be used in indoor furnace and air handler applications. Compatible with most building automation systems. UL Recognized and CSA Certified.

IMPORTANT MOTOR INFORMATION | Refer to pages 3-7 for selection guidelines, standardized dimensions, thermal protection information, UL 507 Standard location information, NEMA & IEC guidelines, energy legislation information, and terminology.

PSC Direct-Drive Blower/Fan Motors

- Enclosure: open air-over
- Rotation: CW/CCW
- Thermal protection: auto
- Service factor: 1.0
- Insulation: Class B
- Mounting: ring/stud/band
- Bearings: sleeve, except No. 3LU87, 3LU89, and 3LU90 are ball
- Body dia.: 5⅝"
- Duty: continuous
- Ring dia.: 2¼"
- Stud pattern: 3⅜" x 3⅜"

Motors have quick-reversing leads. Energy-efficient models feature a typical energy savings of 10% over standard-efficiency motors. Dayton® motors include split ring adapter. Capacitor mounting hardware sold separately on Grainger.com®. Motors are UL Recognized and CSA Certified.

Century® Dayton®

PSC Stud- and Cradle-Mount Condenser Fan Motors

- Rotation: CW/CCW
- Thermal protection: auto
- Service factor: 1.0
- Insulation: Class B
- Body dia.: 48 frame, 5⅝"; 56 frame, 6½"
- Max. ambient temp.: 60°C
- Duty: continuous
- Stud pattern: 3⅝" x 3⅝", except No. 4MB79 is 4⅛" x 4⅛"

Commercial-duty motors feature higher starting torque, cooler running temperature, and reversing plug. Open air-over motors have totally enclosed shaft endshield and shell (except 460V motors). Opposite endshield is open. Shaft up/down motors have both endshields totally enclosed with removable drain plugs. Can be mounted vertically or horizontally. Shafts are double flat (90° apart). Dayton® motors feature slinger on shaft. All models are suitable for outdoor air conditioner condensers and refrigeration condensers. Two-speed models can be used on heat pumps. All motors are UL Recognized and CSA Certified.

Dayton®

½"- and ⅝"-Dia. Anti-Windmilling Brakes

Use to stop windmilling of rooftop motors.

For Use With	Item No.
Motors Having ½"-dia. Shafts	**4UEZ3**
Motors Having ⅝"-dia. Shafts	**4UEZ4**

Dayton®

Motor Rainshields

Disc-shaped rainshields prevent water from damaging open motors that are mounted either shaft-up or shaft-down in outdoor condenser units. Heavy-duty nylon construction resists heat and ultraviolet rays. No. 4UEZ6 has a deep dish for added protection. Nos. 4M219 and 4M220 have internal cooling vanes to reduce motor temperature, and a removable center plug.

MultiFit® Multi-Mount and Multi-HP PSC Condenser Fan Motors

- NEMA frame: 42 (5" body dia.)
- Enclosure: totally enclosed air-over
- Thermal protection: auto
- Service factor: 1.0
- Insulation: Class B
- Mounting: stud/band/hole
- Bearings: ball
- Max. ambient temp.: 60°C
- Duty: continuous

Motors replace 4.33", 4.42", and 4.62" mounting bolt circle without having to change capacitors or follow complicated wiring diagrams. Energy-efficient PSC design with high-efficiency rating ensures performance in elevated temperatures. UL Recognized and CSA Certified.

Multi-HP PSC 2-Speed Condenser Fan Motors

- NEMA frame: 48YZ (5 5/8" body dia.)
- Enclosure: totally enclosed air-over
- Rotation: CW/CCW
- Thermal protection: auto
- Service factor: 1.0
- Insulation: Class B
- Mounting: stud
- Rheem mounting holes (screws included)
- Bearings: ball
- Max. ambient temp.: 70°C
- Duty: continuous

Multiple-horsepower design eliminates the need to select speed or change capacitor size during installation. Totally enclosed construction allows all-angle mounting. Energy-efficient PSC design with high-efficiency rating ensures performance in elevated temperatures. Feature quick-change reversing plug. UL Recognized and CSA Certified.

HeatMaster® PSC High-Ambient Condenser Fan Motors

Find Dual-Run Capacitors on page 66.

- No. of speeds: 1
- Frame: 48Y (5⅝" body dia.)
- Enclosure: totally enclosed air-over
- Thermal protection: auto
- Service factor: 1.0
- Insulation: Class F
- Rheem mounting holes (screws included)
- Bearings: ball
- Max. ambient temp.: 70°C
- Duty: continuous

PSC motors are insulated and designed for trouble-free operation at full rated load at high temperature. Rotor cores have corrosion-resistant coating to ensure long motor life. Easy-to-remove drain plugs in each end shield and have 36" color-coded, high-temp. leads. For outdoor air conditioning and refrigeration condensing units and heat pumps. UL Recognized and CSA Certified.

HeatMaster® PSC Ultra Condenser Fan Motors

- No. of speeds: 1
- Frame: 48 (5¹¹⁄₁₆" body dia.)
- Enclosure: totally enclosed air-over
- Thermal protection: auto
- Service factor: 1.0
- Insulation: Class F
- Rheem mounting holes (screws included)
- Bearings: ball
- Max. ambient temp.: 80°C
- Duty: continuous

Insulated PSC motors are designed for trouble-free operation and feature a double flat shaft. Also feature ultra-high temperature synthetic bearing grease in double-sealed ball bearings to help the bearings stand up to the most severe conditions. Rotor cores have corrosion-resistant coating to ensure long motor life. Include water-resistant reversing plug and 48" high-temp. leads. Speed Engineered® for speed control duty. For use with outdoor air conditioning and refrigeration condensing units and heat pumps.

PSC Stud- and Cradle-Mount Condenser Fan Motors

- NEMA frame: 56Y (6½" body dia.), 48Y (5⅝" body dia.)
- Rotation: CW/CCW
- Thermal protection: auto
- Service factor: 1.0
- Insulation: Class B
- Mounting position: vertical shaft up, except Nos. 4MA46 and 4MA48 are all-angle position
- Bearings: ball
- Shaft: ½" dia. have double flat; ⅝" dia. have flat and keyway

Multipurpose mounting in cradle, band, or by thru-bolt extensions. For 5-ton and larger commercial outdoor condensers. Also used for commercial and industrial coolers, and other shaft-mounted fan and blower equipment. UL Recognized and CSA Certified.

No. 4MA37

Century®

HeatMaster® Permanent Split Capacitor OEM Fan Canopy Condenser Fan Motors

- Speeds: 1
- Frame: 48Y (5⅝" body dia.)
- Enclosure: open air-over
- Rotation: CW/CCW
- Thermal protection: auto
- Service factor: 1.0
- Insulation: Class F
- Mounting: band
- Mounting position: vertical shaft up
- Bearings: ball
- Max. ambient temp.: 70°C
- Duty: continuous

Motors provide a high-ambient alternative to OEM motors in many commercial condenser fan applications. The energy-efficient design comes with an ultrahigh torque to ensure performance in elevated temperatures. High-efficiency rating helps to increase motor life. Reversible design and supports application flexibility. UL Recognized and CSA Certified.

JuggerNaut® 3-Phase High-Ambient Condenser Fan Motors

Century®

- NEMA frame: 56HZ (6½" body dia.)
- Enclosure: open air-over
- Thermal protection: auto
- Service factor: 1.0
- Insulation: Class F
- Inverter rated
- Mounting: base/stud/band
- Mounting position: horizontal or vertical shaft up
- Bearings: ball
- Max. ambient temp.: 70°C
- Duty: continuous
- Stud pattern: 4⅛" x 4⅛"

Replace OEM motors in commercial condenser fan applications. Energy-efficient design ensures performance in elevated temperatures. 56H rigid base is easy to remove for mounting flexibility (except Nos. 426J46 and 490T58 do not have a removable base). Feature an innovative VCM™ (voltage change module) to ease installation and a large water slinger to help protect bearings. 60/50 Hz. UL Recognized and CSA Certified.

No. 429J45

Dayton

Pedestal Fan Motors

- Thermal protection: auto
- Service factor: 1.0
- Max. ambient temp.: 40°C
- Duty: continuous air-over
- Stud pattern: 3⅝" x 3⅝"

Designed with integral yoke bracket, except No. 3M827 includes yoke strap. Studs allow fan guard to be mounted directly to shaft endshield. UL Recognized and CSA Certified.

WARNING: Motor overload could result if the fan blade is not correctly matched to the motor's HP and RPM rating.

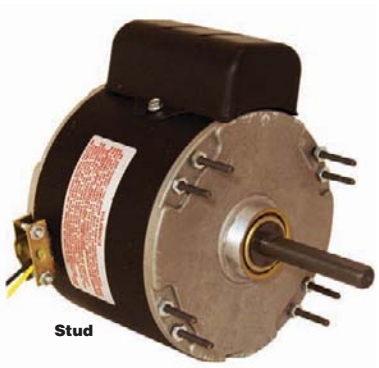
Century

Permanent Split Capacitor and 3-Phase Transformer Cooling Fan Motors



- Enclosure: totally enclosed air-over
- Rotation: CW/CCW
- Thermal protection: auto
- 60/50 Hz
- Service factor: 1.0 (No. 2WCE6); 1.5 (No. 4UY24)
- Insulation: Class B
- Bearings: ball
- Max. ambient temp.: 65°C
- Duty: continuous
- Shaft orientation: all-angle
- Stud pattern: 3⅝" x 3⅝" (PSC); 4⅛" x 4⅛" (3-Phase)"

Specifically designed for use on outdoor transformer cooling fans. High-efficiency motors with stainless steel shaft. UL Recognized and CSA Certified.

Permanent Split Capacitor Unit Heater Motors

Century®

- Enclosure: totally enclosed air-over
- Rotation: CW/CCW
- Thermal protection: auto
- Service factor: 1.0
- Duty: continuous

Use with unit heaters and other shaft-mounted fan and blower equipment in dusty, dirty, noncombustible environments. Cradle base models have 1" x 5/16" mounting slots in a 1 11/16" x 3 1/2" pattern. UL Recognized and CSA Certified.

Dayton

Draft Booster Motors

- Enclosure: open air-over
- Studs are 2.85" bolt center, #8-32 studs
- Bearings: ball
- Body dia.: 3.3"
- Max. ambient temp.: 40°C
- Duty: continuous
- Centrifugal safety switch

Motors are required for most gas furnaces and help improve energy efficiency. Auxiliary contacts of SPST centrifugal safety switch are included and rated 120VA pilot duty. No. 1D089 also has 3 holes on 4.36" bolt circle. All models are UL Recognized and CSA Certified.

Split-Phase Open Dripproof Belt-Drive Face-Mount Motors

Dayton® Century®

- Rotation: CW/CCW
- Insulation: Class B
- Bearings: ball
- Max. ambient temp.: 40°C

NEMA service factors up to 1.40 provide a reserve margin for applications where intermittent overloading or fluctuating (high/low) voltage conditions may occur. Provide direct replacement in many Jenn-Air® and similar commercial kitchen exhaust ventilators. Motors are compatible with 2-speed 115V switch No. 1DGZ9 sold on Grainger.com®. For use in exhaust ventilators in commercial cooking areas and other moderate-starting torque equipment that can be directly connected to a NEMA 56CZ face-mounted motor. UL Recognized and CSA Certified.

Note: Not intended for power transmission applications.

No. 6XH49

Split-Phase Open Dripproof Belt-Drive Motors

- Rotation: CW/CCW
- Thermal protection: auto, except No. 4RGX1 has no thermal protection
- Insulation: Class B, except Nos. 6K857, 3K617, and 4K259 are Class F
- Max. ambient temp.: 40°C

⅝"-dia. shaft bushing is supplied with all Dayton® motors having ½" x 1½" shafts, and with all A.O. Smith 56Z frame motors. Nos. 3K384 and 3K386 are for attic fans and feature wiring connections on shaft end. Century adjustable ring-mount motors have 2¼"-dia. resilient rings, and come with snap rings to increase diameter to 2½". For use in fans, blowers, whole-house fans, air circulators, and air coolers where a quiet running motor is required. UL Recognized and CSA Certified.

2-SPEED

Dayton® motors have quick-connect terminal board.

Century®

Split-Phase Air-Over Belt-Drive Motors

- Rotation: CW/CCW, except No. 2HUB3 is CWLE
- Insulation: Class B
- Body dia.: 48 frame, 5⅝"; 56 frame, 6½"
- Max. ambient temp.: 40°C
- Duty: continuous

Cradle-Base Mount

Rigid-Base Mount

Energy-efficient motors feature extended studs for mounting fan guard on shaft endshield. No. 2HUB3 is a replacement for OEM motors used in Triangle belt-drive exhaust fans. For use in exhaust fans, air circulators, and other air-over fan applications. Open motors are for use in clean, dry, nonhazardous locations. Enclosed motors are for use in dusty, dirty, nonhazardous locations. UL Recognized and CSA Certified.

2-SPEED

Designed specifically for diminishing torque air-moving applications, such as belted or direct-drive fans.

**** Includes ⅝" shaft adapter/key. † Cradle base has 48/56 mounting holes. ‡ Usable on 208V at 1.0 service factor.***

High-Temperature Belt-Drive Motors

Dayton®

- Enclosure: open dripproof
- Rotation: CW/CCW
- Thermal protection: auto
- Insulation: Class B
- Mounting: cradle/stud
- Bearings: ball
- Max. ambient temp.: 60°C

For use in roof ventilators. Single-speed, 1-phase, continuous-duty with quick-connect terminals. 48Y frames are notched to replace 48 or 56 frame. Steel frame. No. 4VAG8 is capacitor start, capacitor run. UL Recognized and CSA Certified.

No. 4VAF9

IMPORTANT MOTOR INFORMATION | Refer to pages 3-7 for selection guidelines, standardized dimensions, thermal protection information, UL 507 Standard location information, NEMA & IEC guidelines, energy legislation information, and terminology.

Open Dripproof Capacitor-Start Belt-Drive Motors

- Rotation: CW/CCW
- Thermal protection: auto
- Cradle bases
- Max. ambient temp.: 40°C

For use with belt-drive applications, including furnace blowers, exhaust fans, industrial blowers, and ventilators. 2-speed motors are for use in diminishing-torque air-moving applications such as belt- or direct-drive fans and blowers.

Nos. 4UB57 and 4UB98 include ⅝"-key shaft adapter. No. 4UB57 is notched for 48 or 56 NEMA frame mount. UL Recognized and CSA Certified.

3-Phase Belt-Drive Motors

- Rotation: CW/CCW
- Insulation: Class B, except No. 10K089 is Class F
- Bearings: ball
- Max. ambient temp.: 40°C

Use with pumps, industrial fans, blowers, and exhaust fans. UL Recognized and CSA Certified.

Motor Start Capacitors

- 60/50 Hz
- Temp. range: -40° to 65°C (-40° to 149°F)

Electrolytic, nonpolarized capacitors are designed for normal intermittent service on single-phase AC motor starting circuits. Round, molded cases protect the capacitor from oil, dirt, moisture, and grease. Round shape. 60/50 Hz. UL Recognized.

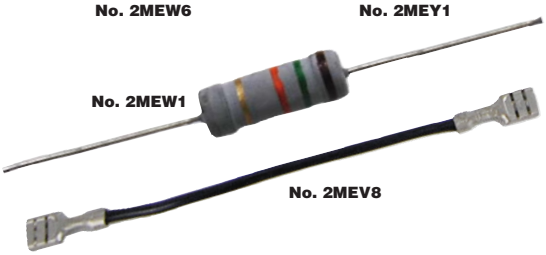
Motor Start Capacitor Accessories

Mounting Brackets—Use in conjunction with end caps to provide secure and electrically safe mounting.

End Caps—Provide weatherproofing for lead connections and facilitate mounting capacitor in bracket. With bottom lead hole, leads exit through bracket; with top lead hole, leads exit opposite bracket.



Resistors—Bleed off electrical charge when soldered across capacitor terminals. Prevent contact-point arcing and welding under rapid cycling.

Jumper Wire Sets—Connect 2 capacitors in series or parallel.

Motor Run Capacitors

Dayton

- Temp. range: -40° to 85°C (-40° to 185°F)
- 60/50 Hz

Aluminum, hermetically sealed capacitors improve the electrical performance of motors, air conditioners, and refrigeration equipment. PCB-free, the capacitors feature an aluminum case with steel cover and ¼" male quick-connect terminals with plastic insulators. Protected to 10,000 AFC. UL Recognized.

Motor Run Capacitors

Dayton

- Temp. range: -40° to 85°C (-40° to 185°F)
- 60/50 Hz

Feature ABS case constructed with self-healing dielectric metalized polypropylene film, with ¼" blade, quick-connect terminals, and metal tab mounting bracket. For use in blower, fan, and pump motors. Rectangular shape. C-UL Recognized.

Dayton

Motor Run Capacitor Terminal Guard

Plastic guard weatherproofs capacitor connections for long service life. Fits oval cans 2"W x 1 1/4"D. Includes sheet metal mounting screws.

Item No.
2MEU9

Dayton

Motor Run Capacitor Mounting Kit

Fits oval cans 2"W x 1 1/4"D. Includes metal bracket, rubber boot, and hardware to mount capacitor and protect wire connections.

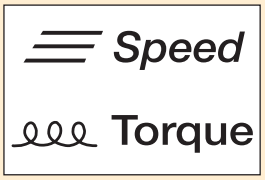
Item No.
2MEV1

Selecting a Gearmotor

A gearmotor is an electro/mechanical device using an electric motor to drive a geartrain encased in a housing. The geartrain reduces output speed while increasing available torque. Gearmotors move an object in a given direction at a rate of speed (RPM), and provide the required twisting force (torque). Select your model once load input performance requirements are identified. You must know the speed and torque requirements of the load to be driven. Unusual loads or harsh environments need to be considered before selecting a driving device. Horsepower (HP) is not a factor in selecting a standard gearmotor, since each model is designed for a specific performance level.

Parallel-Shaft have helical and spur gears. First stage gears are phenolic, nylon, or steel and typically helical for low noise. Subsequent gears are usually metallic (sintered or hardened cut steel) depending on the performance level of the gearmotor. Parallel-shaft models offer high efficiency in compact sizes.

Right-Angle include mainly worm-type gears of precision-machined steel. Worm wheel is often bronze, but may be phenolic or cast iron. These gearmotors can be heavier construction, handle higher shock loads, and run quieter than comparably-sized parallel-shaft designs, but often less efficiently.



No. 4ZJ45

Mechanical Considerations

Speed. How fast should equipment or an object move? Output speeds are available from less than 1/2 rpm (revolution per minute) to nearly 350 rpm, depending on motor type and gear ratio. Based on your application, you may need to consider whether additional modified speeds will be produced through sheaves or sprocket type drive systems before determining gearmotor output speed.

Starting Torque provides initial power to get things moving. On large conveyers, starting torque requirement may be high while a small rotating display cabinet may require very little torque to overcome resistance. Small gearmotors typically have "start" and "run" torque specifications shown due to their lower overall output capabilities. Starting torque ratings can be lower than maximum running torque ratings. Heavier duty gearmotors are usually only rated for their full-load (running) torque capability since starting torque is relatively high.

Running Torque (Full Load) is the continuous twisting force to keep things moving after initial start and must maintain power under all variable load situations to provide adequate service. Running torque listed in the catalog is the maximum torque available for safe, continuous operation. Frequent starts and stops will require use of starting torque more frequently. This could result in excessive heat build-up, causing premature motor failure.

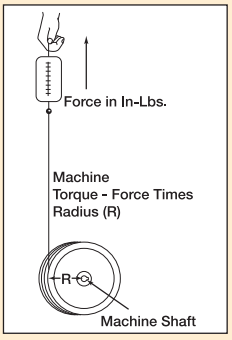
How To Measure Torque



Caution: Disconnect Power Before Proceeding

Torque required to drive a machine may be measured by using a flat grooved pulley, a cord and a spring scale rated in lbs. Pulley must be rigidly attached to machine's drive shaft, with cord wrapped several times around pulley. Do not allow cord to overlap. The other end is tied to the scale. When the scale is pulled, it will turn the pulley. When the pulley first starts to turn, the scale will register starting force required in pounds.

Force registered on scale, in pounds, when multiplied by radius of pulley (radius is measured from the center of machine shaft to center of cord), in inches, yields the starting torque, in in.-lbs. required by machine.

If torque characteristics of the machine (load) vary during its operating cycle, torque must be determined at the point in the cycle where it is the greatest.

If pulley can be turned (by pulling on cord) at a rate equal to normal speed of driven equipment, an indication of running torque can be obtained. If load of machine is almost entirely due to friction, running requirement will be essentially the same regardless of speed. However, if load is primarily the result of inertia or windage (air drag), characteristics of the inertia or windage elements must be known.

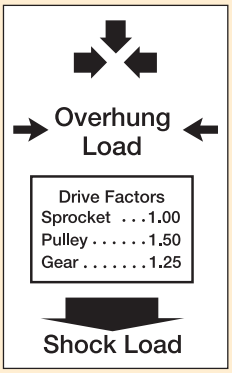
Electrical Considerations

Before you can select the best gearmotor for your application, you need to identify your intended power supply. AC and DC input gearmotors from 12VDC to 460VAC are available. This chart provides typical characteristics of different motor types as a guide for your selection.

Type	Starting Torque	Reversible	Speed Controllable	Features
Shaded Pole	Low	No	No	Rugged, Relative Low Cost
PSC	Medium	Yes	No	Reversible, Quiet Operation
Split-Phase	Med/High	Yes	No	Fairly High Start Torque
Capacitor-Start	High	Yes	No	Heavy-Duty Start-Ups, Dual Voltage
3-Phase	High	Yes	No*	Simple, Reliable, High Start Power and Efficiency
DC	High	Yes	Yes†	Speed Controllable, High Start Torque
Universal AC/DC	High	Yes	Yes†	Speed Controllable, Relatively Low Cost, Simple Operation

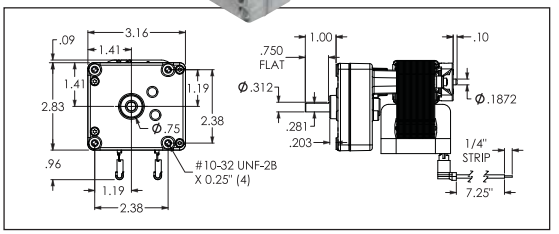
**** Inverter-Duty motors can be controlled with an inverter. † Performance matched speed controls are available for many catalog gearmotor listings.***

Loads



Driven items connected to and driven by the gearmotor output shaft constitute the load. Not all loads coupled to gearmotors have steady speed and torque requirements. Some loads demand power surges from the gearmotor during running cycle. This can be abusive to gears. Also, environmental conditions and space restrictions need to be taken into account. Two types of loads that require careful consideration before selecting a gearmotor are Overhung (Radial) Load and Shock Load.

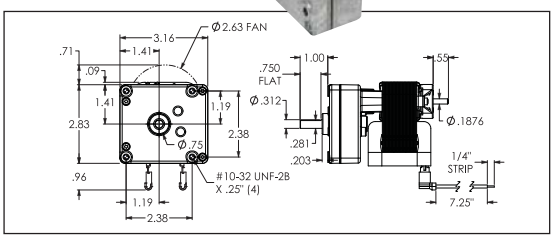
Overhung (Radial) Load (OHL) is the perpendicular force pushing against the side of an output shaft. This force is either from a weight hanging on the output shaft or from a sprocket, pulley or gear being used on the shaft. Every gearmotor has an OHL specification which should not be exceeded.



If you plan to use a sprocket, pulley, gear or any weight suspended directly on the shaft, calculate OHL to aid selection of the gearmotor. First, use the formula below to determine the pounds of load. Second, multiply pounds of load by the appropriate drive factor at right to determine actual OHL ratings in pounds on center of output shaft.

$$\frac{\text{Full-Load Torque (Requirement of Gearmotor)} \times 2}{\text{Pitch Dia. of Sprocket, Pulley or Gear}} = \text{Lbs. of Load}$$

Shock Load. Some applications subject gearmotors to loads that transmit shock or abrupt peak loads back to the gearmotor. Shock load can create peak loads several times greater than gearmotor torque rating. For example, when a heavy object accidentally is dropped on a running conveyor, this causes shock to gears and may even break them. Be sure the gearmotor is rated high enough to handle maximum anticipated shock load conditions.



115VAC Shaded Pole Parallel-Shaft Gearmotors

- Enclosure: open
- Gearcase: die-cast zinc
- Lubrication: grease filled
- Gears: heat-treated cut steel and acetal
- Bearings: porous bronze sleeve on both case and motor
- Mounting: all-position
- 60 Hz
- Rotation: clockwise facing output shaft
- Thermal protection: impedance
- UL Recognized

115VAC Shaded Pole Parallel-Shaft Gearmotors

- Enclosure: open
- Gearcase: gasketed die-cast zinc with screws
- Lubrication: grease filled
- Gears: hardened steel and phenolic
- Bearings: roller on case; ball and porous bronze sleeve on motor
- Mounting: all-position
- 60/50 Hz
- Rotation: clockwise facing output shaft
- Thermal protection: auto
- Insulation: Class B
- UL Recognized and CSA Certified

Note: Ratings shown are at 60 Hz. Gearmotors are also operable at 50 Hz, with HP and rpm at 5/6 of the 60 Hz rating.

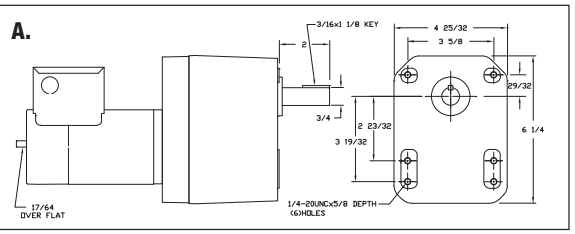
115/230VAC Permanent Split Capacitor Parallel-Shaft Gearmotors

A.

B.

C.



- Gearcase: die-cast aluminum
- Lubrication: permanent heavy gear oil
- Gears: hardened steel, AGMA Class 9
- Bearings: needle throughout with thrust ball on case and ball on motor
- Mounting: all position
- 60/50 Hz
- Rotation: reversible
- Thermal protection: none
- Ambient: 40°C
- Capacitor: included
- Brake: adaptable to No. 5X400 (**A.** and **B.** units)
- Motors **A.** and **B.** are UL and C-UL Recognized; Motors **C.** are UL Recognized and CSA Certified

Note: Ratings shown are at 60 Hz. Gearmotors are also operable at 50 Hz, with HP and rpm at 5/6 of the 60-Hz rating.

115/230VAC Permanent Split Capacitor Parallel-Shaft Gearmotors

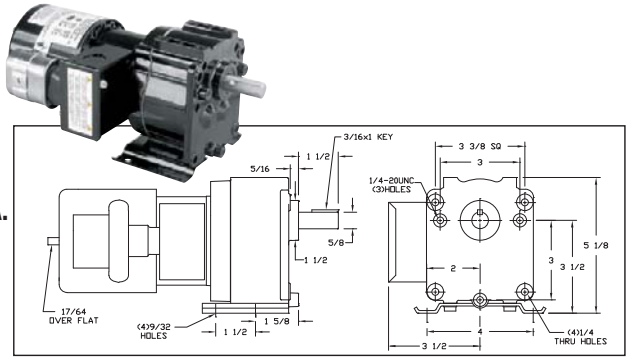
No. 1LPL3



- Enclosure: totally enclosed fan cooled
- Gearcase: die-cast zinc
- Lubrication: grease filled
- Gears: heat-treated steel/phenolic
- Bearings: porous bronze sleeve on case; ball on motor
- Mounting: all-position
- 60/50 Hz
- Rotation: reversible
- Thermal protection: none
- Ambient: 40°C
- Capacitor included
- Brake: adaptable to No. 5X400 using 1 disc in brake; see page 95
- UL and C-UL Recognized, and CE Certified

Note: Ratings shown are at 60 Hz. Gearmotors are also operable at 50 Hz, with HP and rpm at 5/6 of the 60 Hz rating.

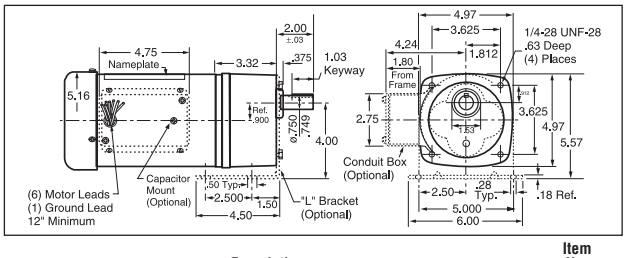
115/230VAC Permanent Split Capacitor and 230/460VAC 3-Phase Parallel-Shaft Gearmotors



- Gearcase: die-cast aluminum
- Lubrication: permanent heavy gear oil
- Gears: hardened, AGMA Class 9
- Bearings: motor has ball bearings; gearbox has needle bearings and thrust ball bearings throughout
- Oversized output bearings for greater overhung load capacity
- Mounting: all-position, except shaft up (optional bracket No. 6XF03 for base mounting)
- 60/50 Hz
- Rotation: reversible
- Thermal protection: none
- Ambient: 40°C
- 3/16" x 1" key
- UL Recognized and CSA Certified

Note: Ratings shown are at 60 Hz. Gearmotors are also operable at 50 Hz, with HP and rpm at 5/6 of the 60-Hz rating.

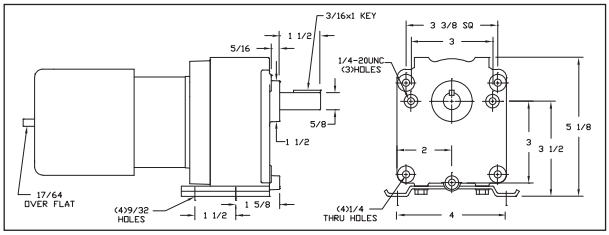
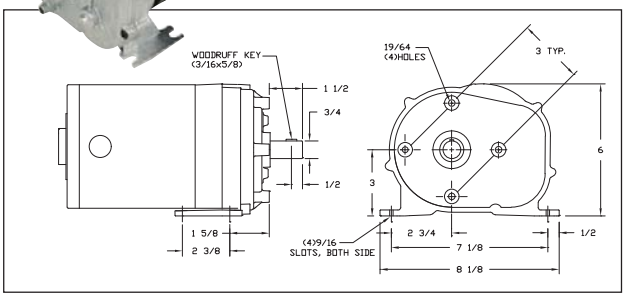
115VAC Shaded Pole and Split-Phase Parallel-Shaft Gearmotors



Dayton

- Enclosure: totally enclosed fan cooled
- Gearcase: die-cast aluminum
- Lubrication: permanent heavy gear oil
- Gears: hardened steel, AGMA Class 9
- Bearings: heavy-duty needle roller and thrust ball bearings on case; ball on motor
- Mounting: all-position
- 60 Hz
- Rotation: clockwise facing output shaft on shaded pole models; reversible on split-phase models
- Thermal protection: none
- Ambient: 40°C
- Brake: adaptable to No. 5X400. 1 brake disk required for all units, sold separately on page 95
- Shaded pole motors are UL Recognized; split-phase motors are UL and C-UL Recognized



No. 3M326

115VAC Split-Phase and 208-230/460VAC 3-Phase Parallel-Shaft Gearmotors

- Enclosure: totally enclosed fan-cooled
- Gearcase: die-cast aluminum
- Lubrication: permanent heavy gear oil
- Gears: hardened steel, AGMA Class 9
- Bearings: heavy-duty ball and needle roller, and thrust balls on case; ball on motor
- Mounting: all-position
- Rotation: reversible
- Thermal protection: none
- Ambient: 40°C
- Brake: for split-phase adaptable to No. 4Z447; for 3-phase adaptable to No. 2LYV2 (order separately, see page 95)
- UL Recognized and CSA Certified

230VAC Inverter-Duty 3-Phase Parallel-Shaft Gearmotors

- Enclosure: totally enclosed fan-cooled
- Gearcase: die-cast aluminum
- Operating range: 6 to 90 Hz
- Constant torque: 6 to 60 Hz
- Constant HP: 60 to 90 Hz
- No gear-limited ratios
- Lubrication: lifetime oil sealed
- Gears: hardened steel, AGMA Class 9
- Mounting: all-position
- 60/50 Hz
- Rotation: reversible
- Thermal protection: thermostat
- Ambient: 40°C
- UL Recognized and CSA Certified

Note: Ratings shown are at 60 Hz. Gearmotors are also operable at 50 Hz, with HP and rpm at 5/6 of the 60 Hz rating.

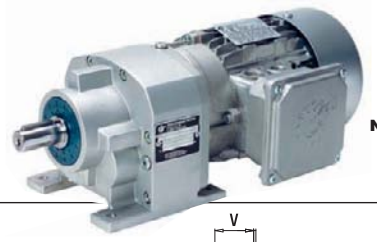
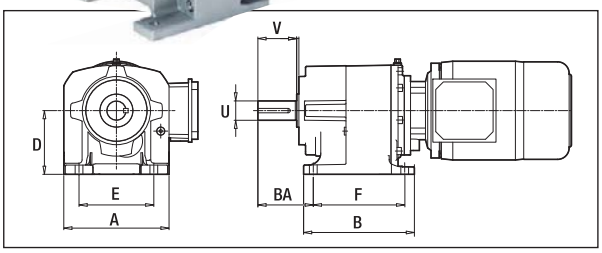
Unit has rear shaft extension.



230/460VAC Helical Inverter-Duty 3-Phase Inline Gearmotors

NORD DRIVESYSTEMS



- Enclosure: totally enclosed fan-cooled/IP55
- Washdown duty
- Lubrication: oil-filled
- 60/50 Hz
- Mounting: factory-filled with oil for horizontal foot mount, other mounting positions obtainable by field modifications
- Finish: cast-aluminum
- UL Recognized, CE and CSA Certified

NordBloc™ motors have 20:1 variable torque (VT) and 5:1 constant torque (CT). Unicase™ 1-pc. housing is dimensionally interchangeable with SEW Eurodrive.

Note: Ratings shown are at 60 Hz. Gearmotors are also operable at 50 Hz, with HP and rpm at 5/6 of the 60-Hz rating.

115VAC Permanent Split Capacitor Right-Angle Gearmotors

- Gearcase: zinc alloy
- Lubrication: TENV models grease-filled; TEFC models oil-filled
- Gears: TENV models hardened-steel worm, phenolic output gear; TEFC models hardened-steel worm, forged-bronze output gear
- Bearings: ball on case and motor
- Mounting: all-position except input motor shaft up
- 60/50 Hz
- Rotation: reversible
- Thermal protection: none
- Ambient: 40°C
- Brake: adaptable to No. 5X400 using 1 disc with 1/20-HP, 2 discs with 1/12- and 1/8-HP models; see page 95
- UL Recognized and CSA Certified

Note: Ratings shown are at 60 Hz. Gearmotors are also operable at 50 Hz, with HP and rpm at 5/6 of the 60 Hz rating.

- Rotation: reversible
- Thermal protection: none
- Ambient: 40°C
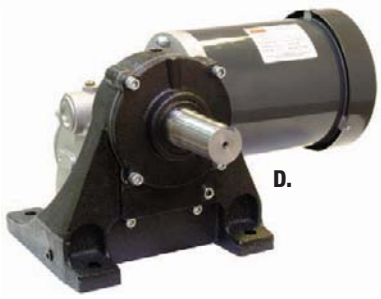
- Brake: adaptable to No. 5X400 using 1 disc; see page 95
- Overall depth 11⅝"
- Capacitor included
- UL and C-UL Recognized, and CE Certified



Note: Ratings shown are at 60 Hz. Gearmotors are also operable at 50 Hz, with HP and rpm at 5/6 of 60 Hz ratings.

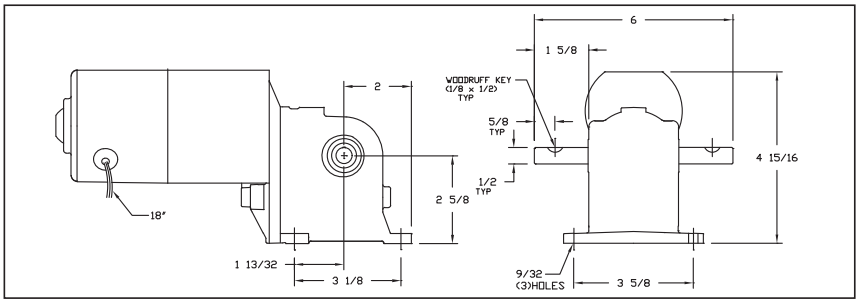
115VAC and 230VAC Hypoid Hollow-Shaft Right-Angle Gearmotors

PowerSTAR BISON



- Enclosure: TEFC
- Gearcase: die-cast aluminum
- Lubrication: extreme-pressure grease
- Gears: hardened steel; 1st stage hypoid AGMA Class 10, subsequent stages are helical AGMA Class 9
- 60 Hz for 115VAC; 6-90 Hz for 230VAC
- Bearings: ball
- Mounting: all-position
- Rotation: reversible
- Thermal protection: none
- Max. ambient: 40°C
- IP-54 rating
- UL and C-UL Recognized, and CE Certified

PowerSTAR™ design delivers higher torque at improved efficiencies for packaging and light- to medium-duty conveying applications. Lightweight aluminum shell keeps unit running cool, while ground gearing provides quiet, precise, low-backlash operation. Compact profile and mounting is dimensionally interchangeable with Brother F3 series and many European gearmotors. Flange version also available on Grainger.com®. For PowerSTAR accessories, see page 85.

90 and 180VDC Permanent-Magnet Parallel-Shaft Gearmotors

Dayton

- Enclosure: totally enclosed nonventilated
- Gearcase: die-cast aluminum
- Lubrication: permanent, heavy fluid gear oil
- Gears: hardened steel, AGMA Class 9
- Bearings: ball on motor, needle on gearbox, thrust balls throughout; oversize output bearings for greater overhung load capacity
- Mounting: all-position, except shaft up; for base mount, use optional mounting bracket No. 6XF03
- Rotation: reversible
- Brushes: externally replaceable
- Ambient: 40°C
- Seals: spring-loaded, heavy-duty industrial
- UL Recognized and CSA Certified

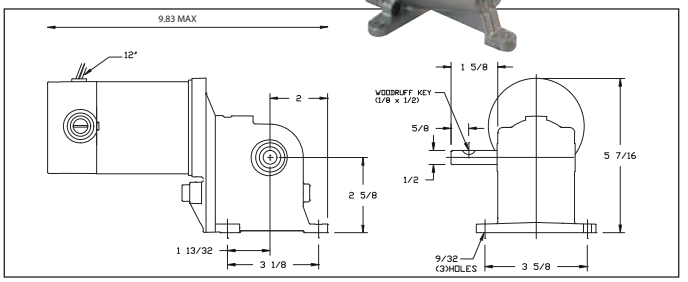
BISON PowerSTAR

90VDC Hypoid Hollow-Shaft Right-Angle Gearmotors



- Enclosure: totally enclosed nonventilated
- Gearcase: die-cast aluminum
- Lubrication: extreme pressure grease
- Gears: hardened steel hypoid
- Bearings: ball
- Mounting: all position
- Rotation: reversible
- Brushes: externally replaceable
- Max. ambient: 40°C
- UL and C-UL Recognized

PowerSTAR™ compact design delivers higher torque at improved efficiencies for packaging and light-to medium-duty conveying applications. Lightweight aluminum shell keeps unit running cool, while ground gearing provides quiet, precise, low backlash operation. 12 and 24VDC gearmotors are available on Grainger.com®

90VDC Permanent-Magnet Right-Angle Gearmotors

- Enclosure: totally enclosed nonventilated
- Gearcase: die-cast zinc
- Lubrication: grease packed
- Gears: input gear steel; worm hardened steel; output gear cast iron
- Bearings: bronze sleeve on case, ball on motor
- Mounting: all-position, base
- Rotation: reversible
- Brushes: externally replaceable
- Ambient: 40°C
- Seals: on output shaft
- Gear limited
- UL and C-UL Recognized
- Units are compatible with speed control No. 2PUX3, sold on page 85

90VDC Permanent-Magnet Hollow-Shaft Right-Angle Gearmotors

- Enclosure: totally enclosed nonventilated
- Gearcase: die-cast aluminum
- Lubrication: permanent, heavy fluid gear oil
- Gears: worm-hardened steel, output gear bronze alloy
- Bearings: ball on output and motor
- Mounting: all-position, base
- Rotation: reversible
- Brushes: externally replaceable
- Ambient: 40°C
- Reversible shaft output
- Seals: lip-type on input and output shafts
- UL and C-UL Recognized
- 1/8-HP units accept direct motor-mount speed control No. 2PUX3, sold on page 85
- Accept pulse generator Nos. 6Z392 or 5JJ65, sold on page 159

Left Shaft Assembly No. 4Z292

Dayton

C-Face Right-Angle Speed Reducers and Bases

- 29 to 350 rpm, continuous duty
- All-position mounting with optional bases, except input motor shaft up
- Shipped with Klübersynth UH1 6-460 gear oil No. 34K212
- Double-lipped and spring-loaded shaft seals; large oil sump

Interchangeable with most Grove (Flexaline) and Ohio (Uniline) reducers. Thread-rolled and hardened alloy steel worm for higher strength and lower power loss; forged bronze and hardened worm gear. Ball bearings on input shaft, tapered roller bearings on output shaft. Cast-iron housing. For low-speed/high-torque applications when coupled to a NEMA 56C-Face, 1750-rpm motor (not included).

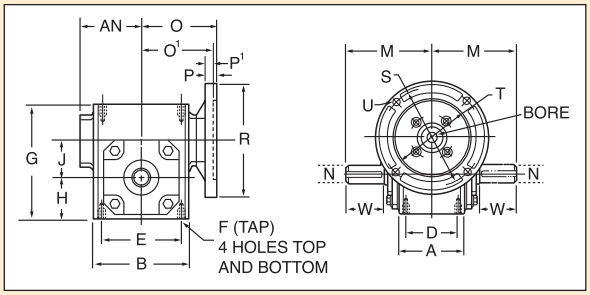
Get Ratio Multipliers on Grainger.com®



- Use as a speed reducer or increaser
- Die-cast aluminum, cast iron, and stainless steel housings available

Dual-purpose ratio multipliers from Grove Gear can function as stand-alone inline reducers or work with C-face reducers to multiply the overall reduction ratio to meet your application's torque requirements. A full line of these compact, versatile multipliers can be found on Grainger.com; search for "ratio multipliers."

C-Face Right-Angle Speed Reducers and Bases

- Left output shaft
- All-position mounting (mounting bases sold separately)
- Shipped without oil, use No. 34K212

Heavy-duty worm gear speed reducers with long-life seals have value-engineered features for flexible installation and simplified maintenance. Integral input worm and shaft of case-hardened alloy steel. Oversize ball and roller bearings for maximum performance. Fine-grain cast-iron housing.

Note: Models with stainless steel housing are available on Grainger.com®.

Dayton

C-Face Right-Angle Speed Reducers

- 29 to 173 output rpm, continuous duty
- Double-output shaft
- Horizontal floor or ceiling mount
- 2.63" worm center distance
- Shipped with Klübersynth UH1 6-460 gear oil No. 34K212
- Ball bearings

For use with ¼ to ¾ HP, NEMA 56C, 1725 rpm motors. Case-hardened, ball bearing-supported worm. High-strength bronze, tapered roller bearing-supported output gear. Cast-iron housing. For 1-phase C-face motors, see page 13; for 3-phase C-face motors, see pages 19 and 20.

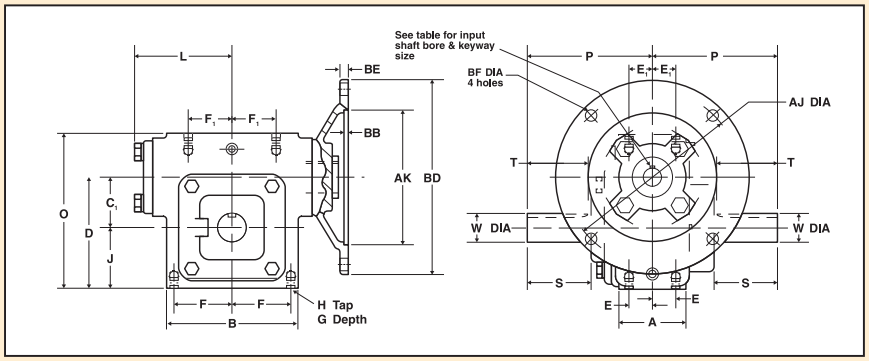
C-Face Right-Angle Speed Reducers and Bases

WINSMITH HIGH QUALITY SPEED REDUCERS



- Interchangeable with Winsmith MDNS models
- Double-shaft assembly
- Filled with Mobil Glygoyle® 460 synthetic lubricant

Black coating system is scratch resistant and suitable for washdown and outdoor applications. Exceeds ASTM B-117, 1000-hr. salt spray test. Shaft slingers prevent contaminants from contacting oil seals. Open/close vent. Can be mounted with or without optional base using predrilled and tapped holes. Lubricant meets NSF requirements and is acceptable for incidental food contact (H1) areas.

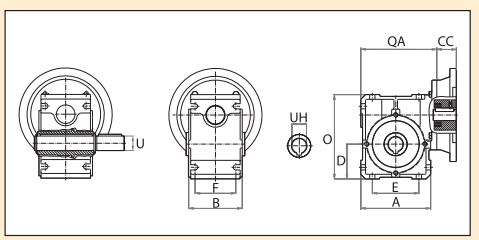
FLEXBLOC™ C-Face Right-Angle Hollow-Shaft Speed Reducers

- Universal gear housing
- Adaptable to any mounting position
- Filled with food grade synthetic lubricant
- Includes single and double output shafts with standard keys

Motor coupling provides accurate motor shaft alignment, minimizes fretting, and creates a low backlash/high-strength connection.

Fine-grained bronze alloy worm gear and hardened alloy steel worm pinion gear for durability. Oversize output ball bearings provide high radial and axial load capacities and long service life. Double-lip oil seals. Aluminum alloy housing.



Note: Additional sizes are available on Grainger.com®.

Indirect-Drive Right-Angle Speed Reducers

- Reversible rotation
- All-position mounting, except input shaft down; optional bases available on page 87
- Shipped with Klübersynth UH1 6-460 gear oil No. 34K212
- Double-lip, spring-loaded oil seals; large, prefilled oil sump

Interchangeable with most Grove (Flexaline) and Ohio (Uniline) models. The output shaft on single-output models can be field-converted from standard left-hand to right-hand extension. Worm is thread-rolled and alloy-hardened for higher strength and low power loss. Left-hand facing input shaft. Input shaft has ball bearings and output shaft has tapered roller bearings. Cast-iron housing. Flange coupling kits to adapt NEMA 56C-145TC motors to Dayton® right-angle speed reducers sold separately; see below.

FLANGE COUPLING KITS
- Bolt circle dia.: 5.88"
- Mounting hardware and shaft coupling included

Indirect-Drive Right-Angle Single-Shaft Speed Reducers

Boston Gear

- All-position mounting (bases sold separately)
- Shipped without oil, use No. 34K212

Heavy-duty worm gear speed reducers have value-engineered features for flexible installation, long life, and simplified maintenance. Integral input worm and shaft are made from case-hardened alloy steel. Oversized ball and roller bearings assure maximum performance. Fine-grained cast-iron housing and output shaft (left-hand facing input shaft).

No. 1L244

Indirect-Drive Right-Angle Single-Shaft Continuous-Duty Speed Reducers

- 2" worm center distance
- 700 lb. overhung load
- All-position mounting
- Shipped with Klübersynth UH1 6-460 gear oil No. 34K212
- Double-lip oil seals on input and output shafts; spring-loaded inner lip

For high-torque, low-speed applications. Tapered roller bearings. Hardened steel worm gear. Forged bronze worm wheel.

No. 4GAX8

Indirect-Drive Right-Angle Double-Shaft Speed Reducers and Bases

- Interchangeable with Winsmith XDNS models
- Double-shaft assembly
- Filled with Mobil Glygoyle 460 synthetic lubricant

Black coating system is scratch-resistant and suitable for washdown and outdoor applications. Shaft slingers prevent contaminants from contacting oil seals. Open/close vent. Can be mounted with or without optional base using predrilled and tapped holes. Lubricant meets NSF requirements and is acceptable for incidental food contact (H1) areas. Exceeds ASTM B-117, 1000 hour salt spray test.

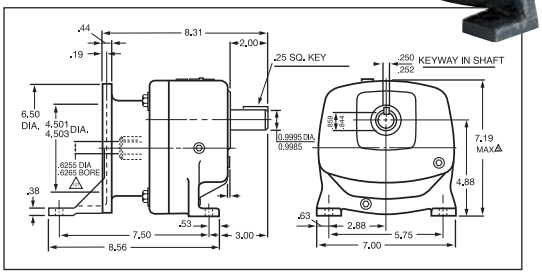
56C-Face Parallel-Shaft Speed Reducers



Dayton

- 660 lb. overhung load
- Horizontal mounting
- Shipped with Klübersynth UH1 6-460 gear oil, No. 34K212
- Spring-loaded double lip seals on input and output shaft

Precision machined cast-iron housing for accurate alignment of gears. Hardened steel pinions, helical and spur gears are computer-matched for high efficiency; designed per AGMA standards. Input shaft is ball bearing supported. Output shaft has deep-grooved ball bearings.

No. 2Z932

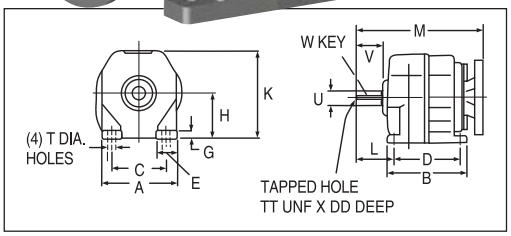
C-Face Parallel-Shaft Speed Reducers



Boston Gear

- All-position mounting
- Shipped with Klübersynth UH1 6-460 gear oil No. 34K212

Powdered epoxy paint. Dimensionally interchangeable with SEW Eurodrive inline helical reducers. Ratios up to 71:1 in only 2 stages; increases efficiency and reduces case size.

No. 1F880

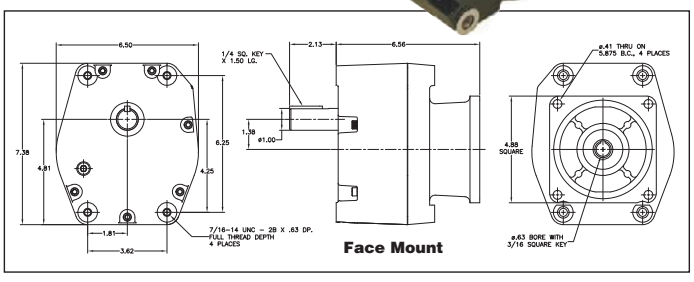
BISON

56C-Face Parallel-Shaft Speed Reducers

Provide the power required for applications in many different industries. Designed with a precision machined die-cast aluminum housing, these reducers can be aligned seamlessly to drive most OEM equipment. Equipped with high quality helical and spur gearing. Factory lubricated for life.



No. 35FT35

Indirect-Drive and 42CZ/48C-Face Parallel-Shaft Speed Reducers with Base

- All-position mounting using face, base, and top
- Shipped with heavy-duty SAE 80W-90 oil lubricant in gearcase
- Spring-loaded lip oil seals on input and output shafts

Base allows high or low positioning of output shaft; face-mounting holes on output side of reducer. Heat-treated steel pinion with helical first stage gearing. Heavy-duty needle and ball bearings with thrust balls. Die-cast aluminum gearcase housing.

Double C-Face Magnetic Disc Brakes

- Service factor: 1.0
- Max. ambient: 40°C
- Coil lead length: 15"
- 60/50 Hz
- Mounting: horizontal

Direct-acting spring-set brakes use 1 moving part to engage and hold load under power-off conditions. Brake is designed to convert C-face motors and gearmotors to brake motors or brake gearmotors. Models with 56C/140TC NEMA frame have ⅞" O.D. x ⅝" I.D. shaft bushing. CSA Certified; washdown brakes BISSC Certified.

Standard Dripproof—Used in indoor applications such as conveyors and door openers.

Waterproof/Dust-tight—Used in indoor and outdoor applications where dirt and moisture are present.

Washdown—Used in food and dairy applications. Comply with 3A dairy standards pertaining to nonproduct-contact surfaces and with NEMA DEF.MG1-1.26.6 for waterproof machines. USDA-approved white epoxy paint.

Dayton

Note: Not intended for accurate positioning, indexing, or vertical holding applications such as vertical conveyors or hoists.

End-Mount Standard Dripproof Magnetic Disc Brakes

No. 5URA0

- Service factor: 1.4
- Max. ambient: 40°C
- Coil lead length: 18"
- 60/50 Hz
- Mounting: horizontal
- Interchangeable with Stearns Series 56,000

Direct-acting spring-set brakes have single-point air gap adjustment, factory set for plug-and-run assembly for easy maintenance. Have no linkage to wear, which helps extend service life. Knockout hole in cover accommodates through-shaft brake motors with fans. Suitable for use in conveyors, packaging machines, hoist end-trucks, security/toll booth gates, and sorting machines.

Note: Not intended for accurate positioning, indexing, or vertical holding applications such as vertical conveyors or hoists.

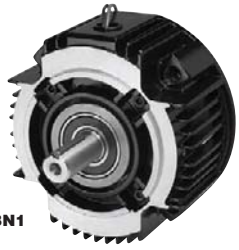
Warner Electric

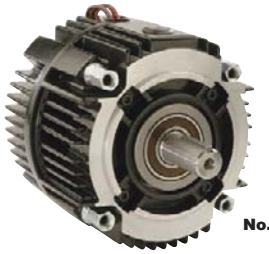
C-Face Clutches and Brakes

Patented Autogaps™ technology allows clutch and brake to automatically adjust for wear, requiring no lubrication or maintenance.



Packaged NEMA C-face clutch/brake modules offer high-performance starting and stopping of loads, with the motor running, in an easy-to-install package. Mount to NEMA C-face motor or between motor and reducer. Power on engagement of the brake and clutch. Use the HP vs. Shaft Speed Selection Table to select the proper unit for your application. UL Listed and CSA Certified.

Note: Brake is not intended for accurate positioning applications or vertical holding applications, such as vertical conveyors or hoists.



Clutch/Brake Controls—Mount on standard module conduit boxes. Green LED indicates power to clutch; red LED indicates power to brake.

HP vs. SHAFT SPEED SELECTION TABLE
CAUTION: RPM refers to shaft speed at clutch or brake.

Fenner Drives® POWERTWIST DRIVE POWERTWIST

Premium Link Belts

- Composite polyurethane/polyester construction
- Superior resistance to oil, water, and chemicals
- Temp. range: -40° to 240°F

Belts can be easily installed without dismantling drives.

PowerTwist® Drive V-Belts—This long-lasting, permanent upgrade for V-belt drives offers reduced drive vibration and fit-and-forget installation with no need to re-tension. The belts assemble to any length so you need not stock multiple belt sizes.

PowerTwist Wedge Belts—Heavy-duty abrasive-resistant belts are a drop-in upgrade for your rubber wedge belts in big shock-loaded applications with multi-belt drives. Easily adjust to any length within seconds.

PowerTwist Standard V-Belts—Quick replacement for failed rubber V-belts can be assembled to any length so you always have the right belt on hand.

PowerTwist Roller Drive™ Belts—Quickly and permanently replace belts on live roller conveyors. Drop-in replacement for B section V-belts on any live roller conveyor or 9/16" round profile belts on Rapistan® Conveyor Systems.

Selection Guidelines

FOR DIRECT REPLACEMENT WHEN ORIGINAL BELT PART NUMBER IS AVAILABLE

Match ARPM (Association of Rubber Products Manufacturers) number/manufacturer's part number (from your existing V-belt), then make selection from the following pages. Dayton® V-belts conform to ARPM standards.

WHEN ORIGINAL BELT PART NUMBER IS NOT AVAILABLE

When replacing V-belts with worn markings, use the belt cross-sections at the top of each page to identify the belt type. Belt length can be determined by using either V-Belt Rule No. 6AGK6 (available on page 105), or by using the Belt Length Formula calculation on this page.

BELT INTERCHANGE*

ARPM Belt Size	BROWNING	CONTITECH/ GOODYEAR	GATES	DAYCO
3L, 4L, 5L	FHP	Fractional HP	Truflex	Durapower FHP

* Call 1-800-GRAINGER (472-4643) for assistance with cross-referencing specific part numbers.
Additional V-belt lengths are available on Grainger.com®

Sheave Pitch Diameters

TO CALCULATE MOTOR SHEAVE PITCH DIAMETER

Multiply driven sheave rpm by driven sheave pitch diameter and divide by motor sheave rpm.

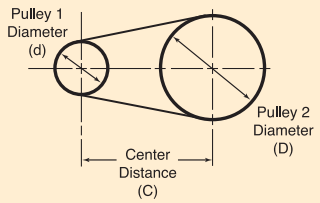
TO CALCULATE DRIVEN SHEAVE PITCH DIAMETER

Multiply motor sheave rpm by motor sheave pitch diameter and divide by driven sheave rpm.

FORMULA

(Motor Sheave P.D.) x (Motor Sheave rpm) = (Driven Sheave P.D.) x (Driven Sheave rpm)

V-Belt Length Formula



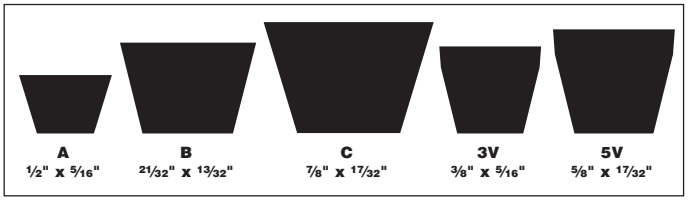
Dayton® V-belts interchange with major brands such as Browning®, Carlisle, ContiTech, Dayco®, Gates®, Goodyear®, and others.

BELT LENGTH FORMULA

exact: $L = 2C + 1.57\,(D+d) + \frac{(D-d)^2}{4C}$

approximate: $L = 2C + 1.57\,(D+d) + \frac{(D-d)^2}{4C}$

L = Pitch Length of Belt
C = Center Distance
D = Pitch Diameter of Large Sheave
d = Pitch Diameter of Small Sheave



2L, 3L, 4L, and 5L Fractional Horsepower V-Belts

Dayton®

All belts are oil- and heat-resistant. 3L, 4L, and 5L belts are static-conductive. 2L belts are cogged. These Dayton® V-belts interchange with major brands such as Browning®, Carlisle, ContiTech, Dayco®, Gates®, Goodyear®, and others. They are manufactured to tolerances set by the ARPM (Association of Rubber Products Manufacturers).

Find more information on V-Belts on page 97.

A, B, C, 3V, and 5V V-Belts

Dayton

All belts are oil- and heat-resistant, and static-conductive, and interchange with brands such as Browning®, Carlisle, ContiTech, Dayco®, Gates®, and Goodyear®. These Dayton V-belts are built to matching specifications, so all belts of the same size are within the tolerences set by the ARPM (Association of Rubber Products Manufacturers).

Find more information on V-Belts on page 97.

Dayton®

AX, BX, CX, 3VX, and 5VX Raw Edge Cogged V-Belts

For medium/high HP industrial applications that require single or multiple V-belt drives. Belts resist oil and heat, and are static conductive. Belts interchange with brands such as Browning®, Carlisle, ContiTech, Dayco®, Gates®, and Goodyear®. These Dayton V-belts are built to matching specifications, so all belts of the same size are within the tolerences set by the ARPM (Association of Rubber Products Manufacturers).

No. 3HEY5

Banded V-Belts

Dayton

Top cover protects belt from oil and heat, and maintains dimensional stability. Durable transverse tensile cords create a permanent connection between individual belts. For use with multiple belt systems where shock loads, pulsation, or misalignment cause belts to whip, flip over, or jump off of the sheave. Manufactured to tolerances set by the ARPM (Association of Rubber Products Manufacturers). Additional banded V-belts are available on Grainger.com®.

3L, 4L, and 5L Fractional Horsepower V-Belts

Continental ContiTech

Static conductive, plus heat-, ozone-, and abrasion-resistant. 4L and 5L belts are cogged. All are manufactured to tolerances set by the ARPM (Association of Rubber Products Manufacturers). For additional sizes, go to Grainger.com®.

A, B, C, 3V, and 5V V-Belts

Continental ContiTech

HY-T® Plus and HY-T® Wedge wrapped belts are engineered with high-grade rubber for static conductivity and resistance to heat, ozone, oil, and abrasion. Built to Matchmaker® specifications so all belts of the same size are within the matching tolerances set by the ARPM (Association of Rubber Products Manufacturers). For additional sizes, go to Grainger.com®.

AX, BX, CX, 3VX, and 5VX Raw Edge Cogged V-Belts

Torque-Flex® and HY-T® Wedge belts are fully cogged to provide the flexibility needed to keep their high-traction rubber edges in contact with the sheave grooves, helping you achieve the horsepower you need at a lower total drive cost. Produced with highly engineered oil- and heat-resistant and static-conductive EPDM, providing a broader temperature range than ever before (-40° to 230°F). Built to Matchmaker® specifications so all belts of the same size are within the matching tolerances set by the ARPM (Association of Rubber Products Manufacturers). For additional sizes, go to Grainger.com®.

Banded V-Belts

HY-T® Torque Team® belts are designed and built to deliver superior performance. Belts provide high-strength and high-horsepower capacity. The tough fabric backing provides the maximum longitudinal flexibility and lateral strength to withstand the dynamic forces acting on the belt. Static conductive and resistant to heat, oil, ozone, and abrasion. Ideal for pulsating loads, high-capacity drives, and short center heavy-duty drives. Manufactured to tolerances set by the ARPM (Association of Rubber Products Manufacturers). For additional sizes, go to Grainger.com®.

Metric Raw-Edge Cogged V-Belts

Gates

Suitable for industrial applications such as textile mills, machine applications, and food processing, where metric cross sections are required. Manufactured to tolerances set by the ARPM (Association of Rubber Products Manufacturers). SPA, SPB, SPC, and XPC belt types are available on Grainger.com®.

Dayton

Variable Speed Belts

Oil- and heat-resistant top cover for dimensional stability. Use with belt systems that have smaller pulleys, wide speed ranges, high-horsepower demands, or high-heat applications. Manufactured to tolerances set by the ARPM (Association of Rubber Products Manufacturers).

Micro Ribbed V-Belts for Compressors

★ Dayton

6-rib belts for many Dayton®, Speedaire®, and other brand compressors. High tensile strength; oil and heat resistant. Manufactured to tolerances set by the ARPM (Association of Rubber Products Manufacturers).

V-Belt Accessories

Wall Rack—36"L with mounting holes and includes six 6" hooks. Not for V-belts over 72"L.

Rule—Aluminum slide adjustment and measures (3L, 4L, 5L, A, B, 3V, and 5V) V-belts up to 100". With mounting holes.

Tension Checker—Compact, spring-loaded. Adjustable for 10" to 170" belt span and up to 35 lb. of tension.

Sheave Groove Gauge—Handy tool lets you quickly check belt section and sheave groove wear.

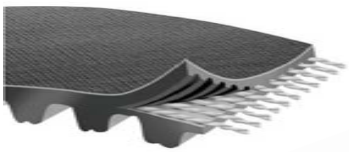
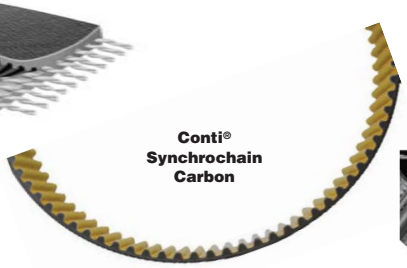
Timing Belts



- XL, H, L, and HT Series
- For timing belt pulleys, see page 114

Quiet operating, low-maintenance synchronous timing belts ensure nonslip, positive performance with low tension requirements.



Note: 50mm, 85mm, and 115mm wide timing belts are available on Grainger.com®; search for "timing belts" and Filter Results by desired width.

Falcon Pd

Conti® Synchrochain Carbon

Hawk Pd

Dual Hi-Performance Pd

Timing Belts

- 8mm pitch
- For timing belt pulleys, see page 114

Versatile positive drive belts combine the advantages of V-belts with chain and gear for power transmission belting that is efficient and precisely accurate. They are engineered to be adaptable to almost any type of drive, from printers to heavy industrial milling machines and grinders.

Falcon Pd®—Designed to handle applications with increased horsepower and low torque, as well as those requiring backside idlers. High-grade rubber blend compound is formulated to resist tooth deformity, increase tooth rigidity, and withstand much higher temperatures than polyurethane belts.

Conti® Synchrochain Carbon—Developed for extreme applications that require reliable transmission of large power outputs, high torques, and high speeds, or with high dynamic stressing. Belts allow reverse flexing in multipulley drives. Compatible with other heavy-duty profiles.

Hawk Pd®—Universal-profile belts made with advanced compounded materials are designed to fit the majority of high-capacity synchronous drive requirements.

Note: 85mm Hawk Pd timing belts are available on Grainger.com®.

Dual Hi-Performance Pd® —Double-sided belts provide compactness and greater horsepower capacity in precision drives with synchronized reverse-rotation drive shafts. Specialty rubber compound has excellent oil, heat, ozone, and abrasion resistance, for extended belt life.

Note: Additional size Continental ContiTech timing belts are available on Grainger.com®.

Eagle® Round Belting

- Temp. range: -22° to 150°F
- Sold in 100-ft. lengths

Polyurethane belts can be cut to required length; weld endless or use connectors for hollow-core belts to extend length. Smooth belts are FDA compliant. Solid-core metal-detectable belting is used in food processing and pharmaceutical applications.

Eagle® Twisted O-Rings

- Clear, smooth texture, Shore A 85 hardness
- Sold in packages of 50

Quick-connect polyurethane twisted O-rings are a great fast-fit solution for live roller conveyors. No need to dismantle drive components, providing an easy way to avoid system downtime. Metal hooks are included.

Gates

Round Endless Belts

- -30° to 140°F

Allow minimal stretch and have no splice, making them extra durable and efficient. Made from rubber with nylon reinforcement cords and designed for 1-quarter turn or twisted drives where more than an O-ring is required. Also suitable for serpentine drives, power turn and line shaft conveyors, and commercial sewing machines.

Dia. of Shaft	Keyseat Width x Depth	Dia. of Setscrew †
3 13/16-4 1/2"	1 x 1/2"	3/4"
4 9/16-5 1/2"	1 1/4 x 5/8"	3/4"
5 9/16-6 1/2"	1 1/2 x 3/4"	1"
6 9/16-7 1/2"	1 3/4 x 7/8"	1"
7 9/16-8 15/16"	2 x 1"	1"
9-10 15/16"	2 1/2 x 1 1/4"	1"

† Setscrew size may vary depending on hub wall thickness. As a general rule, the hub wall over the keyway should be equal to or greater than the dia. of the setscrew.
Note: Maximum bore guidelines should be adhered to in order to ensure maximum product quality standards.

Find more information on Standard Keyway and Setscrew Machining on pages 109, 119

No. 54XM91

Congress DRIVES

3- and 4-Step Fixed-Bore Die-Cast V-Belt Pulleys

- Zamak/zinc alloy
- Reducer bushing included
- Solid construction

Bore and grooves are machined together to provide high concentricity. Use in pairs (1 inverted), in any combination, for effective speed regulation. Will fit a ⅝" or ½" dia. shaft. Designed for use with 4L or A Type V-belts. Pitch dia. is 0.15" less than outside dia.

Fenner Drives®

Fixed-Bore Composite V-Belt Pulleys

- Spoke construction
- Sintered metal drive hub
- Standard keyway with 5/16-18 setscrew
- Directly interchangeable with industry standard AK sheaves

High-strength corrosion-resistant PowerMax™ DriveN V-Pulleys are molded of lightweight glass-reinforced nylon.

For our full selection of **V-Belts and V-Belt Pulleys** go to Grainger.com®.

TB Wood's Incorporated

Quick-Detachable Narrow-Wedge Cast-Iron V-Belt Pulleys

- Fine-grain, high-tensile cast iron
- Require bushings; order separately on page 115

Ultra-V pulleys utilize single or banded V-belts with either wrapped or cogged construction.

Solid Construction No. 5YKR4

Web Construction No. 5YLE2

Timing Belt Pulleys

PowerDrive

- For XL, L, and H timing belts, see page 106

No-slip positive drive pulleys with wide belt speed and load capacity ranges maintain a constant speed ratio.

Plain Bore—For light-duty applications up to ¼ HP. Aluminum material. Each includes 2 hollow head setscrews; no keyway.

- Standard keyway and setscrew machining guide located on pages 109, 119

Bushed Bore—Steel material. Select ⅜" pulleys for applications up to 4 HP, ½" pulleys for applications up to 20 HP.

- Require bushings; order separately on page 115

Continental

ContiTech

Timing Belt Pulleys

- 8mm pitch
- Timing belts sold separately on page 107
- Bushings sold separately on page 115

Positive drive-tooth engagement eliminates slippage and speed variation. Cast-iron pulleys provide uniform speed transfer.

Note: Additional sizes of Continental ContiTech Drive Timing Belt Pulleys are available on Grainger.com®.

QT Series

F Series

TB Wood's Incorporated

Quick-Detachable Bushings

- Taper: ¾" per ft.

Split through flange and taper to provide a true clamp. All series except for JA and QT have a setscrew over the key to help maintain the bushing's position until the screws are tightened. For use with sheaves, sprockets, and pulleys.

Conveyor
No. 2YDY3

Roller Chain and Individual Links

Hardened carbon steel construction. Fully interchangeable with other ANSI roller chains. Factory preloading, lube-grooved bushings, and prelubrication minimize wear elongation. 1 connecting link included for every 10 ft. of chain. Meets or exceeds all ANSI requirements.

Additional sizes and styles of roller chain are available on Grainger.com®.

Lube-Free Lambda®—Oil-impregnated bushings, coated pins, and solid rollers. Maximum allowable load is the same as standard roller chain.

British Standard—Conforms to ISO 606, DIN 8187, and BS 2280 dimensions.

Heavy—Chain features thicker side plates for increased working load and fatigue resistance.

Conveyor—Designed specifically for transport applications such as material handling, packaging, road building machinery, commercial bakeries, bottlers, and farm equipment.

Connecting, Offset, and Roller Links—Connecting links join 2 ends of chain together. Sizes 25 to 60 assemble with spring clips. Size 80 and higher, as well as Heavy and Curved connecting links, assemble with cotter pins.

Offset links are used for strands when an odd number of chain links is required.

Roller links serve as replacements for damaged roller links.

Dayton TSUBAKI

Corrosion-Resistant Roller Chain and Individual Links

Each 10-ft. length includes 1 connecting link.

Neptune®—Resists corrosion in difficult environments including seawater spray. Chromium-free topcoat protects chain from impact and provides superior rust resistance. Zinc-and-aluminum undercoating ensures maximum corrosion resistance with the same strength as standard ANSI chain.

Nickel-Plated—Useful for decorative applications or in moderately corrosive environments and outdoor conditions. Not suggested for direct food contact.

304 Stainless Steel—Excellent for corrosive conditions involving food, salt-water, chemicals, and pharmaceuticals.

Single-Strand Fixed-Bore Sprockets

ANSI standard sprockets for use with standard roller chain. Constructed of high-carbon and heat-treated steel alloy. Standard keyway (see pages 109, 119 for more info.) and 2 setscrews included. Setscrews are directly over keyway and 90° from keyway, unless noted. The ⅜" and ½" bore sizes have no keyway. Additional sprockets available on Grainger.com®.

** Has recessed groove in hub for chain clearance.*

Standard Keyway and Setscrew Machining Guide

Dia. of Shaft	Keyseat Width x Depth	Dia. of Setscrew †
5/16 - 7/16"	3/32 x 3/64"	#8-32"
1/2 - 9/16"	1/8 x 1/16"	#10-24"
5/8 - 7/8"	3/16 x 3/32"	1/4"
15/16-1 1/4"	1/4 x 1/8"	5/16"
1 5/16- 1 3/8"	5/16 x 5/32"	3/8"
1 7/16-1 3/4"	3/8 x 3/16"	3/8"
1 13/16-2 1/4"	1/2 x 1/4"	1/2"
2 5/16-2 3/4"	5/8 x 5/16"	5/8"
2 13/16-3 1/4"	3/4 x 3/8"	3/4"
3 5/16-3 3/4"	7/8 x 7/16"	3/4"
3 13/16-4 1/2"	1 x 1/2"	3/4"
4 9/16-5 1/2"	1 1/4 x 5/8"	3/4"
5 9/16-6 1/2"	1 1/2 x 3/4"	1"
6 9/16-7 1/2"	1 3/4 x 7/8"	1"
7 9/16-8 15/16"	2 x 1"	1"
9-10 15/16"	2 1/2 x 1 1/4"	1"

† Setscrew size may vary depending on hub wall thickness. As a general rule, the hub wall over the keyway should be equal to or greater than the dia. of the setscrew.
Note: Maximum bore guidelines should be adhered to in order to ensure maximum product quality standards.

Composite Idler Sprockets

Fenner Drives

Quiet, lightweight idlers require no lubrication and are corrosion-resistant, with wear-resistant glass-reinforced nylon and insertion-molded ABEC-1 6203-2RS bearing with ½" bore adapter. Compatible with tensioners on page 121; order separately.

Fenner Drives®

Self-Adjusting V-Belt and Chain Tensioners

- Tensioning arm deflects up to 45° either side of neutral for wound springs; 70° for torsional wrapped springs
- Alloy steel springs

Maintain correct tension on belt and chain drives without requiring manual retensioning. Reduce resonant frequency of chain drives.

Nos. 2ZRT8, 2ZRU1, 2ZRU2, and 16A169 feature accurately wound compression springs for constant tensioning force. Nos. 16A170, 2ZRT9, 2ZRU3, and 2ZRU4 feature reversible torsional wrapped spring for bidirectional use.

Linear Chain Tensioners

Fenner Drives®

- Die-cast aluminum construction
- Single bolt for mounting and tension adjustment
- Built-in spring mechanism absorbs momentary overloads and reduces vibration
- UHMW head is self-lubricating

Offer fully automatic straight-line take up for single chain applications.

Elastomeric Tensioners

Lovejoy

- 1-bolt mounting
- Temp. range: -40° to 180°F

Employ no metal-to-metal connections; no lubrication required. Withstand dirt and grime; can be used indoors or out. Mounting bolt and idler bolt included. Nos. 1L833, 1L834, and 1L835 include ⅝" bushing. Idler sprockets not included; for compatible sprockets see page 120.

Coupling Sprocket

Coupling Cover (½ Shown)

Coupling Chain

Complete Coupling Assembly

Chain Couplings

PowerDrive

- Operating temp.: -25° to 150°F
- Max. parallel misalignment: 0.005"

Complete unit consists of 2 coupling sprockets, double-strand roller chain, and coupling cover. Split-taper bushings required for 50 and 60 pitch couplings, see page 115. Coupling sprockets are steel construction with fixed-bore versions having standard keyway and set screw. Coupling covers are cast-aluminum with seals, grease fitting, and hardware for installation.

Dayton® Zinc-Plated Steel

Ruland Black Oxide 1215 Lead-Free Steel

Ruland 303 Stainless Steel

Set Screw Shaft Collars

Dayton RULAND Carefully Made Shaft Collars and Couplings

For soft or predrilled shafts. Lock onto shaft by tightening cup point socket set screw. Zinc-plated and black oxide-coated steel collars have alloy screws; stainless steel has stainless steel screws.

Ruland—Machined to a burr-free finish from solid bar stock sourced exclusively from North American mills. High-grade forged screws meet or exceed ANSI standards.

- TIR <0.002" (0.05mm)
- RoHS2 and REACH compliant

1-Pc. Clamp Shaft Collars and Collar Sets

- Ruland: TIR <0.002" (0.05mm)
- Ruland collars are RoHS2 and REACH compliant

Design wraps tightly around the shaft for even distribution of clamping forces without the shaft damage caused by set screws, and with greater holding power. Forged clamp screws meet or exceed ANSI standards. Black oxide-coated steel and aluminum have alloy socket cap screws. Stainless steel has stainless steel socket cap screws. Threaded collars offer superior axial holding power compared with smooth bore units and are easier to install and adjust. Ruland collar materials are sourced exclusively from North American mills.

Adjustable Drill Depth Stop Collar Sets—Include seven 1-pc. clamp-style shaft collars (from ⅛" to ½" in 1/16" increments) with hex wrenches in a sturdy plastic box.

Description	DAYTON Item No.	RULAND Item No.
Adjustable Drill Depth Stop Collar Sets	**1F616**	**2ADN8**

Ruland Black Oxide 1215 Lead-Free Steel

Ruland 2024 Aluminum

Ruland 303 Stainless Steel

Dayton RULAND Carefully Made Shaft Collars and Couplings

2-Pc. Clamp Shaft Collars

Wrap around hard or soft shafts without marring. Easy to install without having to disassemble machinery or components. Black oxide-coated steel and aluminum have alloy socket cap screws; stainless steel has stainless steel socket cap screws.

Ruland—Collars are made exclusively from North American bar stock and mated throughout the manufacturing process to assure a proper fit. Machined to a burr-free finish. High-grade forged screws meet or exceed ANSI standards.

- TIR <0.002" (0.05mm)
- RoHS2 and REACH compliant

Looking for Fasteners?

Grainger carries a large selection of Fasteners in a variety of types and sizes. Besides Hex Head and Socket Head Cap Screws, we also carry Nuts, Washers, Wedge Anchors, Anchor Screws, Sleeve Anchors, and more.

For our full selection, go to **Grainger.com®** and search for **Fasteners**.

Set Screw Rigid Couplings

Dayton® RULAND

For soft or predrilled shafts in applications where alignment is critical, no backlash is desired, and flexibility is not required. Lock onto shaft by tightening alloy cup point socket set screws. Dayton® brand has 2 screws. Ruland brand rigid shaft couplings are precision honed with 4 screws.

Dayton Zinc-Plated Steel without Keyway

Ruland 1215 Black Oxide Lead-Free Steel with Keyway

1- and 2-Pc. Clamp Rigid Couplings

Dayton®

- Max. rpm: 4000
- Black oxide steel

For applications where alignment is critical, no backlash is desired, and flexibility is not required. Wrap around hard or soft shafts without marring. Utilize vibration-resistant socket cap screws. The 2-pc. designs are easy to install; no need to disassemble machinery or components.

RULAND
Carefully Made Shaft Collars and Couplings

1- and 2-Pc. Clamp Rigid Couplings

- Max. rpm: 4000
- Tolerance: +0.002"/0.0005"

For applications in which alignment is critical, no backlash is desired, and flexibility is not required. The couplings wrap around hard or soft shafts without marring. Honed straight bores improve accuracy. Nypatch®-coated hardware resists loosening caused by vibration. Utilize vibration-resistant socket cap screws. Black oxide-coated steel couplings have alloy screws; stainless steel couplings have stainless steel screws. All are RoHS2 and REACH compliant.

1-pc. couplings are machined from solid bar stock sourced exclusively from North American mills.

2-pc. couplings are easy to install without having to disassemble machinery or components. An opposing screw design improves balance and allows operation at higher speeds.

Complete Coupling Assembly

Flange

Sleeve

TB Wood's Incorporated

Sure-Flex Plus® Sleeve Couplings

- Max. angular misalignment: 1° with EPDM sleeves, ¼° with Hytrel® sleeves
- EPDM temp range: -30° to 275°F (-34° to 135°C)
- Hytrel temp. range: -65° to 250°F (-54° to 121°C)

Elastomer-in-shear design offers exceptional torsional flexibility to help protect equipment from misalignment, vibration, and shock loads. No lubrication required.

Note: A complete coupling consists of 2 flanges and 1 sleeve, sold separately.

Coupling Flanges

- Type 3J, 4J, and 5J: sintered carbon steel
- Type 6J and all S: cast iron
- Each has a keyway and 2 set screws

Coupling Sleeves

- JE: 1-pc. solid EPDM rubber
- JES: split 1-pc. EPDM
- E: 2-pc. EPDM rubber with retaining ring
- H: 1-pc. molded Hytrel
- HS: 2-pc. molded Hytrel

Taper Lock Coupling Hub No. 15E696

Coupling Hub No. 15E635

Standard Element

Spacer Element

TB Wood's Incorporated

Dura-Flex® Shaft Couplings

- Temp. range: -40° to 200°F

Split-in-half design allows easy element installation without disturbing shaft connection; no need to move connected equipment. 100% part-for-part interchangeable with popular bonded tire couplings, with design, materials, and construction that are superior to common orange polyurethane coupling elements. The couplings accommodate shaft misalignment and minimize vibration to help prevent damage to connected equipment, and offer a large range of spacing with few parts.

Note: A complete coupling assembly consists of 2 hubs and 1 element, sold separately. Taper-Lock® coupling hubs require Taper-Lock® bushings.

Find information on Keyways and Spiders on page 129.

Sintered Iron Coupling Hub

Hytrel Spider Insert

Jaw Couplings

L-type couplings are designed for close-coupling applications.

Coupling Hubs—Maintenance-free couplings connect to drive shafts to provide dependable power transfer, even in high-temperature applications. Plated metal construction requires no lubrication. Simple design helps assure easy installation and consistent performance. Coupling keyway dimensions conform to DIN 6885, JIS B 1310-1976, UNI 6604-1969, USAS B 17.1-1967, GB 1095-1979 standards.

- Max. angular misalignment: 1°
- Max. parallel misalignment: 0.015"

Note: a complete assembly requires 2 hubs and 1 spider, sold separately.

Spider Inserts—Oil- and high temperature-resistant inserts conform to the sintered alloy couplings to help them maintain position and structure for equal power transfer.

- Temp. range: -40° to 100°C (Buna N); -51° to 121°C (Hytrel®)

Bost-Bronze Spider Insert

Steel Coupling Hub

Jaw Couplings

Coupling Hubs—3-jaw insert design is complete with keyway and set screw. No lubrication required.

- Standard tolerance: +0.001/-0.000", all bore dimensions

Note: A complete assembly requires 2 hubs and 1 spider, sold separately.

Bost-Bronz® Spider Inserts—Recommended for high-torque loads, particularly at slower speeds.

- Oil-impregnated
- Temp. range: -60° to 250°F (-51° to 121°C)

Synthetic Rubber Spider Inserts—Recommended where minimal noise is desired, particularly at motor speeds.

- Oil-resistant
- Temp. range: -32° to 200°F (-35° to 93°C)

Polyurethane Spider Inserts—Recommended where moderate-to-heavy shock loads are encountered.

- Temp. range: -32° to 200°F (-35° to 93°C)

** Total length of assembled coupling with jaws engaged to full depth (assembled coupling = 2 hubs + 1 spider).*

How to Determine Keyways and Spiders for Jaw Couplings

Spider Selection Procedure

1. Select a Service Factor (SF) based upon the load classification.
   - Uniform = SF of 1.00
   - Moderate Shock = SF of 1.75
   - Heavy Shock = SF of 2.50
2. Determine design load.
   - Design Torque = Application Torque (T) x SF or Design HP = Application HP x SF
   - T = [HP(63025)]/rpm
3. Select coupling size that has a HP rating equal to or greater than the design load.

Keyway Chart

Use the coupling's bore diameter to determine the required keyway.

Bore	Keyway	Bore	Keyway	Bore	Keyway
½"	⅛ x 1⁄16"	1¼"	¼ x ⅛"	2⅛"	½ x ¼"
⅝"	3⁄16 x 3⁄32"	1⅜"	5⁄16 x 5⁄32"	2¼"	½ x ¼"
¾"	3⁄16 x 3⁄32"	1½"	⅜ x 3⁄16"	2⅜"	⅝ x 5⁄16"
⅞"	3⁄16 x 3⁄32"	1⅝"	⅜ x 3⁄16"	2½"	⅝ x 5⁄16"
1"	¼ x ⅛"	1¾"	⅜ x 3⁄16"	2¾"	⅝ x 5⁄16"
1⅛"	¼ x ⅛"	1⅞"	½ x ¼"	2⅞"	¾ x ⅜"
—	—	2"	½ x ¼"	3⅜"	⅞ x 1⁄16"

Jaw Couplings

TB Wood's Incorporated

An economical choice that's 100% interchangeable with industry-standard L-jaw couplings. No lubrication required. Standard keyway on ⅝" and larger bore sizes; Nos. 4X177, 3KX86, and ¼" to ½" coupling hubs have no keyway (except where footnoted). Spiders have 0.015" max. parallel misalignment. Buna N and urethane spiders have 1° max. angular misalignment and Hytrel® have ½°.

Note: A complete assembly requires 2 hubs and 1 spider, sold separately.

Buna N Spider Inserts—Made of oil-resistant, long-life material with excellent flexibility.
- Temp. range: -40° to 212°F (-40° to 100°C)

Urethane Spider Inserts—Provide 1.5-times greater torque capability than Buna N but with less dampening. Good resistance to oil and chemicals.
- Temp. range: -30° to 160°F (-34° to 71°C)

Hytrel® Spider Inserts—Provide 2.5-times greater torque capability with excellent oil and chemical resistance compared with Buna N and urethane.
- Temp. range: -60° to 250°F (-51° to 121°C)

Selection Guide for Universal Joints

Step 1: Find the appropriate correction value for your particular application using the Correction Factor table on the the right. The table is based on "intermittent" application—more than 1 start/stop per hr., with sufficient time for cooling before starting. If your application is continuous—sustained operation with less than 1 stop/start per hr. for up to 8 hr. per day—multiply the value in the table by 2.

Step 2: Multiply your specific torque requirements by the correction value found in Step 1. (Be sure to use in.-lb.)

Step 3: Refer to the "Static Breaking Torque" column in the Universal Joints table to select a joint (solid type or bored type) with the same or greater torque than the in.-lb. number you calculated in Step 2.

Universal Joints

Special tapered shape of yokes provides exceptional strength, while allowing full free movement of joint. Standard industrial-type universal joints have pin-and-block design as well as boot-retaining grooves. For applications with angles up to 25° and speeds up to 1750 rpm (6000 rpm for needle-bearing units). Stainless Steel is grade 303.

KEYSHAFT™
Keyed Shafting

- Dia. tolerance: -0.0005"/-0.0035"
- Key width tolerance: +0.003"/-0.000"
- Straightness tolerance: 0.012" per ft.

All material is furnished as cold-drawn, ground, and polished. Manufactured to ANSI B17.1-1967, R1973 standards.

Stainless Steel, Type 304/316—Corrosion-resistant shafting is suitable for use in food processing applications. Meet ASTM A-276/479, cond. A and QQ-S-763, cond. A specifications.

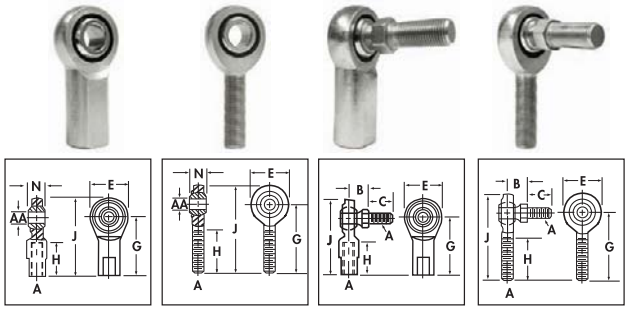
Aluminum—Lightweight, screw machine-grade aluminum is ideal for robotic applications.

Carbon Steel, Grade 1045—Grade 1045 steel is tougher than basic low-carbon steel, but can still be easily machined for secondary operations. Meet ASTM A-108.

Buy Rotary Shaft Seals on Grainger.com®

AVOID DOWNTIME: LIPPED SEALS HELP KEEP YOUR MACHINES AND EQUIPMENT RUNNING AT PEAK EFFICIENCY

Rotary seals from Grainger are designed to keep lubricants in and contaminants out, so rotating or oscillating components can function at their best. Search for "rotary shaft seals" on Grainger.com.



Single Lip Seal

Single Lip with Garter Spring Seal

Lip with Garter Spring and Static Dust Lip Seal

Steel Spherical Rod Ends

Rod ends allow pivoting in the housing to compensate for misalignment in industrial applications. Metric sizes are available on Grainger.com®.

Note: Not for automotive or aircraft use.

Economical—Feature a precision-ground, chrome-plated hardened 52100 steel spherical ball and 1045 carbon steel body.

Stainless Steel—Feature a precision-ground, hardened 440C stainless steel ball and 300 Series stainless steel body with bonded PTFE fabric race. Excellent for low to moderate load applications where lubricating the parts is not desirable.

Self-Lubricating—Feature a precision-ground, chrome-plated hardened 52100 steel spherical ball, 1045 carbon steel body, and nylon/PTFE compound molded race. Ideal for low to moderate load applications where parts lubrication is not desirable.

Bearing Selection Guide

Factors to consider include unit costs, desired life, load ratings, operating environment, maintenance, and mounting configurations. Testing in the actual operating environment is recommended to determine if a particular bearing unit is suitable for a given application.

LOAD RATINGS FOR BALL BEARING UNITS

Dynamic load capacity is the max. constant radial load that a bearing can support for 1 million revolutions (at 33⅓ rpm for 500 hr.). **Static load capacity** is the max. static load (nonrotating shaft) that a bearing can support without causing permanent deformation. **Max. speed ratings** are based on light loads and expressed by bore size: ½" = 6000 rpm, ⅝" = 5000 rpm, ¾" = 4500 rpm, 1" = 3500 rpm.

LOAD RATINGS FOR BRONZE AND UHMW-PE BEARING UNITS

Bronze and UHMW-PE bearings do not have moving parts and allow for smooth, low-friction motion between 2 solid surfaces. Their load capacities are expressed as a PV factor, which is calculated by multiplying P, the max. pressure in psi on the bearing surface, by V, the max. sliding velocity in surface ft. per min. on the shaft. Actual **PV factor** should not exceed rated max. PV. P and V are calculated using the following formulas:

$$P = \frac{\text{Bearing Load}}{\text{Bearing Dia. X Bearing Length}}$$

V = Shaft Diameter x Shaft rpm x 0.262*

* 0.262 is the constant used for sleeve bearings (dimensions in inches).

Dayton

Pillow Block and Flange Mount Bearings

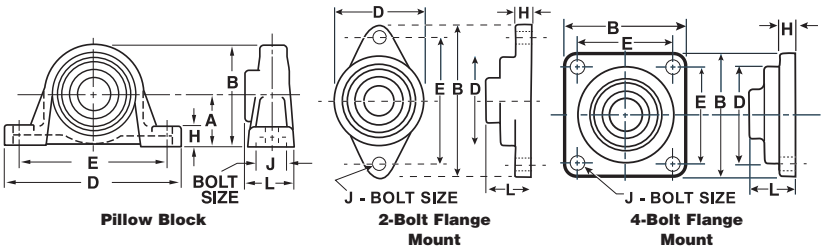
BALL BEARINGS

Prelubricated ABEC-1 tolerances. Wide inner race with setscrews. Neoprene seal. Temp. range: -30° to 200°F.

Rigid Type—Strong load support in limited mounting area.

Self-Aligning Type—Corrects misalignment up to 2°. Rustproof plated finish. Base mount is 2-pc. and flange mount is 1-pc.

BRONZE BEARINGS



Porous for continuous lubrication. Use in lighter-duty mounted bearing applications. Temp. range: -5° to 220°F.

Rigid Type (Pillow Block Only)—Press-fit plain sleeve bearings. Oiler hole for lubrication.

Self-Aligning Type—Press-fit flanged sleeve bearings. Rustproof plated finish. Large, felt-lined oil reservoir. Oil fillers on base-mount models can be rotated to 4 different positions. Flange-mount models have oil filler at 45° from bolt holes.

UHMW-PE BEARINGS

For washdown applications in wet/harsh environments. Self-lubricating. Interchangeable with most metal units. Temp. range: -60° to 180°F. USDA and FDA approved.

Details on page A1.

Pillow Block

4-Bolt Flange

2-Bolt Flange

Mounted Ball Bearings

NTN

- Temp. range: -20° to 250°F

Feature cast-iron housings. Elastomeric seal with "flinger" preserves lubricant and keeps contaminants out. Ultra-Class units have solid base construction for optimum load and shock stability and black oxide coating for superior environmental protection.

Pillow Block Mount
No. 3FCP4

2-Bolt Flange Mount
No. 3FCV3

4-Bolt Flange Mount
No. 3FCX4

Rubber Mount
No. 3FDF1

Mounted Ball Bearings

- Temp. range: -20° to 200°F
- 52100 Grade 10 chrome steel ball bearings

Pillow block and flange-mount bearings are prelubricated and regreaseable with a rubber seal and cast-iron housing. Rubber-mounted bearings are lubricated, not regreaseable, and feature a rubber seal and housing.

Nickel-Plated Bearings—For corrosive environments or where a decorative finish is preferred.

Air Handling and Rubber-Mounted Bearings—Designed to reduce noise and vibration in HVAC applications. Rubber mounted 52100 chrome steel ball bearing features rubber seals and is designed to reduce noise and vibration in HVAC applications.

Corrosion-Resistant Mounted Ball Bearings

- Setscrew locking
- Temp. range: -4° to 230°F for thermoplastic (PBT) housing units
- Temp. range: -4° to 248°F for stainless steel housing units

Solid, flat base construction prevents buildup of particles in difficult to clean areas. Self-aligning design provides optimal performance under high rotational speeds. Replacement inserts are interchangeable; stainless steel inserts offer superior corrosion resistance compared with zinc-plated inserts.

Note: See the extended product offering on Grainger.com®. For additional end caps, search for "bearing accessories." For additional stainless steel items, search for "stainless steel" and the product category, such as "stainless steel insert bearings."

Tapered Roller Bearings

Carry maximum combinations of radial and thrust loads simultaneously. Feature roller guiding inner ring construction. Roller bearing cones have steel cages and are nonlubricated. Use in lower-speed applications where there is a high degree of thrust or radial load, shock loads, and/or alternating thrust and radial loads.

Note: When replacing bearings, replace both cone and cup to ensure optimum performance and longer life.

Tapered Roller Bearing Assemblies

Commonly used in vehicles where the wheel bearings must handle large vertical (radial) and horizontal (axial) forces at the same time. Held together by an inner race that has a tapered surface for the bearings to roll against, and a flat inner radial surface to slide over a shaft. The outer race is the opposite design with the inner surface that's tapered, and the outer surface being flat. These tapered roller bearing assemblies are case-hardened steel construction and resist heat, heavy loads, humidity, and shocks. Suitable for use in hydraulic engines, gear motor transmissions, and locomotive axles.

Spherical Bearing
No. 19RT51

- Standard and metric sizes
- Automotive, marine, machining, robotics, semiconductor production, and more
- Popular brands you can trust

Grainger carries a wide range of bearings and bearing accessories for industrial and commercial applications—from agricultural disc bearings and angular contact bearings to unground radial ball bearings and wear sleeves, with plenty of choices in between. Click "Bearings" under Power Transmission on **Grainger.com®**.

SMITH Bearing®
Manufactured by A·C accurate bushing company

Cam Followers

Feature materials and finishes that provide minimum friction. Outer race is high-carbon chrome bearing steel, hardened and ground; inner race is low-carbon alloy steel, carburized and case hardened on raceway area. Full complement needle rollers are made from high-carbon chrome bearing steel, hardened, ground, and lapped. Additional styles and sizes are available on Grainger.com®

Stud Type and Heavy Stud Type—Stud Type models are for loads and shock that are moderate. Heavy Stud Type is for applications with high loads and/or heavy shock and where deflection is low.

Yoke Type—Features an inner race made for shaft or clevis mounting.

Single-Row Radial Ball Bearings

- Operating temp. range: -65° to 250°F

Motor-quality low-friction, 52100 chrome steel industrial ball bearings are suitable for radial and thrust load applications that require precise low-torque rotation. Use flanged bearings for easier plate mounting. Noncontact, stainless steel shields reduce contamination without adding drag. Light-contact rubber seals protect the bearing, but with slightly higher drag. All are lubricated with general-purpose grease. Meet industry standard ABEC specifications.

FAG

Self-Aligning Double-Row Radial Ball Bearings

Provide support for radial and axial loads on shafts that are constantly misaligning and deflecting. Double contact sealed with a glass fiber-reinforced polyamide cage.

Single-Row Radial Ball Bearings

NTN®

Prelubricated, permanently sealed bearings offer a lifetime of quiet, maintenance-free operation. Seal is made of synthetic rubber molded to a steel plate. V-shaped groove acts as a "flinger" to keep dirt out. Shielded bearings have a shield made of rust-resistant metal. Cages constructed of pressed steel. Bearings are individually wrapped and boxed to protect from contaminants during shipping and storage. Meet or exceed industry standards.

Double Sealed No. 6L026

Double Shielded No. 1L004

Needle Roller Thrust Bearings

Needle Roller and Cage Assemblies—Consist of an axial cage with needle rollers. Support axial loads in 1 direction. Use directly with surrounding hardened faces or separate thrust washers to provide the most compact thrust solution.

Thrust Washers—Use as fatigue liners for soft housing faces. Combine with needle roller and cage assembly to form a complete needle roller thrust bearing.

INA

Spherical Plain Bearings

ELGES double-sealed, spherical plain bearings support high radial loads with shocks that would damage rolling element bearings. Transmit motion and loads, but allow pivoting to prevent stress on adjacent structure. Suitable for supporting hydraulic cylinder connections to structures that can warp or twist. Maintenance type has lubrication holes and grooves on inner and outer components allowing grease to be pumped through the shaft or housing.

No. 4ZZT9

UHMW-PE Sleeve Bearings

No. 3ZN23

- Max. PV: 3000
- Temp. range: -60° to 180°F

UHMW-PE (ultra-high molecular weight polyethylene) provides excellent durability and low friction. Self-lubricating bearings. Great for applications involving slow rotational or linear motion. White color. USDA/FDA approved.

Bronze Sleeve Bearings/Bushings

Additional styles and sizes are available on Grainger.com®.

SAE 841: Oil-Impregnated—Sintered bronze bearings conform to ASTM chemical and physical properties. Vacuum-impregnated with SAE 30 oil that provides lubricant which is metered from the bearing to the shaft during rotation.

- Max. PV: 50,000
- Temp. range: 10° to 220°F

SAE 660: Cast-Bronze—Machined from continuous-cast C93200 bronze. Provide a uniform bronze structure throughout the bearing, free from porosity and hard particle inclusions.

- Max. PV: 75,000
- Temp. range: -40° to 500°F

Induction Bearing Heaters

- 60 Hz

Can be used on bearings, sprockets, gears, couplings, and sleeves. Raising blocks lift bearing heater crossbar to accommodate larger diameter bearings. Nos. 45ZM98, 45ZM99, and 45ZN01 include heat protective gloves rated to 300°F.

General Purpose Linear Actuators

- Linear motion: 10" to 12"; can be modified to shorter stroke lengths
- 115VAC, 60 Hz PSC motor
- Automatic thermal protection
- Limit switches: adjustable
- Duty cycle: 25%, 1 min. On/3 min. Off max.
- Single right-hand Acme screw

Adjustable internal limit switches provide control in positioning applications. For additional stroke modification, remove outer and translator tubes and replace with included driver nut. Single-lead, rolled-thread lifting screw for long life and smooth operation. Built-in worm gear is set for quiet gear reduction. Outer tube protects screw and nut from dust. Includes capacitor. UL Recognized (E37403) and CSA Certified.

Duff-Norton

Compact Linear Actuators

- Die-cast aluminum housing
- Aluminum inner and outer tubes; inner tube is keyed and polished
- Limit switches: nonadjustable
- Duty cycle: 20%
- Self-locking Acme screw gear drive
- Clevis mount
- IP66 sealing protection

Internal limit switches are factory-preset. Actuators are CE Compliant.

CONTROLLER/POWER SUPPLY

Use for AC applications. Features 120VAC input and 3 x 24VDC outputs. Use with Nos. 5FTF2 to 5FTF8 actuators only. Battery backup. 6-ft. AC cable. Use No. 5FTJ5 to connect actuator to controller/power supply. Actuator movement is not synchronized. If using multiple actuators on 1 controller, load must not exceed capacity of a single actuator.

HANDSET

Features 2 buttons with up/down arrows and snap-on hook. For use with Controller/Power Supply No. 5FTJ2 only. 5-ft. cable.

Warner Linear

- Aluminum alloy housing
- Totally enclosed nonventilated motor
- 25% duty cycle
- Clevis mount
- 115VAC are UL Recognized

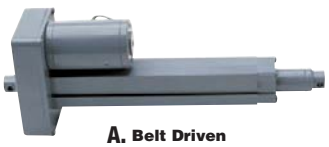
M-Track 1 Series—Compact, self-contained design is excellent for use in small spaces. Typical uses include throttle control, air vent opening, remote window/mirror positioning, and gate opening.

- Max. ambient temp.: 150°F
- Limit switch: nonadjustable
- CE compliant

K2 Series—Hybrid nut and screw design requires no brake. Intended for severe applications such as fertilizer gate control, mower decks, and implement lifts.

- Max. ambient temp.: 140°F
- Load-limiting clutch: nonadjustable

K2X Series—Ball screw with load control wrap spring brake. Excellent for severe, high-load applications such as commercial mower decks, spray booms, and construction equipment.



- Max. ambient temp.: 140°F
- Load-limiting clutch: nonadjustable

Duff-Norton

Industrial-Duty Linear Actuators

- Higher speeds and duty cycles
- Aluminum housing
- Can replace pneumatic and hydraulic cylinders
- Limit switches and clutch: adjustable
- Double male clevis mount

Dependable systems are designed to handle the rated load in tension and compression applications. Fast installation. Belt-driven models have a stainless steel translating tube. Gear-driven actuators have a zinc-plated translating tube. 12VDC models have permanent magnet motors. 115VAC thermally protected actuators have 60-Hz permanent split capacitor motors. UL and C-UL Listed, and CSA Certified.

** Duty cycle is based on 75°F ambient temperature. To prevent motor overheating, the actual operating time should be equally spaced throughout any period of elapsed time.*

Duff-Norton

Commercial-Duty Linear Actuators

- Lower duty cycles
- Die-cast aluminum housing
- Can replace pneumatic and hydraulic cylinders
- Limit switches: adjustable

Clevis-mount models have nonventilated enclosures. They feature a cross hole in the extension tube to speed installation. AC models have totally enclosed, permanent split capacitor motors with auto thermal protection and onboard capacitor; UL Listed. DC models have permanent magnet motors without thermal protection.

No. 2DGF8 motor is totally enclosed nonventilated. The actuator installs easily with pipe mount on the housing and a spherical rod end on the extension tube.

Electric Vibrators

Dayton®—Quiet-operating units have a pressurized aluminum housing and feature prelubricated bearings; oversize vacuum-impregnated windings that withstand vibration and high centrifugal force; and steel end caps. Use in bins, chutes, hoppers, screens, feeders, compaction tables, and concrete pumping. CE Certified.

Dayton Micro models are compact for use in small spaces.

- **Force adjustable with eccentric weights (except No. 1DYN5 is not adjustable)**
- **Continuous duty at 100% output force**

VIBCO® 2P and 4P Series—High-heat-resistant winding and oversize bearings help improve safety and extend service life. Terminal box offers easy connection and change of voltage. Meet ASTM and ASME standards. CE Certified.

2P models are designed for use on bins containing fine to granular materials, to pack coarse materials, and to consolidate concrete.

4P models are designed for bins containing lumpy or sticky materials, to pack light fluffy materials, and for typical screen vibrator uses.

- **Adjustable eccentrics for easy change of force**
- **Continuous duty motor**
- **Oversize electric motor for higher safety factor (watts/lb. impact)**

VIBCO Small-Impact Line—Designed to activate small hoppers, screens, chutes, tables and filling machines where a small shake is needed. Compact, noiseless vibrators help provide controlled flow of all materials, including fine powders, flakes, pills, bottle caps, and jars. Meet ASTM and ASME standards.

Heavy-duty Nos. 4HR13, 4HR14, 4HR16, and 4HR17 have oversize bearing, and the end bell is cast iron for extra-long life.

- **Speed and force can be adjusted with rheostats or speed adjusters**
- **Nos. 4HR18, 4HR19, and 6L733 have a continuous-duty CE Certified motor with convenient 115V plugin**

No. 6L736

Electric Vibrators with Adjustable Speed and Force

- **Continuous duty 950 to 2500 vpm**
- **Intermittent duty 2500 to 4000 vpm**
- **1 phase**

Heavy-duty vibrators' easy speed/impact dial control helps keep even hard-to-move materials in motion. The 115V plug fits standard outlets; with the TENV housing, these vibrators are great for outdoor and indoor use.

12VDC Vibrators

Dayton™ VIBCO VIBRATORS

Battery-operated units are great for mobile applications. They are totally enclosed, watertight, and weather-resistant for use on farm equipment, heavy dump trucks, tailgate spreaders and salters, concrete pumps, and screens. Also for cleaning and to aid the flow of material from bins and chutes. Big Bertha™ standard dump truck vibrator No. 6L765 comes with a wiring and mounting kit.

Fluidization Nozzles and Vibrating Bin Aerators

Dayton™

Fluidization Nozzles—Emit a continuous low-pressure air flow to keep dry powders and granular products moving efficiently through bins or silos.

Bin Aerators—Devices combine product aeration with an additional slight vibration on the silo wall to aid flow of fine powdery materials inside silos or bins. Will not damage silos. No. 24A968 stainless steel construction is for use in more demanding applications.

- FDA 177-2600 Approved

No. 6L764

VIBCO VIBRATORS

Pneumatic Railroad Carshakers

- Max. 100 psi
- 1" NPT inlet port

Heavy-duty rotary vibrators can move even the most stubborn materials, with 30% less air consumption than comparable piston vibrators. Lightweight, portable, and easy to handle, they fit all standard wedge brackets on railroad cars. Virtually noiseless operation.

No. 6L764 is designed for unloading grain, cement, and similar materials. It includes an 18" flex hose with muffler and quick-disconnect fittings.

No. 4HV43 handles materials with moisture content as well as salts, clay-lime lumps, and like materials.

Dayton

Silent Pneumatic Turbine Vibrators

Turbine has integrated flyweights that rotate on 2 oversize ball bearings. Units provide high-frequency, controllable speed, and low-amplitude, gentle vibration. Aluminum housing. For use with applicators, silos, hoppers, piping, and chutes.

CLEVELAND VIBRATOR COMPANY

Silent Pneumatic Turbine Vibrators

Acetal plastic and stainless steel body construction. Great for use in cleanroom and other sterile environments. Have very low air consumption to force ratio. Grade 5 mounting, fasteners included. No lubrication required.

VIBCO VIBRATORS

Silent Pneumatic Turbine Vibrators

Vibrators make no more noise than an electric motor. Maintenance-free, no lubrication required. Use 30% less air than comparable pneumatic vibrators and outlast ball and piston vibrators 3 to 1.

VS Series—For rough applications or where exhausted air will not affect production. Simple, compact design. CE and ATEX Certified.

BVS Series—Threaded exhaust for closed-air environments and other applications where exhausted air must be remotely discharged. CE and ATEX Certified.

BBS Series—For continuous duty in small applications such as parts feeders, tracks, and foundry matchplates. Versatile 1-bolt mount. CE and ATEX Certified.

CCF/CCL Series—For heavy-duty applications on large bins, hoppers, chutes, packing tables, screens, and concrete forms.

GIO Series—Can be used with all types of bins that contain fine to granular materials, or for packing coarse materials and unjamming parts in conveyor lines, chutes, and pipes. Corrosion-resistant housing has excellent resistance to solvents. Single-bolt mount for maximum flexibility.

MLT Series—Prelubricated for continuous duty and maintenance-free operation in sanitary applications or where harsh chemicals are present. Threaded exhaust ports seal the system to help you maintain a clean environment. MLTSS HA model vibrator No. 30FW99 features high amplitude, and is better suited for lumpy or sticky applications. MLTSS HT model vibrator No. 30FX02 and MLT HT vibrator No. 30FW95 are suited for higher temperature applications.

MHI Series—Same as MLT Series but designed for intermittent duty, to produce high frequency and maximum forces. MLI HT model vibrator No. 30FW88 designed for higher temperature applications. Washdown-safe.

Pneumatic Ball Vibrators

DAYTON®

Suitable for continuous operation in harsh outdoor conditions with small- to medium-size hoppers, bins, chutes, and pipes. Anodized aluminum housing. Maintenance-free when used with filtered/lubricated air. CE Certified.

VIBCO®

Simple ball design is built for rough use and continuous operation on a wide variety of hoppers, bins, and chutes. Clean air and lubrication are recommended for longer life. Threaded exhaust ports.

V and BV Series—V series units are built to fit in minimal space locations. BV series vibrators are designed with industry-standard bolt pattern for easy interchange.

BB Series—Built for small to medium amounts of vibration on laboratory equipment, small hoppers, parts feeders, chutes, and match plates.

Pneumatic Piston Vibrators

DAYTON®

Cast-iron vibrators are maintenance-free when used with filtered/lubricated air. Start in every mounting orientation to keep material flowing from bins, hoppers, chutes, and pipes. For sticky, coarse, or high-moisture materials. Nos. 1DYR1 and 1DYR2 are CE Certified.

VIBCO®

High-impact and efficient energy transfer ensure a smooth flow of material through bins, chutes, and weigh batchers. Can be used in any mounting orientation. Lubrication required. For industry, mining, chemical plants, plastics, manufacturing, foundries, and paper plants. CE Certified.

10 Series—Basic vibrators for foundry match-plate applications feature all-steel construction with end-mounted single attaching head.

50 Series—All-steel construction withstands abuse and handles tough flow applications including sticky, high-moisture, and coarse materials. Hardened ground piston for long life. No. 4HT60 long-stroke, low-frequency version is great for material packing applications.

55 Series—Low-cost, 1-pc. cast-iron housing, and only 3 parts, total.

CLEVELAND

Dual-diameter piston allows units to be mounted at any angle without use of springs. Excellent for automatic parts track vibration, packaging/filling machine, and small bin and hopper applications. Include mounting fasteners and push-fit hose connections for quick setup.

All models have a 304 stainless steel housing. Nos. 18K850 and 18K852 have mild steel end caps; for use in manufacturing and packaging industries. No. 18K851 has 304 stainless steel end caps; well-suited for chemical and pharmaceutical industries.

Schneider Electric

Altistart® Soft Starters

Adjust current inrush to protect motors from mechanical shock and stress during motor start-ups and help reduce utility costs. Set both initial voltage and ramp-up timing. Ambient temp.: -10° to 40°C. Suitable for fans, pumps, conveyors, compressors, saws and sanders, and mixers and agitators.

No. 6VMD5

ALTISTART 01N1 AND 01N2

All feature Power "On" and "Full Voltage" LEDs.

01N1 models have a 1- to 5-sec. soft start adjustment dial (no soft stop).

01N2 models feature 1- to 10-sec. soft start and soft stop adjustment dials. Voltage boost (kickstart) logic input. 2- or 3-wire compatible. For use with TeSys U-line (no separate control voltage required), GV2, GV3, or other motor starters.

No. 6VLZ3

ALTISTART 22 AND 48

Rated for 6 standard starts per hour. An RJ45 Modbus port enables use with a Modbus network connection, remote keypad, or SoMove PC software.

22 Series units feature 1 PTC probe analog input, 3 logic inputs, and 2 relay outputs.

48 Series units feature 1 PTC probe analog input, 4 logic inputs, 1 analog output, 2 logic outputs, and 3 relay outputs. Nominal motor current can be adjusted from 0.4- to 1.3-times the starter nominal current.

Hybrid and Digital Adjustable Frequency Drives

No. 13E660

No. 13E661

No. 13E662

No. 13E632

No. 13E645

- Digital models operate with GFCI circuits

Provide overload protection, prevents motor burnout, and eliminates nuisance tripping. Suitable for constant torque and variable torque (HVAC) applications. Hybrid drives do not require programming and utilize an analog interface, with trimpots and settable jumpers, to make adjustments such as input voltage, min. and max. frequency, acceleration, deceleration, and motor horsepower. Digital drives contain a keypad display with LED status indicators. Simple to program; all similar functions are presented in common groups (CSP™). NEMA 4X/IP65 models are housed in a rugged die-cast aluminum enclosure with hinged covers; ideal for harsh indoor/outdoor applications that may require watertight integrity. UL Listed.

Note: For Adjustable Frequency Drive Accessories, go to Grainger.com®, and search for "Liquid Tight Fittings for NEMA-4 Controls."

AC Adjustable-Frequency Drives

Dayton

No. 32J570

- IP20

Provide overload protection, prevent motor burnout, and eliminate nuisance tripping. Feature flux vector compensation with static auto-tune that provides excellent speed regulation with high-torque loads throughout the entire speed range. Local/remote key can be used to switch from process control to manual control if a process fault occurs. Electronic inrush current limit eliminates harmful inrush AC line current during power-up. Five isolated multifunction inputs with sink or source mode control logic, 1 analog input, 1 multifunction output relay, and 1 analog output. Built-in potentiometer changes motor speeds. Regeneration protection eliminates tripping due to high bus voltage caused by rapid deceleration of high inertial loads. Undervoltage and overvoltage protection shuts down the drive if the AC line input voltage goes above or below the operating range. Short circuit protection shuts down the drive if a short circuit occurs at the motor, phase-to-phase. UL Listed.

Adjustable-Frequency Drives, HVX Series

Designed for HVAC, pump, and fluid control applications. NEMA 12 models feature a metallic housing. Drives feature 3-phase AC input, 60/50 Hz, and 3-phase output variable speed/frequency 0 to 320 Hz. 3% AC line reactor and EMI/RFI filter standard. Standard I/O includes 0-10VDC, 4-20mA, 6 digital inputs, 2 NO/NC outputs, and 1 analog output. Frequency control (V/f) and open-loop sensorless vector control. Backlit LCD English HOA keypad/terminal/network control. Protections: overcurrent, overvoltage, undervoltage, earth fault, input phase and motor phase supervision, overtemp., and motor overload, stall, and underload. UL Listed, CSA and CE Certified.

Note: For Adjustable Frequency Drive Accessories, go to Grainger.com®, and search for "Eaton Variable Frequency Drive Accessories."

No. 20RA39

Adjustable-Frequency Drives, DC1/DA1 Series

Designed for use with 3-phase inverter-duty motors and feature a sensorless flux vector to provide optimal motor performance for low-speed, high-starting torque applications. Drives feature 3-phase AC input, 60/50 Hz, and 0 to 500 Hz variable speed/frequency output. Feature selectable, LED readout. DC1 models are compact and work well in simple applications. Fast commissioning with 14 basic parameters and easy mounting and installation. DA1 models are ideal for demanding, speed-dependent jobs including lifting or tractive applications. Include integrated EMC filter and braking transistor. All are UL Listed and CE Certified.

Note: For Adjustable Frequency Drive Accessories, go to Grainger.com®, and search for "Eaton Variable Frequency Drive Accessories."

Altivar 212

Altivar 630

Schneider Electric

AC Adjustable-Frequency Drives, Altivar® 212 and 630

- Enclosure rating: IP20

Suitable for variable-torque applications such as air-handling supply and return fans, ventilation fans, exhaust fans, cooling tower fans and pumps, hot water and chilled water pumps, domestic water supply pumping, and fountain pumps. See Grainger.com® for additional or higher HP ratings and Type 1 Conduit Entry Kits.

Altivar 12

Altivar 320

Schneider Electric

AC Adjustable-Frequency Drives, Altivar® 12 and 320

- Enclosure rating: IP20

Ideal for constant-torque simple machines such as conveyors, mixers, gate control, machine movement, small pumps and fans, and positive displacement pumps. Perfect replacements for reversing motor controls and 2-speed motor controls. See Grainger.com® for Conduit Entry Kits.

No. 14L808

Schneider Electric

AC Adjustable-Frequency Drives, Altivar® 71

- Enclosure rating: IP20

Quick-start drives provide excellent torque performance and speed regulation. Large, easy-to-read customizable display uses plain text words and features a navigation wheel that allows users to scroll through dropdown menus. Integrated Modbus/CANopen port allows easy integration into automation systems and also provides other optional communications connectivity. Excellent for constant torque applications like conveying, hoisting, grinding, and crushing.

Note: Additional Type I Conduit Entry Kits are available; see Grainger.com®.

Altivar 212
No. 13E168

Schneider Electric

Enclosed AC Adjustable-Frequency Drives, Altivar® 212

- NEMA Type 12 enclosure
- Help reduce energy consumption by up to 30%

Use drives to adjust motor speed. Help lower installation costs by eliminating the need for throttling valves, dampers, or inlet guide vanes that are typically used in fluid control applications. Excellent for air or fluid applications including HVAC supply and return fans, exhaust and ventilation fans, cooling tower fans and pumps, chiller water and hot water pumps, and domestic water pumps.

Schneider Electric

S-Flex Drives

- NEMA Type 1 enclosure

Compact drives are designed specifically to provide commercial pump and fan start-up programming with the simplest operation and quickest payback. Excellent for HVAC applications in residential high-rise and mixed-use buildings, commercial office buildings, and in schools and campus environments.

Fuji Electric

AC Adjustable-Frequency Drives, FRENIC-Mini C2

- Accept 4 to 20mA, 0 to 5VDC, or 0 to 10VDC inputs
- Output frequency: 0 to 400 Hz
- PID control function
- Built-in Modbus RTU
- Synchronous motor control

Compact design for areas with limited space; zero clearance required when mounting side-by-side. Automatic energy savings reduce motor loss and electric costs. High starting torque. Soft-switching insulated gate bipolar transistors (IGBT) allow use with standard general-purpose motors. Include built-in dynamic brake control, single-turn trim pot for speed control, and LED display. For use in fans, blowers, conveyors, machine tools, and other industrial equipment. C-UL Listed and CE Certified.

Note: Do not use with hazardous location motors. Contact your local Grainger branch for complete specifications.

EATON

Adjustable-Frequency Drives, DG1 Series

- Graphic LCD display and keypad
- IP21 and IP54 enclosure

These general purpose drives are designed for more demanding commercial and industrial applications. These drives feature Active Energy Control for increased efficiency, safety, and reliability. Additional features include: brake chopper; dual overload ratings—110% variable torque, 150% constant torque; integrated common mode reduction 5% DC link choke with input surge; EMI/RFI filters; real-time clock; local/remote operation from keypad and 2 configurable soft keys; external auxiliary control capability; standard I/O-8DI, 1DO2AI, 2AO, 3 relays; Ethernet IP and modbus communications; and 2 expansion slots to support additional I/O or communication protocols.

No. 5JJ60

No. 5JPF3

Adjustable AC Voltage Supplies

Operable on 60/50 Hz at ±10% rated line voltage. For universal, shaded pole, and PSC (permanent split capacitor) 1-phase AC motors. Suitable for use in fans, blowers, pumps, vibratory feeders, and heating and lighting applications.

Note: Check with motor manufacturer before using. Not for use with split-phase or capacitor-start motors.

CHASSIS

Supplied with speed pot, knob, and dial plate.

NEMA 1

Feature rugged housing, power On/Off switch, power indicator lamp, front-access fuse protection, and input and output cords and plugs.

120VAC

Include a standard male wall plug with 18" cord and female output connector integral to housing.

240VAC

Include 6-ft. input and output cords. Cord leads are prepped for wiring to suitable connector.

DC Adjustable-Speed Controls

- **Built-in transient and surge suppression**

For permanent magnet or shunt-wound DC motors and gearmotors. Solid-state speed controls convert line voltage input to full-wave DC power on constant- or diminishing-torque applications. No. 4Z829 includes isolated voltage/current follower input with an auto manual switch. No. 13A944 includes an isolated 4-20 current follower only.

DAYTON®

- Adjustable min./max. speed and IR compensation
- Speed regulation: ±1%

DART

- Adjustable min./max. speed and IR compensation
- Speed regulation: ±1% with armature voltage feedback and ±0.5% with tach feedback
- Chassis models include speed pot, knob, and dial plate

Operable on 60/50 Hz at ±10% rated line voltage. Inhibit circuit allows Start/Stop without breaking AC lines. No. 2LHT5 features electronic safety interlock. Agency standards: Nos. 6Z385, 6Z386, 2LHT6, and reversing/cycling chassis models are UL and C-UL Listed. All others are UL and C-UL Recognized. Nos. 2M510, 5DYG9, 2LHT5, and 2LHT4 are also CE Certified.

Reversing/Cycling

- Cycle rate: 3 cpm

Provide instant reversing, precise stopping, or cycling. Fit industry standard footprint for both vertical and horizontal mounting. Automatic dynamic braking on power loss. Zero-speed detect circuit eliminates contact arcing and motor plug reversing.

Note: No. 2M511 has a cycle rate up to 30 cpm. No. 2LHT6 is reversing only, and is not a cycling control.

90/180VDC Field Programmable Closed Loop Controls

DART CONTROLS

- NEMA rated 4X (panel mount), 4, and 12
- Support any AC voltage from 85 to 265VAC, 60/50 Hz
- Pulse generator required; sold separately, this page
- For best results, recommend 500 pulses/min.

Designed for use with 90/180V permanent magnet DC motors and gearmotors. Microprocessor-based with nonvolatile memory. Easy front-panel programming with lockout capability. Set speed can be displayed in rpm, fpm, gpm, process time, or other engineering units. Digital closed loop accuracy ±½ rpm. ½" programmable digital display features adjustable intensity and shows any time or rate base units. Operate in master or follower modes. Sturdy aluminum case construction. Screw-type terminal strip for easy installation.

DC Tachometer and Pulse Generators

DART CONTROLS

TACHOMETER/PROCESS METER

- 4-digit ½" LED
- NEMA 4X rating (faceplate with supplied gasket)
- Includes option board for proximity sensor input

Microprocessor-based digital system can measure shaft speed lower than 1 rpm and can operate as a digital rate meter, timer, or process counter. Operates on 5V square-wave pulse supplied by pulse generator, sold separately. An onboard microcomputer equipped with sophisticated software, quartz crystal controlled reference frequency, and display updating on every pulse permits accuracy of ±0.04%. Offers a 5A, form C relay alarm output that can be adjusted for a number of trigger conditions. Selectable alarm output modes: low, high, window, or not window. Nonvolatile memory stores custom settings.

PULSE GENERATORS

- Operating temp. range: -10° to 45°C
- Max. shaft speed: 5000 rpm

Provide square-wave pulses with frequency proportional to shaft rpm of unit to which it is mounted. Stainless steel ball bearing, compact Santoprene™ rubber housing, and 6-ft. rubber-jacketed output cable with 3-wire 18 AWG conductors. Mount directly to motor shaft being monitored using single #10-32 screw.

Low-Voltage DC Adjustable-Speed Controls

DART CONTROLS

- Adjustable min./max. speed and IR compensation
- HP is adjustable by built-in trim pot
- Inhibit capability
- Free-wheeling diode
- Chassis models include speed pot, knob, and dial plate

Provide wide-range, adjustable-speed control of permanent magnet or shunt-wound DC motors and gearmotors on constant- or diminishing-torque applications. Controls operate on ±10% rated input voltage, with low-voltage compensation and transient voltage protection. Suitable for conveyors, assembly lines, packaging, food processing, silk-screening, and photo processing equipment.

12/24VAC CHASSIS SCR CONTROLS

- Compact panel mount
- Max. HP and current can be doubled with suitable auxiliary heat sink

NEMA 4/12 SCR CONTROLS

- Mounted speed pot and On/Off switch
- Internally fused

PULSE-WIDTH MODULATED

- Adjustable acceleration: Nos. 2LHT8, 2LHT9, 6YC43, 6YC44 are 0.5 to 8 sec.; Nos. 38EG40 to 38EG43 and Nos. 2LHT8 and 2LHT9 are 0 to 10 sec.
- All pulse-width modulated controls have fixed deceleration of 0.5 seconds

FET PWM design results in cooler, quieter motor.

NEMA Combination Motor Starters and Accessories

- 3-pole, 60/50 Hz, 600VAC max.
- Thermal units sold separately, see page 166
- Class RK5 (600V) fuses on page 178

Motor starter disconnect switches have a flange-operated visible blade switch. Fusible combination starters have a fusible disconnect switch and come complete with fuse blocks for RK5 type 600V fuses. Class R fuse clips sold separately. Circuit breaker combination starters feature a PowerPact® motor circuit protector.

GE Dayton

IEC Combination Motor Starters

- Short-circuit and motor overload protection
- 3-pole, 60/50 Hz
- 120VAC coil
- Self-protected, Type E
- 1NO auxiliary contact (GE includes 1NC)
- Hand/Off/Auto models have DIN rail-mount terminal blocks for external accessories
- 100VA transformer (where applicable)

Adjustable motor circuit protector eliminates the need for heater elements (thermal units). Starters have visual short-circuit indicator and LED pilot light. UL Listed, CSA Certified.

NEMA Magnetic Motor Starters with Solid State Overload Relays

by Schneider Electric

- Class 10/20 selectable thermal protection
- 3-pole, 60/50 Hz, 600VAC max.
- Accessories and replacement parts on page 163

Full-voltage starters start and stop 3-phase AC motors. Manual push-to-test and visible trip indicator. Trip-free construction allows overload relay to trip even if reset lever is blocked or in the reset position. Overload relay has heaterless construction and adjustable full load amp setting.

Normally open holding circuit contact allows 3-wire control. Angled contacts provide high contact pressure and positive seating. Spring-assisted gravity dropout on de-energizing quickly extinguishes any arcing. UL Listed and CSA Certified.

Type S, NEMA-Style Magnetic Motor Starters

- 600V max., 50/60 Hz

For full-voltage starting and stopping (also reversing for models indicated) of AC squirrel-cage motors. Requires an overload relay, sold separately, that provides motor overload protection. Reversing models consist of a full-voltage contactor and a Class 8536 starter that are mechanically and electrically interlocked; enclosed devices use horizontally arranged components. UL Listed and CSA Certified.

Contactor NEMA Size 3

Motor Starter NEMA Size 0

NEMA Magnetic Contactors and Motor Starters

- 3 pole
- Include 1NO aux. contact

UL Listed.

CONTACTORS

For use with resistance heating and capacitor circuits; may be used to control AC motors where overload protection is provided separately.

MOTOR STARTERS

Protect against motor overload on 3-phase motor circuits. Manual weld check. Toolless disassembly. Class 20 overload protection with visible trip indicator and manual reset. Motor starters without electronic overload relays require 3 heaters, see below for selection.

Electrically Held Type L

Electrically Held Type S

Mechanically Held Type LX

Multipole Lighting Contactors

by Schneider Electric

Open-type contactors have 120V coils operable on 50 Hz at 110V, 277V at 60 Hz. UL Listed and CSA Certified.

ELECTRICALLY HELD TYPE L AND MECHANICALLY HELD TYPE LX

Field-convertible contacts have normally open and normally closed indicators. Max. 8 normally closed contacts. Silver cadmium oxide double-break contacts.

ELECTRICALLY HELD TYPE S

Feature mixed load ratings (lighting and motors), factory-wired controls, and clearly marked termination points.

Lighting Contactors

- Rated 30A inductive and resistive
- 7.4"H x 4.2"W x 3.9"D
- Electrically held

Design allows additional power poles to be added to a max. of six 1- or 2-pole blocks. Poles are supplied in the NO position on contactor. Up to 4 power pole blocks are field convertible to NC. UL Listed. Mechanically held contactors have built-in control module delays to minimize excessive operation from faulty control devices.

Motor Logic™ Overload Relays

- 3-phase, 60/50 Hz, 600VAC
- 3:1 current adjustment range
- Class 10/20 selectable thermal protection

Heaterless construction with adjustable full-load amps. Relays are protected against phase loss and phase imbalance. Mount separately or use to retrofit an existing Square D Type S starter. Select overload relay by full load amp current range.

NEMA Manual Motor Starters

SQUARE D by Schneider Electric

- 600VAC max.; 250VDC max.
- Required thermal units sold separately, see page 166
- Auxiliary contacts Nos. 1H589 and 1H590 available on page 163

Push-button motor starters provide On/Off operation and overload protection for small 1-phase, 3-phase, or DC motors. For use on small machine tools, pumps, fans, and conveyors. UL Listed.

Note: NEMA Type 12 enclosures can be converted for 3R outdoor use by drilling two ⅛" holes in the bottom.

EATON

Manual Motor Starters

NEMA manual starters provide control and overload protection to single- and 3-phase motors. Feature straight-through wiring and field-mounted auxiliary contacts. Come standard with a lockout device to lock motor in Off position. NEMA rated 1, 4, 7, 9, and 12.

NEMA Fractional Horsepower Manual Starters

SQUARE D by Schneider Electric

- 1-pole 277VAC max.; 2-pole 277VAC/230VDC max.
- Required thermal units sold separately

Provide overload protection and manual On/Off control for small motors. Toggle-operated fractional HP starter for single-phase motors up to 1 HP. 2-pole starters can also be used with DC motors to ¾ HP. Manual reset.

Binder head screw terminals are suitable for #10 or smaller copper wire and are accessible from the front. For use in fans, conveyors, pumps, and small machine tools.

No. 1H385

Thermal Unit Selection Guidelines

All thermal unit specifications are based on the motor and controller being operated in an ambient temp. of 40°C (104°F) or less.

A Regular Enclosure is defined as the standard-size enclosure that is included with an "enclosed" starter. The Large Enclosure column should be used when the starter is being installed in an oversized control panel or cabinet.

1. Determine motor full load current (amperage) rating and service factor.

2. Motor and controller in same ambient temp.:

For 1.15 to 1.25 service factor motors, use 100% of motor full load current for thermal unit selection. For 1.0 service factor motors, use 90% of motor full load current for thermal unit selection.

3. Motor and controller in different ambient temp.:

If motor ambient temp. is 18°F higher than motor starter's ambient temp., derate full load current value from step 2 by an additional 10%. If motor ambient temp. is 18°F lower than motor starter's ambient temp., increase full load current value from step 2 by an additional 5%. Use the resultant full load current value for thermal unit selection.

4. Locate the proper thermal unit selection column using the thermal unit code associated with the motor starter.

5. Match motor full load amperage to the closest thermal unit code without going over.

6. Do not exceed amp rating of motor starter.

7. 1-phase starters require 1 thermal unit. 3-phase starters require 3 thermal units.

No. 1H600

No. 1H669

SQUARE D by Schneider Electric

Thermal Units for NEMA Motor Starters

- 1-phase starters require 1 thermal unit
- 3-phase starters require 3 thermal units

NEMA Manual Motor Switches

Wiring Device-Kellems | by Schneider Electric

Nonreversing switches provide On/Off control of 1- or 3-phase AC motors where overload protection is not required or is provided separately. Open switches fit standard single-gang switch boxes and work with any cover plate that has a standard toggle cutout.

All switches rated 1, 1½, 2 HP at 90/115/230VDC respectively. 2-pole, 10 switches rated 2 HP at 115/230V. 3-pole, 30 switches are rated 7½ HP at 230V and 10 HP at 460 to 575V. For use in small machine tools, pumps, fans, conveyors, and electrical machinery. Also for nonmotor loads such as resistance heaters. UL Listed.

IEC Magnetic Motor Starters

- 3-phase applications, 600VAC max., 60/50 Hz
- Electronic overload with Class 10A, 10, 20, and 30 selectable protection
- IP20 rating, NEMA 1 metallic enclosure
- 5:1 overload adjustment range

Feature Eaton XT/DIL M Series motor starter and motor overload protection with Eaton C440 electronic overload.

Enclosures are easily mountable, and accessible with only 1 screw to close the enclosure. Come with 1 normally open auxiliary contact for 3-wire control purposes. Feature both manual and automatic reset options as well as selectable trip class. Low-wattage coils. Provide phase loss and unbalance protection. Models with 24VAC and DC coils are available on Grainger.com®. UL Listed.

IEC Contactors and Overload Relays

- IP20 rated
- Contactors rated: -25° to 50°C
- Relays rated: -25° to 65°C

Designed for industrial applications, Eaton XT/DIL M Series heavy-duty contactors and reversing contactors can be combined with electronic overload relays to make a starter. All contactors are available for panel and DIN-rail mounting. 690VAC max., 50/60 Hz. Feature low-wattage coils, auxiliary contacts, front access coil terminals, toolless assembly, and dual clamps for multiwire. Electronic Overload Relays have selectable trip class and phase unbalance, to protect motor life. Feature 5:1 current adjustment, Class 10A, 10, 20, 30 selectable protection, and are self-powered. Status LED indicates the overload operational status. UL Listed, CE Approved, and CSA Certified. ATEX Listed and RoHS Compliant.

IEC Contactors, Motor Starters, and Overload Relays

Dayton

CONTACTORS
- 3-yr. warranty
- DIN rail or panel mount

For industrial motor control. Mechanical life: 10 million cycles. 3-pole contactors should be paired with overload relays. 9 to 32A 3-pole contactors have 1NO auxiliary contact. 40 to 95A 3-pole contactors have 1NO/1NC auxiliary contacts. UL and C-UL Listed.

OVERLOAD RELAYS
- Bimetallic
- For 3-phase applications
- Compatible with Dayton® IEC contactors

Feature continuously readjustable current settings. Have temperature compensation, tripped indicator, test button, stop button, manual and automatic reset button, finger-safe terminals, and 1NO/1NC contacts. UL and C-UL Listed.

AUXILIARY CONTACT BLOCKS
- Front mount
- Compatible with Dayton® IEC contactors

Allow for additional indicator lights, signals, or alarms.

TIME DELAY AUXILIARY CONTACT BLOCKS
- Front mount
- Compatible with Dayton® IEC contactors

Timer combines with a contactor to create a time delay contactor.

REPLACEMENT COILS
- 60 Hz
- Compatible with Dayton® IEC contactors

Coil can be changed without replacing the entire block.

Schneider Electric

TeSys™ IEC Contactors and Overload Relays

For industrial motor control applications, combine a contactor with an overload relay to make a complete motor starter. Rated 600VAC. Saddle clamp terminals. DIN rail- or panel-mount. UL Listed, CSA and CE Certified.

CONTACTORS

Inclined wire guides and captive screws. 60/50 Hz coil. IP20 touch-safe with removable terminal cover.

OVERLOAD RELAYS

For 3-phase applications. Bimetallic elements. Class 10 trip characteristics with 1-phase sensitivity. Ambient compensated. Adjustable current range. Lockable, sealable, manual/auto reset, test trip. Mount to underside of contactor.

- 50/60 Hz
- Enclosures not included

Feature a modular design that permits various configurations. Dual-mounting system. Mechanical life: 10 million operations, and electrical life: 1 million operations. Finger and back-of-hand protection. UL Listed and CSA Certified.

OVERLOAD RELAYS

- Trip Class 10

Feature phase loss sensitivity, ambient temperature compensation, automatic or manual reset, trip indication, and trip test.

AUXILIARY CONTACT BLOCKS

Contacts rated 10A, A600. Max. 600V.

Miniature IEC Contactors and Overload Relays

- 3- and 4-pole configurations
- IP20 rated
- 12 to 600VAC, 12 to 220VDC

Eaton XT/DIL M Series miniature contactors are available with screw or spring-cage terminals and panel or DIN-rail mounting. Miniature overload relays mount directly to mini-contactors. Feature phase failure sensitivity, manual and automatic reset by selector switch, Test/Off button, and trip-free release. Suitable for light-duty applications like hoisting, packaging, material handling, heating, lighting, and automation systems. Quiet operation. Contact dimensions: 2.28"H x 1.77"W x 2.05"D. UL Listed, CSA, and CE Approved.

TeSys™ Minicontactors and Overload Relays

DIN rail- or panel-mount general-duty TeSys minicontactors and overload relays fit into small spaces. Combine a minicontactor with an overload relay to make a complete motor starter. Rated 600VAC. Screw-clamp terminals. UL Listed and CSA Certified.

MINICONTACTORS

Mechanical life: contactors, 10 million operations; reversing contactors, 5 million operations. Inclined wire guides and captive screws. IP20 touch-safe with removable terminal cover.

OVERLOAD RELAYS

For 3-phase applications. Bimetallic elements. Class 10 trip characteristics with 1-phase sensitivity. Ambient compensated. Adjustable current range. Lockable, sealable, manual/auto reset, test trip. Mount to underside of contactor.

Definite Purpose Contactors

Square D 8910DP Series—Quick-connect terminals and binder head screws enable easy straight-through wiring. Double-break contacts. Mechanical life: 500,000 operations. Compact design. Box lugs are standard on 40A and higher models. Auxiliary contact modules snap onto either side of standard models. Suitable for air compressors, agricultural equipment, pumps, food service equipment, and HVACR equipment. 277VAC and 480VAC coil voltages available on Grainger.com®. UL Recognized and CSA Certified.

- 600VAC max.
- Industry-standard mounting

Dayton®—Captive screw and quick-connect terminals for easy wiring. Double-break contacts. Suitable for HVACR equipment. UL Recognized.

- 3-year warranty
- 60/50 Hz
- Nonreversing

Eaton C25 Series—Feature a compact, efficient design with a low VA coil and straight-through wiring. Housing design limits dust and other contaminants from magnet structure and reduces noise. 3- and 4-pole contactors are dual-rated for inductive and resistive ratings. Quick connect terminals and box lugs come standard on all contactors. UL Recognized.

- Direct replacement to most HVAC contactors
- Mounting holes align to 60 amps
- 600VAC max.

Definite Purpose Motor Starters

- Melting alloy overload block
- 600VAC max.
- Industry-standard mounting
- 2-pole starters require 1 thermal unit
- 3-pole starters require 3 thermal units
- Match thermal unit code to thermal units on page 166

Quick-connect terminals and binder head screws enable easy straight-through wiring. Trip-free reset mechanism. Double-break contacts. Mechanical life: 500,000 operations. Compact design. Box lugs are standard on 40A and higher models. Auxiliary contact modules snap onto either side of standard models. Suitable for air compressors, agricultural equipment, pumps, food service equipment, and HVACR equipment. UL Recognized and CSA Certified.

Eaton Enclosed Definite Purpose Contactors and Starters

Dual-rated with inductive and resistive ratings. Quick connect terminals are standard. Contactor design limits dust and other contaminants from magnetic coil. Reduce or eliminate noise. Feature compact design with low VA coil and straight-through wiring. Motor starters require 3 thermal units (1 pkg.), sold separately. UL Listed, CSA and CE Certified. RoHS Compliant.

Vibration Switches

Feature SPDT and DPDT switch options, and are available with or without remote reset and a variety of voltages for the reset coil. Aluminum switches do not require external power to operate, and are explosion-, flame-, and weatherproof. NEMA 4 and 4X. UL and C-UL Listed. Plastic switches feature a weatherproof NEMA 4 housing and are CSA Certified.

SIEMENS

Heavy-Duty Safety Switches

Higher amp ratings and NEMA 4X and 12 enclosures are available on Grainger.com®.

NOTE: 600V 30 to 200A switches are field adjustable for Class J fuses.

SIEMENS

Designed with quick-make, quick-break switching action for severe applications. Feature highly visible self-aligning blades to ensure positive contact and highly visible On/Off handle indication. Padlockable cover latch and handle.

SQUARE D

Designed to withstand short circuits up to 200kA rating when used with, or protected by, Class R fuses with Class R kits installed (this page). See Class RK5 fuses on page 178. Switches meet NEMA Standards KS1-1990, Enclosed Switches, and UL 98. UL Listed.

HUBBELL® Wiring Device-Kellems

Switched Enclosures

TWIST-LOCK® ENCLOSURE

Nonmetallic enclosure has large, replaceable, gasketless door and hinge assembly for easy access and weatherproofing. Receptacle not included; order separately. Use with any NEMA rated 2-pole, 3-wire to 4-pole, 5-wire Twist-Lock® receptacle.

CIRCUIT-LOCK® DISCONNECT SWITCH ENCLOSURES

Nonmetallic enclosures have strong, galvanized steel internal frame that bonds grounds and a watertight conduit fitting. They enclose disconnect switches that provide On/Off switched control of direct-wired motor loads.

No. 3D383

Air Conditioning Disconnect Switches

For indoor or outdoor use.

SIEMENS

General-Duty Safety Switches

Fast and reliable switches are primarily intended for use with circuits where the available current is less than 100,000A when used with Class R or T fuses or 10,000A max. used with Class H fuses. Feature quick–make, quick-break, and visible blade switching action. Padlockable in OFF position and door in closed position. Suitable for use as service entrance equipment. Require equipment grounding kit; see page 175. Switches meet UL 98. UL Listed.

Double-Throw Safety Switches

Each switch is continuous-duty rated for its nameplate ampere value. Equipment grounding kits are available for service equipment and included in 30 to 100A DTU devices. NEMA Type 3R switches use bolt-on hubs; see page 175. All switches meet UL 98 Standard for Safety, Enclosed, and Dead Front Switches, and meet or exceed NEMA Standard KS1-1990.

IEC Disconnect Switches

Switches are suitable for use as a motor disconnect. "On/Off" indicator and built-in handle interlock that prevents cover removal in "On" position. OSHA lockout/tagout compatible and accepts up to three 8mm padlocks. UL Listed.

Class RK1

FERRAZ SHAWMUT IS NOW MERSEN

These fuses are more current-limiting than RK5 fuses to react more quickly to overcurrent. They have a rejection feature that prevents an accidental downgrade from a current-limiting system.

No. 1DG46

No. 1A698

Class RK5 Fuses

FERRAZ SHAWMUT IS NOW MERSEN

These fuses provide moderate current limitation for general use applications where more current-limiting RK1 fuses aren't needed. They have an interrupting rating (IR) of 200kA and have a rejection feature that prevents an accidental downgrade from a current-limiting system.

Midget Fuses

EATON BUSSMANN SERIES — FERRAZ SHAWMUT IS NOW MERSEN

- Fuse Size 1½"L x 13/32" dia.
- These fuses supplement the primary branch-circuit fuse or breaker to provide backup overcurrent protection for lighting, solenoid, motor, and transformer circuits. They are noncurrent-limiting, so they won't limit exposure to the full magnitude and duration of an overcurrent.

No. 1CR95

EATON BUSSMANN SERIES

No. 6F338

Class T Fuses

These are very small fuses that protect electrical feeders and branch circuits from overcurrent. They have an interrupting rating (IR) of 200kA and are not interchangeable with any other UL fuse class.

EATON BUSSMANN SERIES — FERRAZ SHAWMUT IS NOW MERSEN — MERSEN

UL Class CC Fuses

- Fuse Size 1½"L x13/32" dia.

These fuses provide a high interrupting rating and current limitation for overcurrent protection. Their rejection feature ensures a match with Class CC rejection fuse blocks and holders. These 600VAC fuses have an interrupting rating (IR) of 200kA.

Safe-Touch (Plug-In Cube) Time-Delay UL Class J Fuses

EATON BUSSMANN SERIES

- AC Voltage Rating 600VAC
- Plug In Body Style
- These are finger-safe time-delay fuses that tolerate temporary inrush currents without opening, which prevents nuisance-blowing. They have a square shape that provides a small footprint for limited-space applications and makes them compatible with finger-safe Class J fuse blocks and holders. They have a visual indicator to make it easier to identify blown fuses.

Class J Fuses

EATON BUSSMANN SERIES

- AC Voltage Rating 600VAC
- These fuses have a high interrupting rating for protecting against short circuits and are ideal for IEC motor starter applications. These fuses are not interchangeable with any other UL fuse class. They are current-limiting to prevent electrical damage by disconnecting circuits before they're exposed to the full magnitude and duration of an overcurrent.

Semiconductor Fuses

EATON BUSSMANN SERIES

These fuses provide overcurrent protection for solid-state components in power electronics applications. Also known as rectifier fuses, they are extremely current-limiting to prevent electrical damage by disconnecting circuits before they're exposed to the full magnitude and duration of an overcurrent.

No. 4XC87

Class L Fuses

- AC Voltage Rating 600VAC
- Bolt-On Body Style
- These fuses protect electrical feeders and service equipment from overcurrent. These fuses are not interchangeable with any other UL fuse class. Class L fuses bolt onto their mountings for a secure hold.

EATON BUSSMANN SERIES

Class G Fuses

- Cylindrical Body Style

These fuses protect against overcurrent in nondemanding applications. Each Class G fuse size will only fit its matching Class G fuse block or holder to prevent the wrong size fuse from being installed. They are not interchangeable with any other UL fuse class. These fuses have an interrupting rating (IR) of 100kA.

EATON BUSSMANN SERIES

Time-Delay UL Class H Fuses, Nonindicating

- Cylindrical Body Style
- These fuses have a 10kA interrupting rating (IR) for general purpose use. They have a fusible link that can be replaced after the fuse blows. These fuses tolerate temporary inrush currents to prevent nuisance-blowing but open when exposed to sustained loads and short circuits. These fuses have no indicator for identifying a blown fuse.

EATON BUSSMANN SERIES

Class K5 and H Fuses

These fuses are for general purpose use. They're highly sensitive to changes in current flow and open within seconds of being exposed to overloads and short circuits. They have no indicator for identifying a blown fuse. Class H fuses have an interrupting rating (IR) of 10kA. Class K5 fuses have an IR of 50kA and are current-limiting to prevent electrical damage.

EATON BUSSMANN SERIES

UL Class H Replacement Fuse Links

These fuse links replace a blown link in Class H renewable fuses. These metal elements restore function to the fuse, allowing the fuse body to be reused rather than replaced.

EATON BUSSMANN SERIES

Medium Voltage Fuses

These fuses provide overcurrent protection at voltages greater than 600VAC for use in medium-voltage transformers, feeder circuits, motor circuits, and fused switches. They meet American National Standards Institute (ANSI) design standards. The fuses are current-limiting to prevent electrical damage. **E-rated fuses** are for general purpose use. **R-rated fuses** are for backup applications. **PT-rated fuses** are for protecting potential transformers.

EATON BUSSMANN SERIES

Forklift Limiter Fuses

These fuses provide overcurrent protection for heavy-duty loads in lift trucks, scissor lifts, pallet movers, and other DC battery-powered equipment. They bolt onto their mountings for a secure hold. They have either a cylindrical body for standard installations or a flat body for use where installation space is limited. **ACK, ACL, and ALS Series fuses** have no indicator for identifying a blown fuse, so they're sometimes used with an indicating fuse block or cover. **ANL Series fuses** are time-delay and have a see-through window that reveals whether the fuse wire is intact or has melted. **ANN series fuses** are fast-acting and have a see-through window. The **fuse block** holds flat-body series ANL and ANN fuses.

Glass Fuses

EATON BUSSMANN SERIES — FERRAZ SHAWMUT IS NOW MERSEN

These fuses provide overcurrent protection for low-current circuits. They're used for applications where they won't be exposed to high heat that could shatter the glass. Their small, cylindrical body is see-through for checking whether the fuse wire is intact or has melted.

No. 1CC56

Ceramic Fuses

- AC Voltage Rating 250VAC

These fuses protect against overcurrent in high-current circuits found in AC or DC electronics, appliances, and electrical equipment. They have higher interrupting ratings and withstand higher temperatures than glass fuses. Ceramic fuses shows no outward signs when the fuse has blown, so they're typically tested with a multimeter or ohmmeter to check their function. **Fast-acting fuses** open within seconds of being exposed to overloads and short circuits. They are sensitive to changes in current flow and power surges. **Time-delay fuses** tolerate temporary inrush currents without opening to prevent nuisance-blowing, but they open when exposed to sustained loads and short circuits.

EATON BUSSMANN SERIES

Telecom Protection Fuses

These fuses open within seconds of being exposed to overloads and short circuits. They are highly sensitive to changes in current flow and don't tolerate temporary overload currents or power surges. Sometimes called alarm fuses, they trigger an LED or audio alarm when they've blown to aid fuse replacement.

EATON BUSSMANN SERIES

Time-Delay Plug Fuses

- AC Voltage Rating 125VAC
- Screw-In Body Style

These are medium- to heavy-duty fuses for protecting residential or industrial electrical circuits with motors, relays, or solenoids. These slow-blow plug fuses tolerate temporary inrush currents without opening.

No. 3W757

Fast Acting Plug Fuses

EATON BUSSMANN SERIES

- AC Voltage Rating 125VAC
- Screw-In Body Style

These are Type W fuses for protecting lighting, heating, and other residential and industrial circuits without motors. They open within seconds of being exposed to overloads and short circuits. Also called fast-blow plug fuses, they are highly sensitive to changes in current flow and don't tolerate temporary overload currents or power surges.

No. 1DC08

Plug Fuse Holders

EATON BUSSMANN SERIES

These carry screw-in plug fuses for overcurrent protection of motor circuits and supplemental protection of residential and industrial branch circuits. They have a threaded receptacle for the fuse and a lid that covers the fuse to protect against accidental contact with live clips. They're commonly used in equipment such as pumps, power tools, and HVAC blowers.

EATON BUSSMANN SERIES

Fuse Assortment Kits

These kits include multiple fuses of different styles, series, or amperage ratings for use in new installations or as replacements for blown or faulty fuses. They help reduce downtime by providing a supply of commonly used fuses for maintaining overcurrent protection on electrical systems and equipment.

EATON
BUSSMANN SERIES

Finger-Safe Fuse Blocks

These are IP20-rated blocks that enclose fuses to protect against accidental contact with live wires, clips, and terminals. Indicating-style fuse blocks have a visual indicator to make it easier to identify blown fuses for replacement.

EATON BUSSMANN SERIES

No. 1CV50

In-Line Fuse Holders

These are wire-mounted holders that connect anywhere along a circuit to protect specific lines. They allow these lines to be isolated in the event of a fault so that the rest of the wiring system won't be affected.

No. of Poles	Amp Range	Voltage Rating	Connector Type	Fuse Block Design	Item No.
In-Line Fuse Holders for Class CC & Midget Fuses					
Compatible Fuse Series AGU, ATM, ATQ, BAF, BLF, BLN, FLM, FLQ, FNM, FNQ, GGU, HC10S, KLK, KLKD, KLM, KTK, OTM, TRM					
1	0 to 30A	600VAC/DC	Crimp	Non-Breakaway	**1BW56**
1	0 to 30A	600VAC/DC	Crimp/Setscrew	Breakaway with Boots	**1CV50**
1	0 to 30A	600VAC/DC	Crimp	Breakaway with Boots	**6F453**
1	0 to 30A	600VAC/DC	Crimp/Setscrew	Non-Breakaway	**49ZU52**
2	0 to 30A	600VAC/DC	Crimp	Non-Breakaway	**49ZU55**
2	0 to 30A	600VAC/DC	Crimp	Breakaway with Boots	**49ZU56**
In-Line Fuse Holders for Glass & Ceramic Fuses					
Compatible Fuse Series 311, 312, 313, 314, 315, 322, 326, 3AG, ABC, ACG, GAB, GBB, GDL, GDV, GGC, GSA, MDA, MDL, MDQ, MDV, MDX, MMB					
1	0 to 15A	32VAC/DC	Wire Leads	Non-Breakaway	**1DL30**
1	0 to 20A	250VAC/125VDC	Crimp	Non-Breakaway	**1DD10**
Compatible Fuse Series SFE-20					
1	0 to 20A	32VAC	Wire Leads	Non-Breakaway	**1DL29**

EATON BUSSMANN SERIES

No. 1CV80

Panel-Mount Fuse Holders

These fuse holders have a cylindrical body that houses fuses and fits into electrical control panels and enclosures.

Amp Range	Voltage Rating	Connector Type	Fuse Cap Style	Mounting Hole	Item No.
Panel-Mount Fuse Holders for Class CC & Midget Fuses					
Compatible Fuse Series AGU, ATM, ATQ, BAF, BLF, BLN, FLM, FLQ, FNM, FNQ, GGU, HC10S, KLK, KLKD, KLM, KTK, OTM, TRM					
0 to 15A	600VAC	¼" Quick Connect	Screw Knob	1 1⁄64" dia.	**49ZU62**
0 to 30A	600VAC/DC	¼" Quick Connect	Screw Knob	⅜" x 13⁄16"	**1DW14**
0 to 30A	600VAC/DC	¼" Quick Connect	Screw Knob	1 1⁄64" dia.	**6F455**
0 to 30A	600VAC	¼" Quick Connect	Screw Knob	1 1⁄64" dia.	**49ZU60**
Panel-Mount Fuse Holders for Glass & Ceramic Fuses					
Compatible Fuse Series 215, 216, 217, 218, 235, 239, GDA, GDB, GDC, GDG, GGM, GMA, GMC, GMD, GSB, GSC, GSD, GSF, S500-506					
0 to 16A	250VAC/32VDC	⅜" Quick Connect	Screw Knob	½" x 29⁄64"	**6F456**
Compatible Fuse Series 311, 312, 313, 314, 315, 322, 326, 3AG, ABC, ACG, GAB, GBB, GDL, GDV, GGC, GSA, MDA, MDL, MDQ, MDV, MDX, MMB

0 to 10A	300VAC	Wire Leads	—	⅜" x 4⁄64"	**1CW04**
Compatible Fuse Series GLR, GMF, GRF, LGR, LMF, SLR, SMF					
0 to 12A	300VAC	Wire Leads	—	⅜" x 4⁄64"	**1CW08**
0 to 15A	300VAC	Wire Leads	—	⅜" x 4⁄64"	**49ZU57**

Fuse Reducers

EATON BUSSMANN SERIES

Adapt lower-rated fuses to fit higher-rated fuse blocks, fuse holders, and fused disconnect switches. They're used on fuses of the same class and voltage when switching from higher amperage to lower amperage ratings. These reducers maintain a strong electrical contact to help ensure proper fuse operation. UL Listed and CSA Certified.

No. 6F448

Square D Load Center Selection

To choose the proper Load Center for your needs, start by asking yourself the following:

- Do you need a Load Center (14½"W residential enclosure) or a panelboard (20"W commercial enclosure)?
- What type of service do you need: single-phase or 3-phase?
- Do you need an indoor or outdoor Load Center?
- What type of Load Center is required, Main Breaker or Main Lug? (Main Lug has no main disconnect in the load center.)
- What is the max. amperage size of the service?
- How many total spaces does the Load Center require?
- If QO is selected, will you require a Plug-On Neutral arc fault breaker Load Center?
- Verify the Short Circuit Current Rating (SCCR) of the voltage system to ensure correct Load Center for the application

QO® Load Centers

SQUARE D by Schneider Electric

- 120/240VAC
- Use only QO circuit breakers (see page 188)
- Accessories available; see Grainger.com® or call 1-800-GRAINGER (472-4643)

INDOOR, NEMA 1

Can be rotated for top or bottom feed. Required low-profile covers with automatic flush adjustment are included with some models; see table.

OUTDOOR, NEMA 3R

- Main frame size: QOM1 for convertible 100 to 125A; QOM2 for 150 to 225A
- Complete with cover and door

Feature split-branch neutral terminals. Can be bottom-fed, but wires must be routed to the top of the panel.

SQUARE D by Schneider Electric

Adjustable Molded Case Circuit Breakers

Adjustment is set at the front of the breaker.

MOTOR CIRCUIT PROTECTORS (MAG-GARD®)

- Magnetic trip only—provides no overload protection
- For supplementary protection within equipment
- Trip setting tolerances are ±20% of nominal values

Provide adjustable instantaneous trip when used in combination with motor starters with overload relays.

LAL 3-Pole

NQ/NF Panelboards

by Schneider Electric

- Complete panelboard requires interior, enclosure, and flush or surface cover
- NQ panelboards are for use with QO® (plug-in) or QOB (bolt-on) breakers; see page 192
- NF panelboards are for use with EDB (bolt-on) breakers; see page 192
- Tin-plated aluminum or silver-plated copper construction
- Use with ground bar kit No. 5B716 (not included)
- Use NQ adapter kits with Q and L frame breakers, available on Grainger.com®
- Use NF adapter kits with H and J frame breakers; see page 192

Preassembled main lugs save installation time. Convertible to main breaker. End-mounted split neutrals put neutral connections on the mains end of the panelboard, away from the high-density wiring area of the panel-side gutters. UL Listed.

SIEMENS EATON BUSSMANN SERIES Schneider Electric

UL 1077 Circuit Protectors

- B curve = magnetic trip between 3.2 and 4.8 times rated current (computer, electronic, and generator applications)
- C curve = magnetic trip between 7 and 10 times rated current (general purpose applications)
- D curve = magnetic trip between 10 and 14 times rated current (motors, transformers, and similar applications)

UL1077 listed supplementary protectors are used as extra protection for devices with branch circuit protection that is not sensitive enough for downstream components or where branch protection isn't required. They open the circuit upon overload or in the event of a short circuit to protect equipment from damage. They mount on standard 35mm DIN rail to protect sensitive equipment, like luminaires, appliances, control circuits, control power transformers, and other electrical equipment.

No. 19YE45

SIEMENS EATON BUSSMANN SERIES Schneider Electric

UL 489 Circuit Protectors

- C curve = magnetic trip between 7 and 10 times rated current (general purpose applications)
- D curve = magnetic trip between 10 and 14 times rated current (motors, transformers, and similar applications)

These miniature circuit breakers are UL489 listed for use as branch circuit protection or as supplementary electrical protection. Also known as branch circuit overcurrent devices, they open the circuit upon overload or in the event of a short circuit to protect equipment from damage. Mount these circuit breakers on standard 35mm DIN rail in control panels, motor control centers, panelboards, and other low-voltage electrical applications.

No. 30YA79

Spectra Adjustable Molded Case Circuit Breakers and Protectors

- 600VAC, 3-pole
- Lug-in/lug-out
- Suitable for reverse feed
- 65 and 100kA: current limiting
- HACR rated

Spectra RMS™ solid-state system uses interchangeable rating plugs and modular accessories for application-specific flexibility. Adjustable short-time and instantaneous trip characteristics. Front-mounted rating plugs (sold separately) establish or change the breaker ampere rating. UL Listed and CSA Certified.

Circuit Breaker No. 3HWT2

Motor Circuit Protector No. 3HWX5

Rating Plug No. 3HWY2

Plug In and Bolt On Circuit Breakers

TJJ SERIES

Feature 22kA IR ratings. Overall dim.: 10.13"L x 8.25"W x 4.31"D.

THQP, THQMV, THQC, AND SERIES

THQP 1- and 2-pole have 10kA IR ratings; THQC 1- and 2-pole have 22kA IR ratings; THQMV have 22kA IR ratings. Dim.: 1-pole, 3.875"L x 1"W x 2.562"D; 2-pole, 3.875"L x 2"W x 2.562"D.

THHQC SERIES

1- and 2-pole have 22kA IR ratings. Overall dim.: 1-pole, 3.875"L x 1"W x 2.5625"D; 2-pole, 3.875"L x 2"W x 2.5625"D.

THED SERIES

Feature 25kA IR ratings. Overall dim.: 1-pole, 6.31"L x 1.38"W x 3.63"D; 2-pole, 6.31"L x 2.75"W x 3.63"D; 3-pole, 6.31"L x 4.125"W x 3.63"D.

TED SERIES

1-pole breakers have 14kA IR ratings; 2-pole models have 18kA IR ratings; and 3-pole breakers have 14kA IR ratings. Overall dim.: 1-pole, 6.31"H x 1.38"W x 4.09"D; 2-pole, 6.31"H x 2.75"W x 4.09"D; 3-pole, 6.31"H x 4.125"W x 4.09"D.

THQL (Plug-In) and THQB (Bolt-On) Circuit Breakers

- 1-pole 120VAC; 2-pole 120/240VAC; 3-pole 240VAC
- Screw clamp connection up to 30A; box lug connection 35A and higher

Bolt-on breakers are for use in 120/240V AQ lighting panels. Plug-in breakers are for use in AQL lighting panels and Power Mark Gold load centers.

THQL Load Centers

Designed with sturdy copper bus and galvanized box to increase durability and reliability. Reduce total cost through faster, easier installation. Enhanced application flexibility and reduced inventory requirements. Side mounted main breaker allows top or bottom feed. Maintain optimum wire-bending space. Load center accessories available, see Grainger.com®.

SIEMENS
BQ (Bolt-On) Circuit Breakers

These BQ and BQH series miniature circuit breakers are bolted into place in panelboards, so they're more stable than plug-in breakers. They interrupt currents when low-level faults are detected in the circuit. They have a lug orientation to allow for straight-in wiring through bus bars, which eliminates the need to pigtail wires and helps organize the panelboard.

QP (Plug-In) and BL (Bolt-On) Circuit Breakers for Siemens Load Centers

SIEMENS

- Fixed lug
- UL Listed and CSA Certified

These miniature circuit breakers are compatible with Siemens panelboards and load centers and interrupt the flow of current when low-level faults are detected. They prevent damage caused by overcurrents and short circuits in residential, light commercial, and industrial applications where sensitive circuit protection is needed.

- NOTE: QP and BL breakers are UL Approved replacements for ITE breakers.

EATON

Molded Case Series G Circuit Breakers

These 3-pole breakers are suitable for global applications and feature the ability to add alarm circuits and auxiliary contacts easily to the unit. Thermal magnetic trip type. UL Listed and CSA Certified.

Carling Technologies®

Panel-Mount Circuit Breakers

THERMAL TRIP

- Operating temp.: -10° to 60°C
- Functionally equal: ETA, Joemex, and MPI

Compact, precision-design breakers have few moving parts—a cost-effective alternative to hydraulic/magnetic breakers. They offer extremely reliable circuit protection with a push-to-reset function. 50/60 Hz. UL Recognized.

MAGNETIC TRIP

- Functionally equal: Heinemann, Sensata, Airpax, and Potter & Brumfield

Designed for world market applications requiring extra insulation and tongue/groove half-shell construction. Series trip design. Trip point is not affected by temperature fluctuations. UL Recognized and CSA Certified.

Replacement Circuit Breakers for Obsolete Load Centers

- 1-phase
- 120/240VAC
- 10kA IR

Circuit Breakers have been tested in accordance with the National Electrical Code and the Standard for Molded-Case Circuit Breakers Enclosures, ANSI/UL 489, 10th Edition. They comply with standards for Endurance, Interrupting Ability, Voltage Withstand, and performance under various types of loads and overloads. HACR and SWD rated. Meet or exceed ANSI/UL 489 Standard.

Surge Protection Devices (SPDs)

SOLAHD

- Compact and narrow design
- Low clamping levels

Provide point-of-use, all-mode protection against damaging transients at the dedicated equipment level. Install in electronic control cabinets on the factory floor or at remote locations. Provide sine wave tracking, LED status indication, form C dry contacts.

EATON

Surge Protection Devices (SPDs)

Service entrance surge protection provides AC power protection, and LED status indication for indoor/outdoor applications. Connect to the outside of any UL-approved loadcenter. Base Mount feature thermally-protected metal oxide varistors for high energy capacity. Small size allows device to be installed close to the equipment being protected.

ERICO® SIEMENS

Surge Protection Devices (SPDs)

SIEMENS, UL 3RD EDITION

Siemens Transient Protection System (TPS3) is a complete line of hard wired surge protection solutions designed to provide robust surge protection for your electrical and electronic equipment. Most SPDs carry UL's highest I-n rating of 20kA with surge current capacities ranging from 50 to 300kA. Suitable for commercial, industrial, and residential SPDs. See the table below for surge current ranges based upon the average ratings specified by US consulting engineers.

ERICO

Compact models can be directly mounted to panel and installed in small spaces. LED status monitoring. Modular models allow individual modules and fuses to be field-replaceable. Built-in disconnect and fusing eliminates the need for external fusing.

Johnson Controls · Dayton · White-Rodgers · Functional Devices, Inc. · RIB · EDWARDS SIGNALING

JOHNSON CONTROLS

Designed for use on digital controllers, gas controls, ignition systems, motor actuators, staging controls, and most other 24VAC HVACR control systems. UL 1585, UL 506, and CSA C22.2 No. 66.

DAYTON®

- 1-phase, 60/50 Hz

100VA models and Nos. 4TGX7 and 4VZF1 are UL and C-UL Listed. Most others are UL and C-UL Recognized, except 50VA models are UL Recognized and CSA Certified.

WHITE RODGERS

Energy limiting to power 24VAC control systems, and step down available line voltage.

RIB® 20 TO 100VA

- Class 2 rated, except where footnoted
- 1-phase, 60/50 Hz

Designed with split-bobbin construction and pigtail wires. UL and C-UL Listed, CE Certified.

No. 6WU94

Functional Devices, Inc. · RIB

Prepackaged Control Transformers

- 24VAC Output
- 1-Phase, 60/50 Hz
- Includes circuit breaker
- 40VA to 500VA

Feature On/Off control, overcurrent protection, LED power indicator, high/low separation, 120VAC convenience outlets, and fully-enclosed finger-safe terminals.

SOLAHD

Power Conditioners

- 1-phase, 60 Hz
- Hardwired, panel-mount
- 25-yr. typical mean time before failure (MTBF)

Constant-voltage transformers regulate voltage, filter noise, and suppress surges to protect connected equipment. They utilize patented ferroresonant transformer technology to function as both step-up and step-down transformers. For use where a constant voltage level is required to help reduce unscheduled downtime, incorrect data, or scrapped production. UL Listed.

Dayton | Square D by Schneider Electric | Acme Electric

Control Transformers

Additional transformers are available, see Grainger.com®. 60/50 Hz.

Dayton® Encapsulated—Fully-encapsulated coil eases wire routing around transformer, and provides durable construction. 55°C temp. rise. Panel mounting. Include secondary fuse clips. 3-yr. warranty.

Dayton® Finger Safe—Open 1-phase isolating/control transformers feature separate insulated windings with heat-tempered varnish that protects against dust, humidity, and corrosion. For fixed installation in cabinets or switchboards. Require separate overload and short-circuit protection. Handle high inrush currents associated with contactors and relays. 50°C temp. rise, 45°C ambient.

Square D Nonfused

Square D—Copper wound, vacuum impregnated. 50 to 150VA models: 55°C temp. rise; 200 to 350VA models: 80°C temp. rise; 500 to 2000VA models: 115°C temp. rise, meet NOM requirements. Fused models include 2 primary fuse clips to accommodate Class CC time delay, rejection type fuses; see page 180. 1 secondary fuse clip uses a 1½" x 13⁄32" midget fuse; see page 179. 10-year warranty.

Acme Electric—Constructed of silicon steel lamination to minimize core losses and increase efficiency. Feature precision wound coils, copper windings, and series-parallel connecting links. 80°C temp. rise.

Harmonic Mitigating Transformers

Acme Electric®

- 3Ø 480VAC input, 208Y/120VAC output
- Floor mount
- NEMA 3R enclosure
- 150°C temp. rise

Eliminates harmonics to improve power and energy efficiency. Reduce supply voltage flat-topping, transformer heat, and voltage distortion. For use where nonlinear loads generate high levels of harmonic currents that feed back into the distribution system.

Buck-Boost Transformers

- 120/240VAC Input
- 1-phase, 60 Hz
- Wall mount
- Enclosure type: indoor/outdoor

Protect connected equipment from damage by reducing (bucking) or raising (boosting) line voltage 5% to 20%. Primary and secondary lead wires can be interconnected for use as an autotransformer. For use in induction motors and air conditioning, lighting, and heating systems. 24/48VAC output models are available on Grainger.com®. UL Listed and CSA Certified.

3-Phase Transformers

The Department of Energy (DOE) has mandated new, more stringent efficiency standards for 15 to 1000kVA transformers. Transformers 15kVA and higher in these tables meet this new legislation, DOE 2016, and will help lower operating costs, lower cost of ownership, increase profitability, and reduce overall greenhouse gas emissions. Addtional transformers are available, call 1-800-GRAINGER (472-4643) or see Grainger.com®.

DAYTON

These transformers are designed for indoor locations and feature a 220°C insulation system (150°C rise) that is self-extinguishing.

ACME ELECTRIC

Acme's low voltage distribution transformers are designed for industrial and commercial applications. All of Acme's general purpose transformers are rated for 600V and below. Encapsulated units are offered in ratings up to 15kVA. Ventilated units are available in ratings from 30kVA to 300kVA.

SQUARE D

Transformers NEC minimum clearance side and rear is ½". All units designed to operate at least 3dB below ST-20 sound level. The terminals are sized to handle lug kits, increasing ease of installation. Designed with increased wiring compartments that provide a bending radius for 250% primary cables and multiple feeds on the secondary. Feature 200% neutral to allow customers to feed standard and nonlinear panels.

Line Conditioners

TRIPP·LITE

- Complete surge and line noise protection

By automatically regulating incoming voltage from 89 to 140VAC to provide nominal 120VAC power, conditioners keep equipment working through low-voltage (i.e., brownout) and high-voltage conditions.

No. 5JK13

PHASE-A-MATIC

Static Phase Converters

No. 2MV45

- No moving parts to wear out
- For light to moderate loads only
- Knockout size: ½"

Quiet, easy-to-install units run 220V, 3-phase AC motors from a 220V, 1-phase power source at ⅔ of the rated horsepower. When used with a belt-driven air compressor, the motor pulley dia. must be reduced by ⅓. For full- or near-full-horsepower applications, the converter can be used to start an additional idler motor, producing even greater horsepower. Can be used for lathes, mills, grinders, drills, saws, metalworking and woodworking equipment, printing equipment, sewing machines, food blenders, mixers, processors, meat grinders, etc.

Note: Not recommended for use in damp or wet locations. The largest motor on your machine must fall within the minimum and maximum ranges of the converter. Please call 1-800-GRAINGER (472-4643) before ordering.

HP Range	Output Amps	W (in.)	H (in.)	D (in.)	Mfr. Model	Item No.
⅓ to ¾	2.8	5⅛	9½	2⅝	PAM-100HD	**2MV45**

8 to 12	33.6	5⅛	12¾	2⅝	PAM-1200HD	**2MV50**

Rotary Phase Converter No. 3EDX1

PHASE-A-MATIC

Rotary Phase Converters

- For heavy-load applications
- Knockout size: 1"

Provide full running 3-phase power to 220V 3-phase motors, normally with full running torque, in multiple-motor, multiple-speed, and resistive applications. Quiet operation. Easy to install. For use in metalworking, woodworking, farm, food processing, and printing equipment; pumps; air conditioners; compressors; elevators; transmitters; lasers; mills; sewing machines; etc. For multiple-motor applications, contact Grainger technical support.

Note: 460V phase converters and voltage stabilizers are available on Grainger.com®.

TRIPP·LITE

Inverters and Inverter/Chargers

Hardwired units provide consistent, computer-grade AC power output from a DC source. Instantaneous peak output provides up to 200% of continuous output for short durations to start motors.

Pure Sine Wave Inverter/Chargers—Provide stable, microprocessor-controlled output and the pure sine wave power required by equipment such as variable-speed power tools and devices with PFC power supplies. Help your equipment run cooler and last longer, and help prevent the malfunctions and reduced performance that can be caused by substandard power.

Inverter/Chargers—Pass 120VAC power to equipment, keep user-supplied batteries charged, and function as automatic UPS systems when utility power is not available. Frequency control helps equipment perform at its peak. Battery charger is 3-stage selectable. Feature electronic overload shutdown and input polarity protection. Backup time is based on size of user-supplied batteries.

Utility Work Truck Inverters—Ideal for powering lights, tools, and electronic devices from your vehicle battery system. GFCI outlets. No. 4HHH7 is remote controllable (remote included).

Utility Work Truck Inverters/Chargers—Provide quiet mobile power directly from work truck batteries. Can be used as an alternative to portable generators as a backup power source for sump pumps and in other emergency applications. GFCI outlets. Have a built-in charger to maintain supplied batteries. Remote control included. UL Listed.

SL Silver Line Series Power Supplies

SOLAHD

- Adjustable input voltages from 100, 120, 200, 230, or 240VAC
- 60/50 Hz
- Operating temp. range: 0° to 50°C
- Short-circuit and overvoltage protection on 5V outputs
- Low output noise: 3mV

Industry-standard footprint has easy screw terminal connection. Linear, low-noise technology provides quiet, smooth DC performance. Tight load and line regulation at 0.05%. Suitable for industrial control and process systems. UL and C-UL Recognized, and CE Certified.

SDN Series DC Power Supplies (DIN Mounted)

SOLAHD

- Can be connected in parallel
- 24VDC output models are adjustable from 22.5 to 28VDC
- C-series: ATEX, class 2/zone 2 per NEC codes and IECEx

Feature narrow width on DIN rail for space-critical applications, rugged metal case, and DIN connector. Large, sturdy, multiple-point screw terminations for quick connection. High-efficiency >88%, switching power supply. Extra boost capacity for high inrush loads without foldback or shutdown. Auto-select voltage input. For industrial control and process control applications including DC input solenoids, valves, switches (prox switches), relays, PLCs, and sensors. UL and C-UL Listed, and CE Certified. Meet SEMI F47 SAG Immunity.

SDP Series DC Power Supplies (DIN Mounted)

SOLAHD

- Class 2 limited power source
- Adjustable output voltage
- Operating temp. range: -10° to 60°C, full power
- Short-circuit protection
- Low output noise: <50mV p/p
- DC OK signal

Easy-to-install units provide clean, stable DC power with a special industrial overload design that can start high inrush loads without oversizing. Compact and lightweight, with no derating necessary until above 60°C. DIN rail mount. cULus Recognized Component. Meet UL, C-UL, CE, and Class 2 NFPA 70, except No. 1GYK4 meets UL, C-UL, and CE standards.

DC Power Supplies (DIN Mounted)

EATON

- 60/50 Hz
- Operating temp. range: -20° to 80°C
- Short-circuit and overvoltage protection
- Low output noise: <50mV
- DC OK signal

Switching-style units provide clean, stable DC power for a variety of industrial applications. Simple screw terminal connections allow easy installation, and the narrow footprint permits installation in applications where space is at a premium. Hold up time: >22 msec. UL Listed. CSA and CE Certified. IEC, EN.

PULS

Switching Power Supplies

C-SERIES

These power supplies are highly reliable in a compact metal housing with a power range from 80 to 480W. Additional features include high efficiency, long life, 20% current reserves, extremely low AC inrush, screw terminals, Class I, Div. 2 approval and a temperature range of -25° to 70°C. Units are available in single or 3-phase with output voltages from 12 to 56VDC.

MINILINE

These compact, lightweight power supplies in a robust plastic housing cover low-power requirements from 15 to 100W. Additional features include a wide temperature range with select models rated down to -40°C, spring clamp terminals on standard models, and screw terminals on the compact models. These units are available with output voltages from 5 to 56VDC with a single-phase input or select models with 380-480VAC.

Q-SERIES

With state-of-the-art technology and flexibility for demanding tasks, these power supplies are highly reliable in a compact metal housing with a power range from 80 to 960W. Additional features include outstanding efficiency, long life, 50% current reserves, extremely low AC inrush, DC OK contact and a temperature range of -25° to 70°C. Units are available in single or 3-phase input with output voltages from 12 to 55VDC and an extensive agency approval package.

SILVERLINE

Designed for general applications with a proven track record for over 20 years, the SilverLine model offers reliability in a metal housing. Additional features include high efficiency, long life, 20% current reserves, screw terminals and a temperature range of -10° to 70°C. Units are available in single or 3-phase input with output voltages from 12 to 56VDC.

OMRON
INDUSTRIAL AUTOMATION

Switching Power Supplies

- 100-240VAC, 60 Hz
- DIN rail mount
- Temp. range: -13° to 149°F

Versatile units provide a wide range of power ratings, output voltages, and styles, matching most design and performance requirements. UL Listed (508), and CE Certified. S8VS and S8VM models are also C-UL Listed. S8JX models are also CSA and EN/VDE Approved.

S8VK SERIES

- **Class 2 output on 15, 30, and 60W models**

This compact class has a robust design and construction to withstand harsh environments and provide stable operation over a wide operating temperature range: -40° to 158°F. Minimal wiring requirements and easy 1-handed mounting with enhanced DIN rail mounting clips.

COMPACT PLASTIC CASE, S8VS SERIES

- Class 2 output on 60W models
- SEMI F47

Feature LED display maintenance forecast monitor, which shows output voltage, current, peak current, and lifetime in years.

Precision-Regulated DC Power Supplies

TRIPP-LITE

Efficiently convert 120VAC to 13.8VDC while protecting against overcurrent. Crowbar protection on units larger than 15A prevents damage to connected equipment. Regulated output voltage maintains up to 95% of no-load value. A heavy-duty power transformer provides complete isolation from noise on incoming AC power. Chassis-mount fuse included. No. 30EF37 is programmable and includes instruction manual with warranty information.

SITOP Power Supplies

SIEMENS

Feature a slim, space-saving design with high efficiencies across the entire load range. The Compact models reduce temperature dissipation in a cabinet and save energy costs. These switched-mode power supplies have plug-in terminals for simple electrical connection and minimized connection time. Ideal for low-power applications. The Modular models feature power boost functionality that supplies up to 3 times the rated current, allowing free start-up of loads with high inrush current. They also offer a robust metal design, and a comprehensive set of certifications. Ideal for demanding and complex applications.

UPS Systems

Provide cost-effective backup power and power protection for critical equipment. Agency approved.

STANDBY

For basic battery backup to support individual computers and PLC applications. ECO high-efficiency models Nos. 4HHH4, 4HHH5, and 4HHH6 support green energy savings with select surge-only outlets that can be configured to automatically power off.

LINE INTERACTIVE

Provide nominal, conditioned 120VAC for applications in which fluctuating voltage (low/high) affects equipment operation. Units also provide backup power during power blackout conditions.

SMART TRUE-ON-LINE

For mission-critical applications. Double-conversion online operation with zero transfer time to battery isolates sensitive equipment from every power problem.

LINE INTERACTIVE

Meet strict leakage requirements for medical equipment used in nonlife-support applications (UL 60601-1). Keep computers working through routine emergency power checks, low voltage (brownout), and high voltage conditions without using battery power. Also provide portable power for computers on carts.

Standby, ECO High-Efficiency No. 4HHH4

Intelligent Line Interactive No. 5JK33

Smart True-Online No. 3WA13

Footnotes: 1—Expandable with external battery pack. 2—50/60 Hz compatible. 3—DB9 serial port. 4—USB port. 6—Fax/modem line surge suppression. 7—Emergency power off. 8—SNMP/Web interface slot. 9—TAA-GSA compliant. 10—Remote rebootable receptacles. 12—Includes full featured software with voltage and battery monitoring capability. 14—Hospital grade plug and receptacles. 15—Coax protection. 20—Contact Grainger Technical Support before ordering.

No. 5AHD4

No. 26WC24

APC by Schneider Electric — POWER 1 FIRST

UPS Systems

Provide backup power and power protection for critical electronic equipment.

Back-UPS—Basic battery backup and surge protection with enough backup power to work through short- and medium-length power outages. Feature audible alarm, LED status indicator, replaceable battery, push-button circuit breaker, and transformer-block spaced outlets. No. 4NZT2 includes software that automatically saves open files and shuts down the computer during extended outages. UL and C-UL Listed. FCC Part 15 Class B.

Line Interactive—This line interactive USP features LCD display and desktop mounting. Designed with RS232 or USB ports, and delivers 4 to 6ms transfer time. 120VAC input and output voltage and 600VA rating. 1-phase, 60 Hz. 6-ft. cord length.

Smart-UPS®—Provide computer-grade power for workstations, computers, modems, wiring closets, and peripherals. Protect networking equipment and point-of-sale (POS) devices from power disturbances and outages. PowerChute® Business Edition software provides entry-level network UPS management. UL Listed and CSA Certified. FCC Part 15 Class A.

VH Series
No. 12P694

LP11 Series
No. 5EFA0

UPS Systems

Reliable, secure, power protection for all critical loads. 1-phase, 50/60 Hz. Include auto voltage regulation, automatic shutdown software, USB, contact interface with RS232, and relay connections. Optional SNMP and relay cards available for remote communication.

VH Series—True, online double conversion UPS designed for high performance for all mission-critical applications. Highly efficient with 0.9 power factor to deliver more actual power to the load. Provides fail safe bypass and GE's superior battery management to provide maximum power protection and security.

LP11 Series-Hardwired—True, online double conversion UPS with an internal transformer. Robustly designed to handle industrial applications with short-circuit, high overload and overheating conditions, reducing maintenance and service costs. Small footprint with automatic and manual bypass with GE's unique RPA (Redundant Parallel Architecture) technology allowing to parallel up to 4 UPS with no single point of failure. PDU options available for pluggable connections.

Heavy-Duty Power Relays

- Screw-head terminals
- Silver alloy, self-wiping contacts
- Molded thermoset plastic base

Use for switching motor loads in applications such as elevators, machine tools, air handling, and HVAC equipment. Minimum operating voltage for AC relays is 85% of nominal voltage. 0.75 power factor. Relays with magnetic blowout feature suppress arcing.

**** Includes auxiliary switch.***

Enclosed Power Relays

Flange-type mounting bracket.

DAYTON®

Bottom-mounted ¼" quick-connect terminals. Silver cadmium oxide contacts. Operating temp. -30° to 50°C DC; -30° to 65°C AC. Pull-in at 85% of nominal voltage for AC coils or 80% for DC coils.

OMRON

Top-mounted terminals. Dielectric strength: 4000VAC at 1 min. G7L series has push-to-test buttons.

SCHNEIDER ELECTRIC

Feature top-mounted terminals and locating slot for DIN rail mounting. Silver tin oxide contacts. 50/60 Hz. UL Listed.

COMPACT

Great for OEM and panel builders. A built-in cavity simplifies insertion of a transient suppressor.

CAD SERIES

Serrated contacts provide a wiping action to ensure excellent performance with low control voltage (24V). Basic 5-pole relay can be installed with a snap-on adder cartridge. Built to a design specification of 30 million mechanical operations. Standard instantaneous auxiliary contact blocks are available. See listing on page 170.

IEC Control Relays

- DIN rail mount
- Front access contact and coil terminals

XT/DIL M Series feature positively driven contacts between the relay and auxiliary contact modules, and within the auxiliary contact modules.

Provide AC control from 12V to 550V 50 Hz, 600V 60 HZ, and DC control from 12V to 220V. Silver tin oxide alloy contact material. Screw or spring-cage terminals and 4-pole configurations. Nonlatching type. UL Listed, CSA and CE Certified.

NEMA Control Relay

- Operating temp. range: -40° to 71°C (-40° to 160°F)
- Mechanical tie between all cartridges

Rugged, heavy-duty design ensures improved performance, reliability, and long life. Feature field convertible color-coded contact cartridges and replaceable coils. Average operating time in milliseconds: AC is 15 pickup, 16 dropout; DC is 37 pickup, 21 dropout. UL Listed and CSA Certified.

NEMA CONTROL RELAY

- 600V, 10A rating (A600)

All contact poles are usable since no overlapping contacts are needed. Relays have plug-in contact cartridges for easy contact conversion, from Normally Open to Normally Closed, and replacement; removal of terminal screws or wires is not necessary. Self-lifting pressure wire connectors. Straight-through wiring.

Note: A maximum of 8 NC contacts is allowed on 12-pole relays.

MASTER NEMA CONTROL RELAY

- 600V, 20A rating (A600)

Note: Attachments are not permitted on this relay.

EATON

Current Sensors

Solid-state adjustable current switch is self-powered and able to sense current and provide output above and below setpoint. Suitable for applications such as jam detection, overload prevention, and critical loads.

Universal AC Current Sensors

AIROTRONICS Timers & Controls | Dayton | MACROMATIC | RIB | Schneider Electric

Sensors detect locked rotor, loss of current, open heater, or lamp load. Dayton and Schneider models feature switch-selectable overcurrent or undercurrent sensing. Toroidal sensor has 0.36" through hole on Dayton models.

1-Phase Voltage Sensing Relays

MACROMATIC

- Field adjustable for pull-up and dropout
- LED status indicators
- 0.1- to 10-sec. activation delay

Solid-state sensor works as an overvoltage or undervoltage detecting relay to prevent equipment burnout and offer brownout protection.

3-Phase Line Monitors/ Phase Failure Relays

Dayton | Schneider Electric | MACROMATIC

- Automatic reset
- LED indicator signals normal operation
- Wye or delta 3-wire hookup

Units protect against phase loss, phase unbalance (except Nos. 5WMJ4, 5WMJ5, and 5WMJ6), phase reversal, and undervoltage. Adjustable undervoltage setting. Nos. 12N828 and 5WMJ3 also detect overvoltage.

Alternating Relays

MACROMATIC | Dayton

- Octal Base
- LED status indicators

Relays alternate the operation of 2 loads, sharing their run time. Selector switch allows alternating or individual operation of either load. Dual-stage load capacity permits simultaneous operation of 2 motors, solenoids, compressors, pumps, valves, or heaters. The relays return to load "A" after power outage. UL Recognized and CSA Certified.

Pump Seal Failure Relay

MACROMATIC

- 8-pin octal base
- LED status indicator

Voltage	Switch Type	Max. Amps	Mfr. Model	Item No.
120VAC	SPDT	10	SFP120A100	**5WMJ7**
120VAC	(2) SPNO	10	SFP120C100	**5WMJ8**

Designed to monitor shaft seals in submersible pumps, and to provide an early warning of seal leak. No. 5WMJ7 is a single-channel unit, and No. 5WMJ8 is a dual-channel unit capable of monitoring 2 pumps.

No. 5WMJ7

Time-Delay Relay Selection Guide

Description of Time Delay Operation	Operation	Timing Periods	Function Code
ON DELAY: When power is APPLIED to the coil, the ON DELAY timing period begins. The contacts do not transfer at this time. At the end of the ON DELAY time period the contacts transfer, either connecting (normally open contacts) or disconnecting (normally closed contacts) the load. The contacts stay in the transferred state until power is REMOVED from the coil. They then return to their original state and the unit is ready for a new cycle.	Power	On On On On Off	1
	Load	Off On On On Off	
OFF DELAY I: Power is applied to the coil at all times. Upon CLOSURE of the start switch (a "dry" external contact), the contacts transfer, either connecting (normally open contacts) or disconnecting (normally closed contacts) the load. When the start switch is OPENED, the OFF DELAY timing period begins. The contacts stay in the transferred position until the OFF DELAY timing period ends. They then return to their original position and the unit is ready for a new cycle.	Power	On On On On On	2
	Switch	Off On On Off Off	
	Load	Off On On On Off	
OFF DELAY II: Power is applied to the coil at all times. Upon the MAKE and RELEASE of the start switch (a "dry" external contact), the OFF DELAY timing period begins and the contacts transfer, either connecting (normally open contacts) or disconnecting (normally closed contacts) the load. When the timing period ends, the contacts return to their original position and the unit is ready for a new cycle.	Power	On On On On On	3
	Switch	Off On Off Off Off	
	Load	Off Off On On Off	
INTERVAL DELAY: When power is APPLIED to the coil (the start switch must be jumped in multifunction timers), the INTERVAL timing period begins and the contacts transfer, either connecting (normally open contacts) or disconnecting (normally closed contacts) the load. When the INTERVAL timing period ends, the contacts return to their original position. The unit resets when power is removed from the coil, making the unit ready for a new cycle.	Power	On On On On Off	4
	Load	On On Off Off Off	
CYCLE 1 SHOT (EQUAL TIME OFF/ON): Upon application of power to the timer, timing starts. The output relay is OFF for the set time and then ON for the set time for 1 cycle only. The timer is reset when power is removed or a reset input is applied.	Power	On On On On On	5
	Switch	Off Off Off On On	
	Load	Off On Off Off On	
REPEAT CYCLE (EQUAL ON AND OFF DELAY TIME PERIODS): When power is APPLIED to the coil, the OFF time period is initiated; the contacts do not transfer. At the end of the OFF time period, the ON time period begins. The contacts transfer, either connecting (normally open contacts) or disconnecting (normally closed contacts) the load. At the end of the ON period, the contacts transfer and the cycle continues until power is removed from the coil.	Power	On On On On On	6
	Load	Off On Off On Off	
REPEAT CYCLE (INDEPENDENT ON AND OFF DELAY TIME PERIODS): When power is APPLIED to the coil, the ON period is initiated by contact transfer (normally open contacts close, normally closed contacts open). At the end of the OFF period, contacts release and the ON period begins. The cycle continues until power is removed from the coil.	Power	On On On On On	7
	Load	On Off On Off On	
SIGNAL INTERVAL/OFF DELAY: Power is applied to the coil at all times. Upon CLOSURE of the start switch (a "dry" external contact), the INTERVAL cycle begins; the contacts transfer, either connecting (normally open contacts) or disconnecting (normally closed contacts) the load. At the end of the INTERVAL cycle, the OFF DELAY cycle begins and the contacts stay transferred until the OFF DELAY cycle ends. The contacts then return to their original positions and the unit is ready for a new cycle.	Power	On On On On On	8
	Switch	On On Off Off Off	
	Load	On On On Off Off	
SIGNAL ON DELAY/OFF DELAY: Power is applied to the coil at all times. Upon CLOSURE of the start switch (a "dry" external contact), the ON DELAY cycle begins; the contacts do not transfer. At the end of the ON DELAY cycle the contacts transfer, either connecting (normally open contacts) or disconnecting (normally closed contacts) the load. Upon RELEASE of the start switch, the OFF DELAY cycle begins; the contacts remain transferred. At the end of the OFF DELAY cycle, the contacts return to their original positions and the unit is ready for a new cycle.	Power	On On On On On	9
	Switch	On On Off Off Off	
	Load	Off On On Off Off	
POWER OFF DELAY: When power is APPLIED to the coil, the contacts transfer, either connecting (normally open contacts) or disconnecting (normally closed contacts) the load. When power is removed from the coil, the OFF DELAY timing period begins; contacts remain transferred. At the end of the OFF DELAY cycle, the contacts return to their original positions and the unit is ready for a new cycle.	Power	On On On Off Off	10
	Load	On On On On Off	
WATCHDOG (RETRIGGERABLE SINGLE SHOT): Upon application of input voltage, the time delay relay is ready to accept trigger signals. Upon application of the trigger signal, the relay is energized and the preset time begins. At the end of the preset time, the relay is de-energized unless the trigger signal is closed and opened prior to time out (before preset time elapses). Continuous cycling of the trigger signal at a rate faster than the preset time will cause the relay to remain energized.	Power	On On On On On	11
	Switch	Off On On Off On	
	Load	Off On On Off On

Logic Relays and Extension Modules

Schneider Electric

No. 1CNL2

No. 1CNL4

- 16 counters and timers
- Integral display

Expandable design allows users to manage a simple automation system with multiple inputs and outputs, without the need for a complex programmable controller. 6-button navigation allows direct programming in any of several computer languages. Compact, space-saving design. Extension modules add inputs and outputs to customize systems for specific needs. Programming software No. 1CNL6 and PC connection cable No. 1CNL7 permit uploading programs from a PC, directly to multiple relays. Use for small machinery and supplemental large machinery automation systems, lighting management, security systems management, and HVAC management.

Programmable Relays

EATON

No. 20JM39

No. 20JM23

- 16 counters and timers (easy 500/700)
- 32 counters and timers (easy 800)

Easy to use Programmable Relays feature expandable design that allows you to manage a simple automation system with multiple inputs and outputs, without the need for a complex programmable controller. Large front display with calendar and clock allows easy navigation for alarms, operator messages, or direct programming. Compact, space-saving design with extension modules that add inputs and outputs to customize systems for specific needs. They are also easy to connect via Ethernet or Profibus to other PLC's or automation systems. Use for small machinery and supplemental large machinery automation systems, lighting management, security systems management, and HVAC systems.

OMRON INDUSTRIAL AUTOMATION

Programmable Relays

- 56 timers and 17 counters
- LCD with calendar and clock

Provide relay, timer, counter, and time switch functions; easily programmable in ladder-view format. With weekly and calendar timers, flexible mounting expansion via 8-point I/O units, twin-timer operation, and multilanguage display. DC models have analog inputs. For use in time-controlled and small-scale applications such as lighting and air conditioning.

CUB Series Miniature Panel Meters

- NEMA 4X/IP65 sealed front bezel

Backlight units require external power, typically 12/24VDC.

CUB4 Series have 0.46"H (12mm) digits, a large display, and a NEMA 4X front panel with a faster count rate and push buttons that can be displayed.

CUB7 Series have 0.35"H (9mm) digits with a NEMA 4X front panel, and faster count rate and push buttons that can be displayed.

CUB5 Series have 0.46"H (12mm) digits, and are designed to include option cards for setpoints and communications.

EATON

Electronic Totalizers and Count Controls

Panel mounted. CE Certified. AC-supplied units are UL and C-UL Recognized.

E5 Series—IP65 front panel for use in moist environments. NPN or PNP inputs accept almost any 3-wire DC sensor. Totalizers have rear screw terminal connections. No. 2MRU6 accepts direct AC/DC count input.

Encoders—Quadrature output signal provides extremely accurate position indication, ensuring that count is correct regardless of which direction the shaft is rotating. ABEC 3 double-sealed ball bearings keep foreign matter out. Housing is sealed against dust, oil, vapor, and moisture.

Preset Digital Counter and Counter/Tachometer

OMRON®

- Reset: External/manual/automatic
- Input signal: No voltage/voltage switchable
- PNP/NPN selectable input

These high-speed response, electronic preset units have 6 digits and 11 (No. 5FY60) or 12 (No. 5FYG1) operating modes. Enhanced features allow configurations as a 1-stage or 2-stage total, batch, or dual counter. (No. 5FYG1 can also be used as a tachometer.) Display color is programmable to alert change in output status. All parameters can be set via front membrane keys or DIP switches. Units provide 12VDC output for external sensors. Negative transmissive LCD and EEPROM memory backup, sustained and 1-shot outputs. Key protect function. 1/16 DIN panel mount (includes adapter). NEMA 4/IP66 front panel. 1 7/8" square x 4 9/16" long. UL Listed and CE Certified.

Temperature Controllers

Designed to monitor and control heating and/or cooling process applications. Thermocouple input, no calibration required. Hardware included for panel mounting.

E5C2 Series—Manual dial setting; Type J thermocouple input. 8-pin octal relay socket mountable; order No. 5X852 on page 216.

E5CS Series—Easy setting through internal DIP and rotary switches. On-demand auto-tune. Multiple input. Deviation indicator for easy monitoring. 8-mode alarm output and sensor error detection. Input shift function adjusts display to reflect known sensor offsets. CE Certified.

Temperature Control Boxes

Include 6-ft. cord. All components are UL Listed or Recognized, CSA and CE Certified.

PCT Series—Feature pilot light and 15A straight-blade heater receptacle. For indoor use. Analog boxes have blue metal housing, mounting slots, and 4° typical hysteresis. Digital boxes have plastic housing, TEC-220 electronic temp. controller, and red illuminated On/Off rocker switch. Nos. 5FYL4 to 5FYL7 have Invensys-type mechanical thermostat with 4" bulb and 48" capillary.

PCM Series—NEMA 12 enclosure. Feature TEC-9100 electronic temp. control. Nos. 5FYN6 to 5FYN9 have 20A straight-blade heater receptacle and standard thermocouple jacks. Nos. 5FYP0 to 5FYP3 have internal blocks and can be used on single or 3 phase.

PXU Series Temperature Controllers

- Programmable
- 2 alarms
- 100 to 240VAC or 24VDC

Accept a wide variety of thermocouple and RTD sensor inputs to meet varying application requirements. Designed for simultaneous viewing of temperature/process, and setpoint values. Features on demand auto-tuning for easy set up and provides 2 control outputs, which can be individually configured for reverse or direct applications using front panel push-button or Crimson® software. Large dual line, 4-digit displays. IP65 ingress protection. UL Listed, 61010-1 approved.

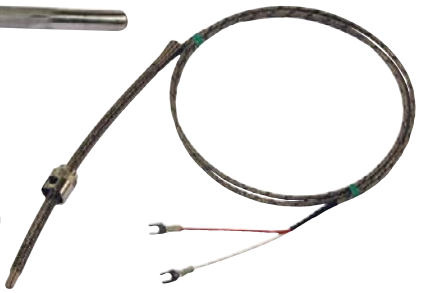
Bendable Thermocouple No. 5ZY12

Standard Plug No. 5ZY31



Heavy-Duty Thermocouple No. 5ZY26

Thermocouple Wire No. 3AGF4

Standard Jack No. 5ZY34

Adjustable Depth Thermocouple No. 5ZY15

Thermocouples, RTDs, Lead Wire, and Accessories

TEMPCO SUPPLIER DIVERSITY

THERMOCOUPLES

Bendable, Mineral Insulated

Plug and jack connectors allow probe to measure temperature in hard-to-reach areas.

Heavy-Duty

Rugged, pipe-protected thermocouple element is for use in heavier industrial applications. Easy field wiring of enclosed terminals found inside protected head.

Adjustable Depth

Thermocouples adjust to immersion well depth. For extruders and platens. Spade terminals and adjustable bayonet cap.

Lug Type

¼"-hole thermocouples are held in place by a bolt to measure surface temperatures.

RTD

Resistance temperature detectors (RTDs) offer greater repeatability and interchangeability than thermocouples or thermistors over the standard temperature scale.

Thermocouple Wire

Senses temperature of an object and feeds that information to a temperature control device that regulates power to the heating source or to a measuring instrument or temperature monitoring device.

TEMPCO

Types MG, TGGT, and PTFE High-Temp. Lead Wires

For commercial or industrial applications, heaters, furnaces, kilns, and food service equipment.

TYPE MG

- Rated for 600V

Mica glass composite insulation over stranded nickel-clad copper conductors. Covered by fiberglass overbraid with high-temp. finish for superior insulation and dielectric strength. UL 5335/5107, CSA AWM Class 1 Group A/B FT-1.

TYPE PTFE

- Rated for 300V

PTFE insulation is extruded over silver-plated copper conductors for high-temp. performance. UL 1180, CSA AWM Class 1 Group A/B FT-1.

TYPE TGGT

- Rated for 600V

Insulated with PTFE tape over stranded nickel-plated copper conductors, then 2 layers of fiberglass insulation. Covered by PTFE-treated fiberglass overbraid for safe, high-temp. applications. UL 5256, CSA AWM Class 1 Group A/B.

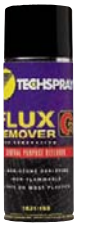
Flux and Flux Removers

FLUX PENS

No. 5JC02 is an innovative, halide-free organic no-clean flux that meets Bellcore TR-NWT-000078 and IPC-SF-818 for surface insulation resistance. No. 5JC03 is Type R flux that meets MIL-F-14256 E+F Type R and RMA.

FLUX-OFF® ROSIN REMOVERS



Flux-Off Rosin Remover Nos. 5JC06 and 1UYD9 are plastic safe and effective on all rosin and rosin-based no-clean flux. Available with Brush-Clean System No. 5JC06. E-line Flux Remover No. 19YY55 is a powerful, plastic-safe and economical flammable. Effective on rosin, RMA, con-clean, and OA flux. G3 Flux Remover No. 22HU60 is powerful and nonflammable. Effective on rosin, RMA, and no-clean flux.

Fume Extractors

HAKKO®

Benchtop Soldering Fume Extractor—Designed to be used in either a vertical, standing up position or a horizontal, laying down position. Horizontal position increases efficiency and airflow. Standard activated carbon filter absorbs up to 80 percent of odors from the air.

Soldering Fume Extractor—This extractor features powerful suction, quiet operation, High, Medium, and Low airflow adjustment, free-standing ducts, and a filter replacement indicator that notifies you when it's time to replace the filter.

MASTER APPLIANCE ★ WESTWARD

Butane-Powered Micro Torches

Master Appliance®—All torches are self-igniting. Meet CPSC requirements.

Nos. 32MC12 and 5PYT3 are palm size and feature pinpoint flame with lever adjustment.

No. 32MC12 includes $^{15}/_{16}$-oz. canister of butane fuel.

No. 5PYT4 table-top mount features low-profile hands free operation with safety lock and table base. Runs 1 hr.

Nos. 1WG61, 5PYT6, and 1YMK6 are designed for handheld or tabletop use. Run 2 hr. Nos. 1WG61 and 5PYT5 are open flame only.

No. 5HD24 has larger flame hands-free mode with safety lock. Runs 30 min.

Nos. 5PTY6 have miniature torch with slide lock, instant Off, and gas adjustment wheel. Run 1hr.

Nos. 1YMK5 and 6NE94 are handheld/tabletop tools that feature slide lock, gas adjustment wheel, and instant Off. Run 2 hr.

Westward®—Nos. 46Z439 feature a windproof flame and waterproof ignition.

Butane-Powered Soldering Irons/Flameless Heat Tools

MASTER APPLIANCE®

Copper-based tips provide long life and high thermal conductivity; excellent with lead-free solder. Kits include the tool with the same beginning Mfr. Model, tips, a plastic or metal case, and other accessories listed. UL Listed.

Self-Igniting Ultratorches®

Convenient On/Off gas control and adjustable temperature control. Durable tank has built-in fuel filter. Run times: Nos. 6NE96 and 5PYR9 80 min.; Nos. 3W772 and 3W773 2+ hr.

3-in-1 Ultratorches®

Soldering iron/flameless heat tools also offer torch mode with adjustable pinpoint flame. Manual ignition. Run times: No. 3W774 20 min.

Econoiron® Kit 4-in-1 Heat Tool

Manual ignition. Run time: 60 min.

WESTWARD®

4-in-1 Auto-Ignition Tool No. 4UZZ5 operates as rapid heat-up soldering iron, hot knife, hot air blower, and precision torch. Run time: 160 min. Nos. 4UZZ6 and 4UZZ9 feature refillable fuel cells (LECs) for cold weather operation. No. 4UZZ6 has heavy-duty plated copper soldering tips.

Cordless Soldering Irons

Weller®

BATTERY-POWERED

LED—Feature LED light to illuminate work surface, 30-sec. heat-up, auto shut-off, and safety cap. No. 20JH92 includes conical tip. No. 20JH93 includes conical and chisel tips.

BUTANE-POWERED

Self-Igniting—Nos. 6NE59, 5JH60, and 5JH87 are refillable. No. 6NE58 includes iron No. 6NE59 with 4 tips, deflector, sponge, tray, and case with tool holder.

Pyropen—No. 5WAC3 operates for 3 hr. per fill and include iron, soldering and hot air tip.

Torches—No. 5VZZ6 features a spring-loaded cap, electronic igniter, LED worklight, and adjustable flame height.

No. 5VZZ7 features an adjustable flame, ergonomic rubber grip, built-in stand, and a flame lock for hands-free operation.

American Beauty

Soldering Irons and Kits

Heating elements are wound around steel spools, creating large reservoirs of heat to run longer seams, solder large joints, and have quicker thermal recovery. High top-end temps. make irons suitable for lead-free soldering.

Heavy-duty and Ergo irons have hardwood handles that provide thermal and electrical insulation. Pencil irons have plastic handles and plug-style tips for superior heat transfer. Ergo irons have a near 90° angle in the casing to reduce stress on hands and wrists. Soldering iron kits include soldering iron with stand, lead-free solder wire, flux, tip tinner, brass sponge tip cleaner, desoldering braid, and cleaning pad.

HAKKO®

Soldering/Desoldering Stations and Tips

Soldering Stations—Digital Soldering Station No. 32TV10 allows you to choose between 5 preset temperatures. It features new password protection and a low temperature alarm that provides process control and helps protect against cold solder joints. ESD safe. No. 32TV11 features superior heat transfer and thermal recovery, a lockout key card, low temperature alarm, and automatic shutoff after 30 min. Stations Nos. 32TU96 and 32TU97 include process control so you can select any temperature without changing the tip. LED in handpiece tells the operator the iron is hot. Include automatic shutoff and sleep mode. No calibration necessary.

Rework and Desoldering Stations—Hot Air Pencil Station No. 32TU94 is perfect for soldering and desoldering small surface-mount components, shrinking tubing, heating test, and other local heating operations. Ultra-light setting for air volume control. ESD safe. Desoldering Stations Nos. 32TU99 and 32TV01 have a self-contained, built-in vacuum. No. 32TV01 includes a conversion port. Rework Stations Nos. 32TV04, 32TV06, and 32TV07 can power any Hakko FM Series handpiece. Graphic user interface is designed for easy setup and operation. Features 3 simultaneous powered ports, self-contained pump, digital airflow indicator, manual or automatic profile for hot air, auto shutoff with sleep function, passcode protection, and security lock.

Weller® American Beauty

Digital and Analog Soldering/ Desoldering Stations

- ESD-safe, protects sensitive components
- 120V, 60 Hz

DIGITAL SOLDERING STATIONS

No. 481D58 provides accurate adjustment of hot air through brushless turbine. Designed with up to 5 presets that can be set to run automatically. No. 481D59 features front panel power switch, setback, lockout, temperature window, standby, auto-off, and LCD display. No. 483N57 has standby mode, auto shut off, intuitive navigation, password lockout, LCD, and lightweight soldering pencil.

ANALOG SOLDERING

Variable Control—Great for hobbyists, students, and do-it-yourself projects. Uses Weller® ST series iron-plated copper soldering tips.

Professional Grade—Heating elements are wound around steel spools, creating large reservoirs of heat and resulting in the ability to run longer seams, solder large joints, and a shorter thermal recovery time.

Soldering Irons

Note: For soldering stations, see page 237. For all replacement tips and parts, call 1-800-GRAINGER (472-4643); or go to Grainger.com® and search for "soldering iron replacement tips".

Professional—Feature quick-change knurled collar, stainless steel barrel, cushion-grip handle, and plug-in heating element. 6-ft., 3-wire cord. Irons are 7⅞"L. UL Listed.

Controlled Output—Portable line-voltage irons require no base station. Temperature controlled by tip, with modular plug-in heater and fast heat-up. 6-ft. cord.

Marksman®—Pencil-handle irons have On indicator light, stainless steel barrel, and heat- and impact-resistant handle. LED light in handle illuminates workspace. 6-ft. cord. UL Listed. Kits include 3 tips, soldering aid tool, and lead-free solder.

General-Purpose—Lightweight pencil irons have burn-resistant silicone rubber cord.

Modular Soldering Irons

Preassembled Irons are a combination of the most popular modular components, and include handle, heater, and tip. For a customized iron, combine No. 6A907 soldering handle with choice of heating element and thread-on tip. Handle is 3-wire grounded with 4½-ft. cord and features "soft touch" acid- and flux-resistant grips. UL Listed (E21922).

Solder Pots

American Beauty—For lead-free soldering. Chemically stable, cast-iron crucibles are resistant to corrosion. Cartridge heating elements are inserted directly into the crucible. Internal removable dross skimmer increases safety and maintains solder purity and temperature. Use for pretinning wires, connectors, and other assembly components. 110-120VAC.

Hakko—Analog Pot No. 32TV27 features analog functionality and a rugged ceramic heating element. Lead-free compatible and can accommodate two pot sizes. Digital Pot No. 32TV28 is used for dip soldering and tinning the ends of wire leads. Features four different heating programs and convenient timer, which is useful where reliable control of solder temperature is essential.

Oiltight Enclosures for 22mm Operators

- NEMA rated 12 and 13
- JIC Standard EL-1-71

Neoprene gasket and mounting flange ensure oiltight seal. Captive cover screws are threaded into deep-well hubs. Carbon steel with ANSI 61 gray polyester powder-coated finish. Seam welded and ground smooth. Grounding stud included. UL Listed and CSA Certified.

Enclosures for 22mm Operators

Plastic enclosures are made of impact- and corrosion-resistant Valox® crystalline thermoplastic polyester. Molded internal bosses for back panel, component mounting, and DIN rails. Silicone gasket; no hinge. Cover and base meet with tongue-and-groove design for tight seal. Include nonmetallic cover screws. Sheet Steel and 304 Stainless Steel enclosures are wall mountable and for use with C-2000. UL Listed and CSA Certified. Plastic enclosures are rated IP66.

Push-Button Pendant Stations

Square D by Schneider Electric

Come unassembled, except for 2-Button Pendant Station Nos. 2EV30 and 2EV31. UL Listed, CSA Certified, and CE Certified.

30MM
- NEMA rated 1, 3, 4, 4X, and 13 plastic enclosures
- ¾" NPT conduit entry

Use with any 30mm corrosion-resistant, nonilluminated operators. Interlocked push buttons include contact blocks; rated NEMA A-600.

22MM
- NEMA Type 1, 4, 4X, and 5 plastic enclosures
- 8 to 26mm cable entry

Use with a variety of 22mm corrosion-resistant, nonmetallic, nonilluminated operators. Contact blocks; rated NEMA A-600, Q-150DN.

30mm Contact Blocks

- NEMA rated A600-P600
- #12 to 24 AWG wire range allows use of more common small wire sizes

Finger-safe terminals are at 20° angle to eliminate interference with other contact blocks mounted in tandem. Feature double-break fine silver contacts with wiping action.

HUBBELL WIEGMANN

JIC and NEMA 12 and 13 Sloped Enclosures

- Carbon steel
- ANSI 61 gray polyester powder-coated finish
- Seam welded and ground smooth

UL Listed, CSA Certified.

ENCLOSURES

Angled face ensures all installed devices face operator. Enclosures have grounding provision. Captive cover screws are threaded into deep-well hubs.

Sloped Top

Enclosure can be mounted to create either a 30° or 60° angle for the control surface. Continuously hinged cover along bottom edge.

Push-Button

Accept all standard 30mm 4-way push buttons, switches, and pilot lights. Top and bottom mounting plate.

PEDESTAL COLUMNS AND BASES

Supports sloped-top enclosures.

Columns

Pedestal columns provide passage-way for wiring. Flanged at both ends with a gasketed cover plate. Include access plate, gaskets, screws, and box connective fittings. Angled pedestal has a 45° angle at top.

Bases

Floor-mounted with a square pattern of holes to fit a wiring column or other flanged device. Include leveling screws.

Yellow flattened actuator lever.

No. 24D454

No. 24D428

Honeywell

NT Series Toggle Switches

- ½" dia. hole mounting
- Temp. range: -85° to 160°F

Feature a movable seal between the toggle lever and bushing and a sealed case to meet NEMA 3, 3R, 4, 13 and IP67/IP68 seal ratings. Suitable for aerial and scissor lifts, truck-mounted telehandlers, cranes and construction, agriculture and material handling equipment, factory-floor control units, and machine tool equipment manufacturers. UL Recognized. CSA Certified and CE Approved.

Panel-Mount DC Toggle and Rocker Switches

Popular replacement switches for marine applications. 12VDC rated, 5A lamp load, 15A inductive load. Toggle switches fit panels to 3/16" thick with provided backup nut, to ¼" thick without that nut. Toggle switches require a ½" mounting hole. Rocker switches require a 1½" x ⅞" rectangular opening.

Switch Boots

- Temp. range: -80° to 400°F

Silicone sealing boots prevent moisture, salt spray, dirt, fungus, and other damaging materials from seeping into electronic equipment through switch connections. Ozone- and sunlight-resistant silicone rubber keeps buttons free from ice or packed dust buildup. Integral nickel-plated brass mounting nuts replace original switch connection nuts.

Foot Switch Safety

It is the responsibility of the foot switch user to determine the suitability of a particular foot switch for its intended use and to be certain that it complies with all federal, state, and local safety and health regulations. Using foot switches on machinery that lacks effective point-of-operation safeguards can cause serious injury. Foot switches should be used only where point-of-operation and pinch-point guarding devices have been properly installed and are utilized to protect the operator's hands.

Class 9007 Heavy-Duty Limit Switches

- Enclosures: NEMA 1, 2, 4, 6, 6P, 12, and 13 (IP65, IP66, IP67)
- Contacts rated 10A, 600V
- Limit switch arm required
- ½" NPT conduit entry

Bodies and heads are die-cast zinc alloy. Oiltight for efficient operation. For additional limit switch replacement parts, see Grainger.com®.

UL Listed and CSA and CE Certified. Hazardous location units are UL Listed for Class I Div. 1 Groups B, C, D and Class II Groups E, F, G.

Top Push Rod Plunger Adjustable
No. 11X452

No. 12V052

Type AW Limit Switches

- 600V max.
- 15A
- Enclosures: NEMA 1, 2, 4, 12, and 13
- Plunger types feature a micrometer adjustment

Precision switches are oiltight and dust-tight and can be used in extremely low ambient temps.: -65°F for lever types, 0°F for plunger types. Die-cast zinc housing. Lever arms sold separately; see page 264. UL Listed, CSA and CE Certified.

Series D4A Limit Switches

- ½"-14 NPT conduit entry, terminal screw connection
- Operating temp.: side rotary, -40° to 238°F; except No. 2CLR9; all top plungers and flexible rods, 21° to 238°F
- Enclosures: NEMA 3, 4, 4X, 6P, 12, and 13; IP67
- Load rating: SPDT double break, 10A max. at 125VAC; DPDT double break: 5A max. at 125VAC
- Mechanical life: SPDT double break, 50 million operations; DPDT double break, 30 million operations

Heavy-duty plug-in switches have a double seal on the head and complete gasket cover. Provide Class 1 protection against electrical shock.

Side rotary switches are user-selectable CW, CCW, or both. UL Listed and CSA Certified.

E50 Series Limit Switches

- Rated NEMA 3, 3S, 4X, 6P, and IP67
- 10A
- Operating temp. range: 14° to 250°F
- ½"-14 NPT conduit entry

Switches feature modular, plug-in components that provide application flexibility, reduced inventory, and less downtime. Rugged construction withstands harsh cutting fluids and chemicals. Designed with terminal identification on the name-plate for a visual wiring checkout without guesswork. Heads and switch bodies can be replaced without rewiring. UL Listed and CSA Certified.

EATON

LS Series Limit Switches

- 1NO/1NC
- 4A
- Operating temp. range: -13° to 158°F

Modular switches are suitable for use in safety applications designed to protect persons or processes. Feature plug-in system, positive opening NC contacts, and operating heads that can be rotated 90° to suit a specific direction. LSM Series are designed with metal bodies, and LS Series feature more economical, plastic bodies. UL Listed. CSA and CE Certified.

Honeywell

Hazardous Location Limit Switches

- Aluminum construction
- NEMA rated 1, 7
- 2.56" H x 2.78" W x 2.02" D
- ½" NPT conduit entry
- Operating temp.: -40° to 160°F (except Nos. 12U990 and 12V003 are rated to 400°F)

Designed with flame paths in the housing that cool exploding gases below the kindling temperature before they reach the explosive gases surrounding the housing. Applications include control valves and actuators, petrochemical plants, conveyors, and material handling. ATEX, IEC Ex, Div. 1, & 2, Class I, Groups C, & D; Div. 1 & 2, Class II, Groups, E, F, & G; II 2 G, EEx d IIB + H2 T6. UL, CSA, ATEX, IEC Ex.

Waterproof Limit Switches

CPI Switches & Sensors

- Temp. range: -40° to 185°F

Submersible with proper wire sealing. For the harshest environments.

E-SERIES SWITCHES

Large overtravel capability and adjustable mounting brackets. Feature 1-way vertical and horizontal movement. Stainless steel bracket included. No. 5DKF7 has an ultralong actuating lever for extreme overtravel flexibility.

J-SERIES SWITCHES

Water-resistant flat-lever Nos. 5DKF8 and 5DKF9 models have an ultralow profile with high overtravel actuators for applications with limited space. 1-way vertical and horizontal movement. Each includes stainless steel bracket. Plunger-style Nos. 5DKG0 and 5DKG1 feature omnidirectional movement. Patented ball design eliminates actuator jamming for precise control. Plunger-style No. 5DKG5 has a rugged, long-plunger actuator and vertical movement. Includes a Deutsche connector.

XCMD Series Miniature Limit Switches

- 1NO/1NC
- Enclosures: NEMA 1, 2, 4, 12, and 13 (IP67, IP68)
- 6A, 240VAC
- Operating temp. range: -25° to 70°F

Modular limit switches have integral snap-action contacts. Bodies are Zamak® zinc alloy. Class I protection against electric shock. 5 gn vibration resistance, and 25 gn shock resistance. For short-circuit protection, use 6A cartridge fuses, type gG. UL Listed and CSA Certified.

XCK Series Limit Switches

- 1NO/1NC
- 10A, 240VAC/250VDC
- Operating temp. range: -13° to 158°F

Lever-operated CW and CCW in 5° and 90° increments. Slim body with metal head and plastic enclosure.

XCKP SERIES

- Enclosures: NEMA 1, 4, and 12 (IP66, IP67)
- Mechanical life: 10 million operations

Complete switches are double insulated with no grounding required.

XCKD SERIES

- Enclosures: NEMA 1, 2, 4, 6, 12, and 13 (IP66, IP67)

Compact metal enclosure protects switches. Head, body, lever, and connector modularity.

Series ZE, ZV2, and ZV Limit Switches

OMRON®

- Standard unit enclosures: NEMA 1; IP60
- Sealed (booted) unit enclosures: NEMA 1, 2, 3, 4, and 5; IP65

Large, easy-to-wire switch cavity. Die-cast housing. Sealed units feature a rubber boot and clamping band on head to seal out dirt. UL Listed and CSA Certified.

ZE SERIES

- ½"-14 NPSM conduit opening and side mounting bolts
- 15A, 480VAC/250VDC
- Operating temp.: 39.6° to 201.6°F

ZV2 AND ZV SERIES

- Screw terminals on internal switch face forward when cover is opened
- 15/15/10A, 125/250/480VAC
- Operating temp.: 39.6° to 201.6°F

ZV2 units are gang-mountable.

OMRON®

Series D4C and D4CC Compact Limit Switches

- D4C are prewired; D4CC have M12 single-keyway 4-pin connector
- Operating temp.: 40° to 184°F
- Enclosure: NEMA 3, 4, and 13; IP67
- Load rating: D4C 5A max. at 250VAC; D4CC 1A max. at 125VAC and 30VDC
- Mechanical life: 10 million operations

Switches have triple-sealed construction.

D4C and No. 2CLX6 can be gang-mounted up to 6 switches. UL Listed, CSA and CE Certified.

MICRO SWITCH™ 914CE Series Compact Limit Switches

Honeywell

- Enclosure: NEMA 1, 2, 3, 3R, 4, 6, 6P, and 13; IP66/67/68
- 5A, 250VAC
- Operating temp.: 35° to 160°F
- SPDT

Mechanical life up to 10 million operations. Precabled wiring. Zinc die-cast housing with bottom exit. UL Listed, CSA and CE Certified.

MICRO SWITCH™ Snap-Action Switches

Honeywell

- SPDT
- Screw terminal type, except No. 6DXD0 has solder terminals
- 1" on center mounting holes
- Overall dim.: 1"H x 2"L x 0.7"D

BZ, BA, and BE Series feature wide operating characteristics and enhanced mechanical life up to 20,000,000 cycles. They meet 125, 250, and 480VAC, regardless of amperage. Rugged construction, low operating force, and differential travel with momentary or mechanical contact action. Elongated mounting holes allow easy and accurate mounting. Compact and lightweight with accurate repeatability. Suitable for building controls and fire suppression systems, communication systems, machine tools, door latching mechanisms, and most simple On/Off actions. UL Listed and CSA Certified. BZ and BA Series are ENEC Certified.

OMRON®

Snap-Action Switches

Functionally interchangeable with Unimax 2HB series. UL Recognized and CSA Certified.

Series A—For heavy-duty applications.

Series Z—High-precision general-purpose switches. No. 3XG49 is dripproof (IP62).

Series X—For DC applications.

Series DZ—Switches have 2 circuits.

Series TZ—High-temperature switches with max. ambient and operating temp. of 752°F (400°C).

Snap-Action Switches

GA GRAINGER APPROVED

Designed with 10, 15, 20, 25A ratings and a wide variety of actuators for differer applications. Provide high precision with long mechanical life. V Series feature low operating force and miniature size. Z Series have a high motor-load rating. For use with direct-to-switch loads like motors, halogen lamps, and solenoids; also for use with foot switches, flow switches, door interlocks, and applications requiring compact or miniature switches. UL and C-UL Listed. RoHS compliant.

Cable Pull Emergency Stop Switch

Cable Kit No. 10N099

Cable Pull Emergency Stop Switch and Cable Tension Kits

STI SAFETY, TECHNOLOGY & INNOVATION
OMRON

- Die-cast alloy case
- Vibration tolerant—no nuisance tripping
- NEMA 6 (IP66)

Combination cable and push button-actuated switch handles cable spans up to 246 ft. (75m). Built-in tension status indicator eases installation and troubleshooting. Heavy-duty housing stands up to demanding industrial applications and withstands water washdown cleaning. An integral E-stop button provides emergency stopping capability at the end of a cable run. Lid-mounted status indicator allows easy setup and maintenance. Designed for a minimum of 1 million actuations. Cable tension kit required, sold separately. UL and C-UL Listed and CE Certified.

Cable Pull Switches

SQUARE D by Schneider Electric
Telemecanique Sensors

Switches signal an emergency or normal stop at any point along a 165-ft. cable. Taut-cable principle ensures switch will activate if the cable is broken. Positive latching, force, and adjustment indicators. UL Listed and CSA Certified.

Emergency cable pull features latching contact (reset by push button) and positive opening contacts. Normal cable pull provides momentary action (no reset) and snap-action contact. Nos. 4B787 and 4B784 are recommended for outdoor applications where icy conditions are likely. No 2FM01 provides 600VAC max. service for industrial applications.

CABLE KITS

Contain 1 galvanized steel cable with red jacket, 1 turnbuckle, 4 cable grip clamps, 1 fixed cable support, 1 end spring, and 3 wire end protective guards.

Safety Interlock Switches

SAFETY, TECHNOLOGY & INNOVATION

OMRON

TONGUE-OPERATED

Heads can be rotated in 4 directions, 8 for T2007 Series. Rated 5A at 100VAC, 2A at 250VAC, 1A at 500VAC, 2A at 24VDC, 0.5A at 250VDC. Includes ½" NPT conduit adapter.

D4NS Series—Switches handle both standard loads and micro-loads. Actuation keys sold separately.

D4BS Series—Actuation key (sold separately) prevents malfunctions and false operation. Switches conform to EN (TUV), BIA, and SUVA standards. UL Listed and CSA Certified.

TL4019 Series—Withstand water washdown cleaning. Feature 4 contacts and rear manual release. Narrow profile with rotatable head. Optional key release and optional slide bolt.

T5009 and T2007 Series—Withstand water washdown cleaning. Min. 1 million actuations. Miniature T2007 Series fit on 1" square tubing.

MAGNETICALLY ACTUATED, MA-16 SERIES

Completely encapsulated for use in harsh or wet environments. Tolerate guard door misalignment up to 10mm (0.39"). Min. 1 million actuations. UL and C-UL Listed and CE Certified.

OMRON

Force-Guided Relays and Sockets

Compact relays with force-guided contacts help avoid hazardous machine status when used as part of an interlock circuit. Designed for use where it is necessary to monitor relay contacts for safety purposes and to support the CE marking of machinery. Reinforced insulation between inputs and outputs. Terminal arrangement simplifies PCB pattern. Conform to EN standards (EN50205 Class A, approved by VDE). UL Recognized and CSA Certified.

Safety Mat

Mounting Trim Kit

Safety Contact Mats

- 8.5 lb. per sq. in. minimum activation force
- Can handle forklift traffic up to 270 lb. per sq. in.

Controller and pressure-sensitive mat sold separately. Mats have a PVC cover on 24-ga. galvanized steel conductive plates.

Mounting Trim Kits—2-part perimeter and joining trim simplifies installation and provides a custom appearance. Secures mats to the floor to meet safety regulations and can be used to join multiple mats.

Controllers—Designed with LED indicators and selectable automatic Start or Start/Restart Interlock.Up to 12 mats may be connected in a series to a single zone. No. 2LCT7 has removable terminal blocks. Steel units are rated NEMA 4, 12. Nos. 2LCU4 and 2LCU6 add Start Interlock mode and feature zone status indicators, full-featured diagnostics, 2-digit numeric display, DIP switch mode selection, equipment monitoring, selectable auxiliary output mode, and remote access to reset functions. UL Listed and CE Certified.

Light Curtains

ifm efector

These Safety Light Curtains consist of an emitter and receiver pair that create a multi-beam barrier of infrared light in front of, or around, unsafe work areas. If any of the beams are blocked by personnel, the light curtain sends a signal to the machine to place it in a safe state. They meet the highest achievable safety level requirements: Type 4, SIL 3, and PLe. Available in both finger (14 mm) and hand (30 mm) resolutions and are simple to wire and install.

Perimeter Light Curtain Guarding Systems

- Safety yellow aluminum housing
- Built-in control monitoring
- NEMA 4

Self-contained systems consist of an infrared transmitter and receiver which contain the control circuitry—no separate control box is required. Selectable Automatic Start and Start/Restart Interlock modes. Solid-state PNP outputs. Visual alignment indicators aid installation. Light curtains: UL Listed, CE Certified, CSA Certified. All curtains except No. 2LBZ9 meet IEC Type 4 ESPE; TUV. Cordsets: UL Listed, CE Certified, CSA Certified. Resource modules: UL Listed, CE Certified.

Rotating Mirror Beacons

Schneider Electric

- 20 flashes per minute
- 100,000-hr. lamp life
- Dome lens design
- Temp. range: 14° to 122°F
- IP23 ABS housing with CR polychloroprene rubber gaskets

Provide long-distance, high visibility for machines and industrial vehicles. LED lamps for long life. Prewired for easy installation; screw mount. UL Listed, CSA and CE Certified.

50mm and 56mm Dia. Tower and 86mm Dia. Warning Lights

Dayton

- IP65 polycarbonate housing
- Lead wire type

56mm dia. tower lights feature steady and flashing stackable LED modular components. Available pole with surface, or wall mounting bracket, or direct mounting. Optional modular buzzer kits. 86mm dia. warning lights feature high-intensity LED lights, selectable steady/flashing/rotating modes. Available pole mounting or wall-mount bracket. UL Listed and CSA Certified.

Tower Lights, 40, 60, and 100mm Diameter

- IP54 polybutylene housing
- For outdoor or indoor use

Towers have up to 5 super-bright LEDs for optimum luminosity. Assembled and prewired. For long-distance indication of the operating states or sequences of a machine. 1 9/16" lights are primarily used in the food-processing and medical sectors. 2 3/8" lights are used in semiconductor factories or on conveyor belts. UL Listed, CSA and CE Certified.

Illuminated Beacons, 60 and 70mm Diameter

Highly visible 360° beacons provide instant communication within work groups and across factory floors, enabling factory personnel to monitor and control production quality in large automated areas. NEMA 1, 4X, 12, and IP65. For indoor use only. UL Listed, CE and CSA Certified.

Telemecanique
Sensors

Osisense™ Photoelectric Sensors

- LED status indicator
- NEMA rated 4X
- Smaller, compact body saves machine space

Multimode sensor adapts to numerous sensing applications with the touch of a button. M12 and Mini-connector cables are sold separately at Grainger.com®. UL Listed; CSA and CE Certified.

Comet Thru-Beam Receiver with Cable No. 2XCA8

SM Series Retro-Reflective, Background Rejection with Cable No. 2XDL4

Enhanced 50 Series Polarized Retro-Reflective with 4-Pin Micro No. 2XCK1

EATON

Photoelectric Sensors

COMET SERIES

- IP69K rating
- Solid-state AC/DC models rated for 300mA; DC-only models rated for 250mA NPN and 100mA PNP
- Light/dark operation
- Temp. range: -4° to 158°F thru-beam source Nos. 2UUT5, 2UUT6, 2XCA1, and 2XCA2, and -13° to 151°F for Nos. 2XCA3 to 2XCA7
- Temp. range: -40° to 158°F all others

Industry-standard 18mm threaded flat tubular body can be mounted like a tubular sensor or against any flat surface. Visible sensing beam simplifies setup and alignment. Solid polyurethane housing is highly resistant to shock and vibration. Adaptable modulation circuit protects against crosstalk. Background rejection models reliably detect targets regardless of color, reflectance, contrast, and surface shape. UL and C-UL Listed and CE Certified, except UL 508 Certified thru-beam source Nos. 2XCA3 to 2XCA7 and polarized retroreflective No. 2XCG3 are CSA and CE Certified.

ENHANCED 50 SERIES

- Light/dark operation
- Temp. range: -13° to 151°F

Fully potted construction for use in areas subject to washdown, high shock, or high vibration. High optical performance. Adjustable gain pots allow precise adjustment. CSA, CE, and UL 508 Certified.

SM SERIES

- Visible positioning aid
- Threaded barrel
- 18mm lens snout
- Miniature size fits small spaces
- Temp. range: -13° to 151°F

Visible sensing beam simplifies setup and alignment. TargetLock™ ensures reliable operation. LEDs indicate output/power/TargetLock.

Reflectors

Telemecanique Sensors · EATON · ifm efector

CORNER CUBE REFLECTORS

Retroreflector prisms return a beam in the same direction it came from—even if the reflector and the source are skewed—for a high degree of reliability. For use with retroreflective photoelectric sensors. The only reflective surface that works with polarized photoelectric sensors. Select reflector smaller than your target.

ifm efector

Designed and tested to withstand industrial automation applications. Integrated microprocessor-based electronics offer high performance and are completely sealed in compact housings. Background suppression versions reliably differentiate between target and background regardless of background color. Reliable position detection in conveying, material handling, packaging, and automotive applications.

No. 35T392

No. 35T399

RIGHT ANGLE

- Max. range: 65-ft.
- AC version has 2 wires for quick installation
- 18mm dia. mounting thread

Cube sensor occupies less space than traditional tubular sensors and is ideal for applications with limited mounting space. Polarized retro-reflective models contain a filter that eliminates false triggers from shiny targets and a 13 ft. range with a 80mm dia. reflector. Metal body.

RECTANGULAR

- Max. range: 82-ft.
- Rugged housing

Connector rotates 270° for versatile mounting options. Protective metal frame withstands mechanical damage in applications.

M8, M12, and ½" Cordsets

ifm efector

- Female connector to flying leads

Deliver high quality and excellent value. Designed with a lock-in-place coupling nut that secures the cordset to a quick disconnect sensor and resists high levels of shock and vibration. High-flex, PUR-jacketed cable is rated to over 5 million flex cycles. Features a special insert that acts as a mechanical end-stop preventing damage to the O-ring. Designed to resist harsh conditions in industrial automation and oils and coolants. Silicon and halogen free.

EATON

Eaton Cylindrical Inductive Proximity Sensors

Stainless steel sensors for use with metallic targets. NEMA rated 4, 4X, 6, 6P, 12, and 13 (IP67, IP69K). C-UL Listed. Models with NPN and PNP circuits also CE Certified.

IPROX®

- AC models rated for 250mA max. load,
- DC models rated for 300mA max. load
- Temp. range: -40° to 158°F

Extended sensing ranges. Shock-resistant front cap. Wired NO; advanced features can be configured using optional software No. 2XDL3, sold separately. For automotive, machine tool, material handling, and metalworking applications.

E57 SERIES

- AC and DC models rated for 250mA max. load
- Temp. range: -13° to 158°F
- 360° LED status indicator

Inductive Proximity Sensors

Ideal for noncontact detection of metal targets in position sensing applications and part presence application. Extended sensing ranges reduce failure from mechanical damage. Robust housing is designed for industrial applications. 4 visible LED outputs indicate status, making troubleshooting quick and easy. NEMA IP67.

No. 35T376

Inductive Proximity Sensors

- NEMA rated IP67
- Operating temp. range: -13° to 176°F
- 0.40" W x 1.09" L x 0.63" D

Feature 2m cable connection, PBT case, shielded body, and 1 yellow LED for output state.

No. 24JY94

Pumptrol® Air Pressure Switches—Fixed Differential

- 2-pole, HP rated
- Diaphragm actuated
- Contacts open on pressure rise
- NEMA 1 enclosure

Control electrically driven air compressors. Unloader models feature a small valve that opens at shutoff, releasing air pressure from the compressor head. Temp. range: -22° to 257°F. UL Listed and CSA Certified.

Pumptrol® Air and Water Pressure Switches—Adjustable Differential

- 2-pole, HP rated
- Diaphragm actuated
- Contacts open on pressure rise
- NEMA 1 enclosure

Control electrically driven air compressors or pumps. Unloader models feature a small valve that opens at shutoff, releasing air pressure from the compressor head. Temp. range: -22° to 257°F. UL Listed and CSA Certified.

Pumptrol® Water Pump Pressure Switches

- 1- and 2-pole, HP Rated
- ¼" female connection
- Diaphragm actuated
- NEMA 1 enclosure

Designed for direct control of electrically driven pumps. Can be used with motor starters to control higher horsepower motors. Low pressure cutoff switches operate at approximately 10 psi below the cut-in setting and will turn the pump off. Switches with a pulsation plug sense change over a longer interval and does not respond to spikes. Temp. range: -22° to 257°F. UL Listed and CSA Certified.

MDR11 Series w/Unloader and Auto/Off Switch No. 3AFU8

MDR3 Series w/Unloader and Auto/Off Switch No. 3FWE3

Air Compressor Pressure Switches

For all global air compressor and water applications. Rotatable unloader valve simplifies retrofit onto compressors. Diaphragm actuated. For ¼ to ⅜" brass adapters, see pages 2793.

MDR11 SERIES

- DPST switch
- Rated 26A
- Temp. range: -22° to 257°F

UL Listed and CSA Certified.

MDR3 AND MDR3/OL SERIES

- 3PST Switch
- Rated 30A, 1-phase/24A, 3-phase
- Temp. range: -22° to 257°F

MDR-3/OL Series combines the function of a pressure switch and magnetic starter into 1 unit. Built-in overload protection. All are UL Listed, CSA and CE Certified.

SQUARE D by Schneider Electric

Machine Tool, Dual Stage, and Differential Pressure Switches

- ¼" NPT female inlet, except male No. 3FJZ8
- Rated 10A
- Temp. range: -10° to 185°F

Can be applied to a wide variety of pneumatic and hydraulic machine and process applications to control or monitor system pressure and protect equipment. UL Listed and CSA Certified.

No. 6B450

ASHCROFT

Harsh Environment Pressure Switches

No. 5LB44

- ¼" FNPT inlet port
- Stainless steel pressure connection
- Viton® actuator seal
- Temp. range: 20° to 300°F

For harsh environments using pumps, compressors, hydraulic systems, and HVAC equipment. Watertight enclosure meets NEMA 3, 4, 4X, and 13, and IP66. Fixed deadband. Switch rated 15A at 125/250VAC; 0.5A at 125VDC.

Telemecanique Sensors

Pressure Transmitters

No. 25UX05

- ¼" 18 NPT
- Temp. range: -22° to 185°F

These compact transmitters feature a thin film technology that reduces noise levels, temperature coefficients, and helps to achieve a high level of accuracy. Compatible with most types of fluids, and can be mounted in the most confined spaces.

Range	Power Required	Output	Wetted Materials	Item No.

Screw Cover Pull Boxes

Suitable for use as a junction or pull box in commercial and industrial applications. UL Listed and CSA Certified.

NEMA 1

Feature mounting holes on back of box. Cover design allows easy removal without extracting cover screws.

NEMA 3R

Provide protection in outdoor applications against rain, sleet, and snow, or indoors against dripping water. Use as wiring box or junction box. Feature slip-on cover that is securely fastened with screws. Drip shield top and smooth seamless sides and front.

NEMA 1
Galvanized
No. 6JYU7

NEMA 1 Wireway Duct and Fittings

- 16-ga. carbon steel bodies
- ANSI 61 gray polyester powder-coated finish

Straight wireway duct protects electrical wiring in locations where dust, dirt, oil, and water are not serious problems. Hinged covers allow easy lay-in of wires. Doors can be hung in open position or removed from tub. UL Listed and CSA Certified.

HUBBELL WIEGMANN

NEMA 3R Wiring Troughs

Protect wiring in outdoor installations from rain, sleet, and snow, or indoors against dripping water. Feature drip shield top and smooth seamless sides that prevent rain, snow, and sleet from entering enclosure. Embossed mounting holes on back. Slip-on removable cover is fastened with screws located along the bottom edge. Knockouts are located on bottom of enclosure. Gray polyester powder-coated finish or unpainted galvanized steel. UL Listed and CSA Certified.

NEMA 4 and 4X Enclosures

- 14-ga. carbon steel and 16-ga. stainless steel
- ANSI 61 gray polyester powder-coated finish on painted steel units
- Neoprene gasket on NEMA 4 (JIC)
- Polyurethane foam-in-place seamless gasket on NEMA Type 4

Provide nonsubmersible watertight protection indoors and outdoors where splashing, dripping, or hose-down of noncorrosive liquids can occur. Cover is mounted to box with a sturdy continuous hinge. All hardware, door clamps, and hinges are stainless steel. Interior panels sold separately (see page 300). UL Listed and CSA Certified.

HUBBELL
WIEGMANN

Wiegmann N412C ULTIMATE Series Enclosures

Protect electrical and electronic components form harsh environments. Designed with a 20° sloped-top and feature fabricated bodies and doors from 14- or 16-ga. steel with continuously plasma welded seams. Doors are interchangeable, easily removable and have flush latching. Have concealed hinges and doors are sealed with a closed cell neoprene gasket. Increased tub opening provides better access. Smooth grain finish.

Aluminum Enclosures, NEMA 12 and 13

Lightweight enclosures protect components and controls in indoor applications. Designed with seams that are continuously welded and ground smooth. Stainless steel screws and clamps secure cover that is removed by pulling stainless steel continuous hinge pin. Weldnuts are furnished for mounting optional panels and terminal block kit. Oil-resistant gasket. Enclosures are unpainted; cover and sides of body have smooth, brushed finish.

Sloped-Top Enclosures

Designed with a 20° sloped-top, these enclosures feature 14- or 16-ga. steel with continuously welded and ground seams. Carbon steel versions have gray polyester powder paint inside and out. Ideal for smaller control cabinets for applications requiring the mounting of controls at an ergonomic height. NEMA 12 and 13 for carbon steel and NEMA 3R,4,4X, and 12 for stainless steel.

NEMA 12 and 13 Enclosures

Constructed of 16- or 14-ga. steel, and feature seams continuously welded and ground smooth. Bonding provision on door. A51SC Series have ANSI 61 gray polyester powder paint inside and out. Designed with screw cover and is secured in each corner for a positive seal that is easily removed for modifications. A51CH Series have ANSI 61 gray polyester powder paint inside and out. Designed with screw-down clamps for secure closure and can be used in a wide variety of applications. A12 Series have a white inside with ANSI 61 gray finish on the outside. Designed for applications requiring a bright white interior to increase visibility; includes a padlocking hasp and staple for security and screw-down clamps for secure closure.

Disconnect Switch
No. 4B983

SQUARE D by Schneider Electric

Flange-Mounted Disconnect Switches

Complete kit requires a disconnect switch, handle, and door-closing mechanism.

NONFUSIBLE AND FUSIBLE MECHANISMS

- Include disconnect switch and operating mechanism; handle sold separately

UL 98 Listed and suitable as the main disconnect switch for a control panel. Ship assembled for right-hand operation, but can be easily converted to left-hand with no additional parts.

DOOR-CLOSING MECHANISMS

- Operating mechanism only; disconnect switch and handle sold separately

Primarily for flange-mounted disconnect switches and circuit breaker operating mechanisms, but can be used independently. For small- and medium-size single-door control enclosures.

Door-Mount, Nonfusible Load Break Switches

- 3-pole

For applications where motor branch circuit protection is provided upstream of the switch. UL 508 nonfusible load break switches; UL 508 Listed as manual motor controllers. Complete with mounting handle operator, 13" shaft, door interlock plate, and line terminal shroud.

Fiberglass Enclosures

- NEMA 4, 4X, 12, and 13
- IP66

These enclosures are durable in corrosive environments. Compression-molded fiberglass has outstanding chemical- and temperature-resistance, and is easily punched, drilled, filed, or sawed. Gasket assures water-tight and dust-tight seal. Corner latches provide unobstructed access. The continuous hinge provides a secure seal, and double-latching creates added security. Fiberglass material is light-gray inside and out.

J Series Nonmetallic Enclosures

- Fiberglass
- Rated: NEMA 4X, 6P, 12
- Hinged covers

Designed for general electrical and electronic applications and any application that has associated environmental concerns. Built-in mounting capabilities and the strength characteristics associated with a protective wraparound cover. They enhance any instrument installation.

DuraBoxx® Series Nonmetallic Enclosures

- Fiberglass
- NEMA 4X, 6P, and 12
- Screw-on covers

Designed for durable performance in both commercial and industrial indoor and outdoor environments like mining, oil, gas, wastewater treatment, and petrochem. Sleek design with shallow depths and flush cover construction makes them well suited for high-end electronic applications like wireless communications and operator interfaces.

Enclosure Air Conditioners

Hoffman

These units feature head pressure control for low ambient operation, compressor heater, coated condenser coil, malfunction switch, and thermostat and heater package. They are ideal for industrial automation, telecommunications equipment, package handing equipment, and security and defense systems.

Enclosure Air Conditioners—NEMA 12 and 4X

RITTAL

- Adjustable temp. setpoint: 68° to 131°F (except Nos. 2PUX6 and 2PUX7)
- Status display includes enclosure temperature
- Terminal-block connection

Condenser coil is coated to stay cleaner for consistent performance even in harsh environments. Feature icing protection, startup delay, and connection for a door limit switch. Side-mount models feature air inlets and outlets positioned for optimal heat dissipation.

Wall-mount units greater than 3600 BtuH and all top-mount units have an integrated condensate evaporator. Roof-mount models feature 4 cold-air outlets and a central hot-air inlet.

Nos. 2PUX6 and 2PUX7 have basic display and controls with over-temperature alarm, and can only be set down to 86°F. All others feature configurable alarm, logging capability, master-slave operation for up to 10 units. 3-phase units include phase monitoring.

No. 2PUX8

No. 2PUZ7

No. 2PVA8

No. 2PVD5

Thermo-Electric Enclosure Coolers

Minimize downtime and component loss by removing heat around critical components within an enclosure. Compact and low-profile coolers use the Peltier effect to allow cooling of small indoor and outdoor enclosures without a compressor.

HUBBELL WIEGMANN

Enclosure Heaters

- Anodized, extruded aluminum body
- 35mm DIN rail clip count

Heaters maintain minimum temperatures in enclosures and help prevent condensation.

WARNING: Do not mount on wooden structures. Avoid placement near heat-sensitive components.

RADIANT (15 TO 150W)

Positive temperature coefficient heaters maintain stable enclosure temperatures, promoting reliable performance and extending component life. Fitted with push-type terminal connections. Black color. Class 1 Protection; tested for grounding at 1600V.

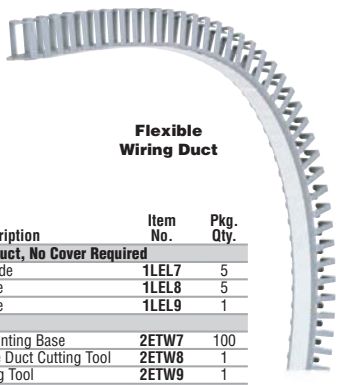
PANDUIT®

Wiring Duct

FLEXIBLE WIRING DUCT

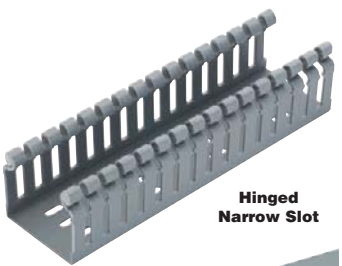


- Polypropylene
- 1.64-ft. length
- UL Recognized continuous use temp.: 149°F
- UL 94 flammability rating: V-2

Duct routes electrical wiring at extreme angles, around corners, and inside enclosure doors. UL Recognized and CSA Certified.

HINGED AND G AND F SERIES

- Lead-free PVC; hinged are flame retardant
- Standard 6-ft. length
- UL Recognized continuous use temp.: 122°F
- UL 94 flammability rating: V-0



Nonslip covers sold separately. UL Recognized, CSA Certified, CE Certified.

HUBBELL® Wiring Device-Kellems

Prewired Raceway Systems

- 120VAC receptacles (NEMA 5-15)
- Individual receptacles on metallic units, duplex receptacles on nonmetallic units

Multioutlet, hardwired units have multiple spacing configurations for great flexibility in designing wire and cable installations. Optional entrance fittings adapt raceways to existing power circuits.

Note: other lengths and configurations are available on Grainger.com®; optional entrance fittings are also available online.

Aluminum Service Poles

- Prewired and ready to install (except No. 4WX82)
- 2 channel
- Ivory color

Service poles mount anywhere in a room—floor to ceiling—to provide power, voice, and data services. Ceiling trim plate/mounting bracket (included) simplifies installation and repositioning. Both power and communication devices mount on the same side of the 2.13"W x 2.13"D poles. Accessible data/communication section of pole allows mounting of 2 Style Line® communication outlets. UL Listed.

Note: other colors and configurations are available on Grainger.com®.

Ladder Tray

Horizontal Elbow

Ladder Trays

- 4" load depth
- 5¼" side rail height

Rigid aluminum trays have high load capacity and resist stress, camber, and warping. Flange-out side rails ease cable installation. Splice plates are slightly curved, for a spring-fit on straight sections or contour-fit on fittings. Meet NEMA VE1. Include splice plates and mounting hardware.

Description	12" WIDE LADDER TRAY Item No.	24" WIDE LADDER TRAY Item No.
12-ft. Ladder Tray (75 lb. per ft.-12B)*	2HCL2	2HCL3
